I're-si'ne (ī'rē-sī'nē), *n.* [NL., fr. Gr. *εἰρεσιώνη* a wreath of olive or laurel wound round with wool; — from the woolly calyx.] *Bot.* A genus of tropical American amaranthaceous herbs having opposite leaves and small spicate or paniculate scarious flowers with a 5-parted calyx, and filaments united at the base. Several species are used as bedding plants for their colored foliage, with the trade name achyranthes.
I'ri-da'ce-æ (ī'rĭ-dā'sē-ē), *n. pl.* [NL. See IRIS.] *Bot.* A family of perennial herbs (order Liliales), containing about 60 genera and 900 species of wide distribution; the iris family. They have equitant, 2-ranked leaves and perfect, bracted, often showy flowers, with a 6-parted perianth in two series, the ovary inferior. Many genera, as *Iris*, *Crocus*, *Gladiolus*, etc., include familiar and highly prized garden plants. — **i'ri-da'ceous** (-shŭs), *a.*
ir'i-dec'tome (ĭr'ĭ-dĕk'tōm), *n. Surg.* A cutting instrument used in iridectomy.
ir'i-dec'to-my (-tŏ-mĭ), *n.* [*irido-* + *-ectomy.*] *Surg.* Act or process of cutting out a portion of the iris to form an artificial pupil.
ir'i-de-re'mi-a (-dē-rē'mĭ-ȧ), *n.* [NL.; *irido-* + Gr. *ἐρημία* absence.] *Med.* Absence of the iris.
ir'i-des'cence (-dĕs'ĕns), *n.* [See IRIDESCENT.] The rainbowlike play of interference colors exhibited by certain bodies. Sometimes, as in the soap bubble, mother-of-pearl, etc., the colors are those of thin films, sometimes, as in the plumage of certain birds and in some insects, the iridescence is due to the diffraction of the light reflected from closely ribbed or corrugated surfaces. Iridescence is readily distinguished from the ordinary absorption colors of substances by its shifting character, the lines changing with the point of view or the variation of the angle of incidence of the illumination.
ir'i-des'cent (-ĕnt), *a.* [L. *iris*, *iridis*, the rainbow: cf. F. *iridescent.*] Having colors like the rainbow, exhibiting iridescence; nacreous; prismatic; as, *iridescent* glass.

Syn. — Opalescent. — IRIDESCENT, PRISMATIC are here compared in their fig. uses. IRIDESCENT connotes a soft play, as of changing shades or hues; PRISMATIC, a brilliant or striking variety, as of bright colors; as, "The whole texture of his [Chaucer's] mind, though its substance seem plain and grave, shows itself at every turn *iridescent* with poetic feeling like shot silk" (*Lowell*); "His [Dante's] verse . . . now . . . has the terseness and edge of steel, and now palpitates with *iridescent* softness like the breast of a dove" (*id.*); "Jeremy Taylor's style is *prismatic*. It unfolds the colors of the rainbow" (*Hazlitt*); "If his ideas were not always perspicuous, they often came forth with somewhat of *prismatic* brilliancy" (*Landor*). See LUSTER, TRANSPARENT.
i-rid'i- (ĭ-rĭd'ĭ-). *Chem.* Combining form for *iridic* as *iridibromide.*
i-rid'i-an (ĭ-rĭd'ĭ-ăn), *a.* Of or pertaining to the IRIS of the eye; also, resembling the rainbow.
i-rid'ic (-ĭk), *a.* Of or pertaining to the iris of the eye.
i-rid'ic, *a.* [*iridin* + *-ic.*] *Chem.* Noting a crystalline acid, $C_9H_{11}O_8{\cdot}CO_2H$, got by decomposition of iridin.
i-rid'ic, *a. Chem.* Of or pert. to iridium; specif., designating those compounds of iridium in which it is quadrivalent or the element when quadrivalent; as, *iridic acid*, the hydroxide $Ir(OH)_4$ considered as being acid.
i'ri-din (ī'rĭ-dĭn ; Ir'ĭ-). *n.* [NL. *Iris*, *Iridis*, Iris (the genus) + *-in.*] **1.** *Chem.* A crystalline glucoside, $C_{24}H_{26}O_{13}$, occurring in certain species of *Iris* and in the root of the violet.
2. *Pharm.* An oleoresin obtained from *Iris versicolor*, used as a purgative and cholagogue.
i-rid'i-o- (ĭ-rĭd'ĭ-ō-). Combining form for *iridium;* as in *i-rid'i-o-plat'i-num*, an alloy of iridium and platinum. It is harder and more inert than platinum.
i-rid'i-ous (ĭ-rĭd'ĭ-ŭs), *a. Chem.* Of or pert. to iridium; specif., designating compounds in which iridium is trivalent or the metal when trivalent; as, *iridious* acid, the hydroxide $Ir(OH)_3$ considered as being acid.
i-rid'i-um (-ŭm), *n.* [NL., fr. L. *iris*, *iridis*, the rainbow. So called from the iridescence of some of its solutions. See IRIS.] *Chem.* A rare metallic element, of the same group as platinum, which it much resembles, being silver-white, but harder, and brittle, and insoluble in its normal state even in aqua regia. It is one of the heaviest substances known (sp. gr., 21–22 4). Symbol, *Ir*; at. wt., 193.1. Iridium was discovered by Tennant in 1804. It usually occurs as a native alloy with osmium (*iridosmium*), which may occur alone or with platinum. Iridium, as an alloy with platinum, is used for chemical vessels, for standard weights and measures, and in bushing the vents of heavy ordnance. It is also used for the points of gold pens. Iridium can be prepared in a finely divided form, **iridium black**, which is soluble in aqua regia, and which when heated in air is converted into the sesquioxide, Ir_2O_3, a bluish black powder used in porcelain painting. See also IRIDOSMIUM. In its salts iridium is bivalent and trivalent.
ir'i-di-za'tion (ĭr'ĭ-dĭ-zā'shŭn ; Ir'ĭ- ; -dĭ-zā'-), *n.* **1.** Act or process of exhibiting rainbowlike colors; iridescence.
2. *Med.* The iridescent appearance around a light as observed by persons affected with glaucoma
ir'i-dize (ĭr'ĭ-dīz ; Ir'ĭ-), *v. t.*; IR'I-DIZED (-dīzd) ; -DIZ'ING (-dīz'ĭng). **1.** To point or tip with iridium, as a gold pen.
2. To make iridescent; as, to *iridize* glass.
i'ri-do- (ī'rĭ-dŏ-; Ir'ĭ-dŏ-). Combining form from L. *iris*, *iridis*, Gr. *ἶρις*, *ἰρίδος*, meaning *of or pertaining to the iris* (of the eye).
i'ri-do-cho'roi-di'tis (-kō'roi-dī'tĭs), *n.* [NL.; *irido-* + *choroiditis.*] Inflammation of the iris and the choroid.
i'ri-do-cy-cli'tis (-sĭ-klī'tĭs ; -sī-klī'tĭs), *n.* [NL.; *irido-* + *cyclitis.*] Inflammation of the iris and the ciliary body.
i'ri-do-di-al'y-sis (-dī-ăl'ĭ-sĭs), *n.* [NL.; *irido-* + *dialysis.*] *Med.* Separation of the iris from its attachments.
i'ri-do-do-ne'sis (-dŏ-nē'sĭs), *n.* [NL., *irido-* + Gr. *δονεῖν* to shake] *Med.* Tremulousness of the iris due to dislocation or removal of the lens, as after operation for cataract.
i'ri-dol (ī'rĭ-dōl; -dŏl; Ir'ĭ-), *n.* [*iridin* + phenol] *Chem.* A solid substance, $C_6H_{12}O_3$, formed from iridic acid (see 2d IRIDIC) by loss of carbon dioxide. It is a trimethyl derivative of pyrogallol.
i'ri-do-mo'tor (ī'rĭ-dŏ-mō'tẽr ; Ir'ĭ-), *a.* [*irido-* + *motor.*] *Physiol.* Concerned in movements of the iris.
i'ri-do-ple'gi-a (-plē'jĭ-ȧ), *n.* [NL.; *irido-* + *-plegia.*] *Med.* Paralysis of the iris.
ir'i-dos'mine (ĭr'ĭ-dŏz'mĭn ; ĭr'ĭ-dŏs'-) } *n.* [*iridium* **ir'i-dos'mi-um** (ĭr'ĭ-dŏz'mĭ-ŭm ; ĭr'ĭ-dŏs'-) } + *osmium.*] *Min.* A native alloy of iridium and osmium, usually containing some rhodium, platinum, etc. It is found in flattened tin-white or steel-gray grains, and is used for pen points, compass bearings, etc. H., 7. Sp. gr., 19–21.
i-rid'o-tome (ĭ-rĭd'ō-tōm), *n. Surg.* Knife used in iridotomy.
i'ri-dot'o-my (ī'rĭ-dŏt'ŏ-mĭ ; Ir'ĭ-), *n. Surg.* Incision into the iris.
i'ris (ī'rĭs), *n.*; *pl.* E. IRISES (-ĕs ; -ĭz), L. IRIDES (ĭr'ĭ-dēz ; ī'rĭ-). [L. *Iris*, *Iridis*, the goddess, the rainbow, a sweet-smelling plant, Gr. *Ἶρις*, *Ἰριδος*, also iris of the eye. Cf. ORRIS.] **1.** [*cap.*] *Class. Myth.* Goddess of the rainbow, in the Iliad, the swift-footed messenger of Zeus and Hera

2. Wearisome; tedious; disagreeable or troublesome by reason of long continuance or repetition; as, *irksome* hours; *irksome* tasks; also, formerly, causing distress, pain, or disgust; painful; disgusting.

Syn. — Fatiguing, exhausting, burdensome, monotonous, operose, vexatious, annoying. — IRKSOME, TIRESOME, WEARISOME, TEDIOUS, HUMDRUM. That which is IRKSOME inspires distaste, reluctance, or impatience; as, "To run over again the same *irksome* round I had not patience" (*Mud. D'Arblay*); "An *irksome* drudgery seems it to plod on, through hot and dusty ways" (*Wordsworth*); "The difficulty of grasping abstract statements made learning very *irksome* to me" (*J. A. Symonds*). That is TIRESOME which actually tires or (esp.) which bores one; WEARISOME implies greater fatigue or more settled ennui, that is TEDIOUS which is tiresomely monotonous, slow, or prolix; as, "I found it [Covent Garden] . . . so *tiresome* that I came away long before the end, and declare that the dullest sermon I ever heard was cheery in comparison" (*Carlyle*); "It is *tiresome* to be funny for a whole evening" (*Scott*); "These high wild hills and rough uneven ways draw out our miles, and make them *wearisome*" (*Shak.*); "How *wearisome* eternity so spent in worship!" (*Milton*); "Life is as *tedious* as a twice-told tale vexing the dull ear of a drowsy man" (*Shak.*); "Shenstone somewhere sings: 'Tedious again to mark the drizzling day, again to trace the same sad tracts of snow: or, lulled by vernal airs, again survey the selfsame hawthorn bud, and cowslips blow.' I rely on you sympathizing in this. . . People complimenting each other on the approach of spring and such like felicitations are very *tiresome*" (*E. FitzGerald*); "Shoveling gravel becomes more *tedious* than *tiresome*" (*W. M. Camp*). HUMDRUM implies commonplace and monotonous routine; as, "A plain, *humdrum* domestic life, with eight hundred a year, and a small house, full of babies" (*Trollope*); "His [Racine's] skill in having made poetical the most *humdrum* sentiments and the most middling sort of passions" (*M. Arnold*). See TIRE, SLOW, PROSAIC, HEAVY, TEDIUM.

— **irk'some-ly,** *adv.* — **irk'some-ness,** *n.*

I'ron (ī'ŭrn; *see note under* APRON), *n.* [ME. *iren*, AS. *îren, îsen, îsern*; akin to D. *yzer*, OS. *îsarn*, OHG. *îsarn, îsan*, G. *eisen*, Icel. *îsarn, jârn*, Sw. & Dan. *jern*; cf. Ir. *iarann*, W. *haiarn*, Armor. *houarn.*] **1.** A silver white metallic element, malleable and ductile, strongly attracted by magnets, readily oxidized (rusted) in moist air, and attacked by many corrosive agents. Symbol, *Fe* (Latin *ferrum*); at. wt., 55.85. It is rarely found native (except in meteorites), but is of almost universal occurrence in combined forms (see IRON ORE). It is estimated as the largest metallic constituent of the earth's crust next to aluminium. The metal is reduced from its ores by heating with carbon. This process is now usually performed continuously in a blast furnace, ore, fuel (coke, coal, or charcoal), and limestone or other flux being dropped in at the top, and molten iron (*pig iron*) and molten slag being drawn off separately at the bottom (see BLAST FURNACE). Pure iron melts at 1804° C. (3279° F.), has a sp. gr. of 7.86–8.14, and weighs 491–508 lbs. per cu. foot. Three allotropic forms of iron are recognized (see FERRITE). Chemically, iron is chiefly baseforming, being bivalent in the *ferrous* compounds, which are white or pale green, and trivalent in the *ferric* compounds, which as a rule are yellow or brown. Passage from either of these series to the other by oxidation or reduction is readily effected. Commercial iron contains varying amounts of carbon and other substances (esp. silicon, sulphur, phosphorus, and manganese), which greatly affect its properties. Its constituents have been named from a physical-chemical standpoint, as: *ferrite*, or pure iron; *martensite*, a solid solution, and *pearlite*, the eutectoid alloy, of iron and carbon; *cementite*, a carbide; etc. (see these terms). **Cast iron,** the direct product of the blast furnace or of the cupola, is fusible and brittle. It can be tempered, but not welded or forged. Sp. gr., 7.0–7.6. Its carbon is either graphitic, which imparts softness and a gray fracture, or combined, which tends to render the metal hard and white. With reference to its use, cast iron is classified into different grades of **foundry iron** and into **forge iron.** The latter contains much combined carbon, and is used in making wrought iron. **Wrought iron** is a slaggy, malleable iron which does not harden when suddenly cooled (see BLOOMERY). Sp. gr., 7.5–7.8. **Steel** is iron which is malleable between certain (variable) limits of temperature and is either capable of being cast into an initially malleable mass, or becomes extremely hard when suddenly cooled (see TEMPER, *n.*, 7), or possesses both of these properties. The alloy steels behave in a different manner from the ordinary steels under heat treatment (see SELF-HARDENING, *a.*). Steel and iron products may be broadly divided into the two following classes, the approximate percentage of carbon being denoted in each instance by the number in parenthesis: **a** Those made without complete fusion and therefore containing slag (*weld metals*), including *weld* or *wrought iron* (to about 0.3), *weld, puddled* (semi-steel), *blister* or *cement steel* (about 0.3 to 2). **b** Those made by fusion and containing no slag, including *Bessemer, open-hearth*, and *crucible steel* (*ingot metals*), divided specifically into *ingot iron* (up to 0.3), called also *low, soft*, or *mild steel*, and *ingot steel* (0.3 to 2). See FERRO-ALLOY.

2. A particular variety of commercial iron; iron that cannot be tempered, as contrasted with *steel.* See above.

With a metallurgist, all metal with an iron base which is forgeable and capable of being tempered is steel; if it cannot be tempered it is simply *iron.* *Fullam-Hart*

3. Strength; power; firmness; inflexibility; as, to rule with a rod of *iron.*

4. Something made of iron; an instrument, utensil, appliance, etc., made of iron; specif.: **a** A branding or cauterizing iron. **b** *pl* Dies used in striking coins. *Obs. Eng.* **c** A harpoon. **d** An iron for smoothing or pressing cloth, clothes, etc.; a flatiron, etc. **e** *Golf.* A golf club with an iron head, of medium depth and loft, used to carry midway in distance between a cleek and a mashie. The various irons used in golf playing are: driving iron, heavy iron, mid-iron (medium iron), light iron. **f** An iron weapon. (1) A sword. *Obs.*

My young soldier, put up your *iron* *Shak.*

(2) A portable firearm; a pistol; — more fully a *shooting iron. Slang.* **g** Allusively, the use of the sword; warfare. **h** *pl.* Iron fetters, chains, or shackles, handcuffs; manacles; — rarely in the *sing.*; also, formerly, *sing.*, bonds; captivity. "Left to rot in *irons.*" *Macaulay.*

Such as sit in darkness and in the shadow of death, bound in affliction and *iron.* *Ps.* cvii. 10.

i A frame similar to a compositor's stick used by type founders in arranging type for package. **j** *Mech.* The cutter in a tool, as in a plane.

in irons, *Naut.*, incapable of coming about or filling away; — said of a sailing vessel when, in tacking, she comes up head to the wind and will not fill away on either tack. — **iron by hydrogen.** *Pharm.* See REDUCED IRON. — **i. in the fire,** a matter requiring attention; occupation or enterprise; affair.

He . . . has a great many *irons* of his own *in the fire.* *H. James.*

i'ron (ī'ŭrn), *a.* [AS. *îren, îsen.* See IRON, *n.*] **1.** Of, or made of, iron; consisting of iron; as, an *iron* bar, dust.

2. Resembling iron in appearance; as, *iron* blackness.

3. Like iron in hardness, strength, impenetrability, power of endurance, insensibility, etc.; as: **a** Very hard or strong (physically). **b** Rude; hard; harsh; severe.

Iron years of wars and dangers. *Rowe.*
Jove crushed the nations with an *iron* rod. *Pope.*

c Firm; robust; enduring; as, an *iron* constitution. **d** Inflexible; unrelenting; as, an *iron* will **e** Not to be broken; holding or binding fast. "Him death's *iron* sleep oppressed" *Philips.* **f** Metallic in tone, harsh. **g** Of or pertaining to the iron age (see AGE, *n.*); degenerate; wicked; as, *iron* times.

iron age. See AGE, *n.*, 7, and *ages in mythology*, under AGE. — **i. alum.** **a** Any alum containing iron as the trivalent constituent, esp. potassium ferric alum, $KFe(SO_4)_2{\cdot}12H_2O$. **b** *Min.* Halotrichite. — **i. black,** a powder consisting of precipitated antimony, used in coating various objects to give them the appearance of polished iron or steel. — **i. buff,** a fast dyestuff composed of hydrated ferric oxide, formed in the fiber by the action of alkalies on iron salts. — **i. carbonate,** *Min.*, siderite. — **I. Chancellor,** Bismarck (1815-98); —alluding to his unbending will. — **I. City,** Pittsburg, Pennsylvania, a city distinguished for its iron manufactures. — **i. clay,** a yellowish clay containing a large proportion of an ore of iron; clay ironstone. — **I. Cross.** See ORDER, 1, *Table.* — **I. Crown.** **a** A golden crown set with jewels, belonging originally to the Lombard kings, and indicating the dominion of Italy. It was so called from containing a circlet of iron said to have been forged from one of the nails in the cross of Christ. **b** See ORDER, 1, *Table.* — **I. Duke,** the Duke of Wellington (1769–1852). — **i. fiddle,** an acoustical instrument of vertical iron rods mounted on a sounding board and of such lengths and diameters that when bowed their vibrations give the tones of the musical scale. — **i. flint,** an opaque, flintlike, ferruginous variety of quartz. — **i. glance,** *Min.*, hematite. — **i. grass.** *Local, Eng.* **a** Knotgrass. **b** Hassock grass (*Deschampsia cæspitosa*). **c** Any of several species of *Carex.* — **i. gum,** *or* **i. gum tree,** a large gum tree (*Eucalyptus raveretiana*) of Queensland, having hard and durable wood. — **i. hand,** the closure. *Polit. Cant, Victoria, Australia. Now Rare.* — **I. Hand,** a surname of Goetz von Berlichingen (1480–1562), a German feudal baron and bold, rough soldier who, at the siege of Landshut, lost his right hand, which was replaced by one of iron, yet shown at Jagsthausen. Goethe has made him the subject of a historical drama. — **i. hat.** **a** A headpiece of iron or steel, shaped like a hat with a broad brim, and used as armor during the Middle Ages. **b** *Mining.* Gossan. — **i. horse,** a locomotive engine; also, a bicycle or tricycle. *Colloq.* — **i. law of wages,** *Pol. Econ.*, the (so-called) law that the natural tendency of wages is to fall to the minimum necessary for bare subsistence. *Colloq.*

The *iron law of wages* is not now accepted . . even as a first approximation to the theory of wages *J. S. Nicholson.*

He (Lassalle) . . dwelt on what he called the *iron* or "brazen *law*" (ehernes Gesetz) *of wages*, already laid down by Turgot and Ricardo, but which he stated in an exaggerated form — namely, that the remuneration of the laborer can never differ much from the minimum regarded in any state of society as necessary for the maintenance of his life and the continuation of his family. *Dict. of Pol. Econ.*

— **i. liquor,** a dark-colored solution of crude acetate of iron, obtained by dissolving scrap iron in pyroligneous acid, and used as a mordant by dyers and calico printers. — **i. loss,** *Elec.*, energy wasted by hysteresis or eddy currents in the iron parts of electromagnetic apparatus. — **I. Maiden of Nuremberg,** a famous instrument of torture preserved in the Castle at Nuremberg, Germany. It is an iron frame in human form contrived to grasp the victim with iron arms and press him against spikes studding the face and bosom. — **I. Mask, Man in the,** *or, short,* **Iron Mask,** a famous prisoner of the Bastille, who always wore a mask of black velvet and who died in 1703. Much legend has grown up about him, and various identifications have been put forth. M. Frantz Funck-Brentano (b. 1862), archivist of the Arsenal Library at Paris, claims to have demonstrated beyond doubt that the prisoner was Count Hercule-Antoine Mattioli (1640–1703), an Italian diplomat, who was imprisoned for treachery. — **i. oak.** **a** Any of several American oaks, as the post oak (*Quercus minor*), the blackjack (*Q. marilandica*), or the maul oak (*Q. chrysolepis*). **b** In Europe, the cerris (*Q. cerris*). — **i. ore,** any native compound of iron from which the metal may be profitably extracted. The principal ores are hematite, limonite, magnetite, siderite, göthite, turgite, and the bog and clay iron ores. — **i. period,** *Archæol.*, the iron age. — **i. putty.** See PUTTY, *n.*, 2 **a.** — **i. pyrites,** *Min.*, common pyrites, or pyrite. See PYRITE. — **i. sand.** **a** Sand consisting largely of an iron ore, usually magnetite. **b** Iron filings used in fireworks. — **i. scale.** *Metal.* See SCALE. — **i. shrub,** the St.-Martin's-herb. — **i. spinel.** *Min.* = HERCYNITE. — **i. stain,** a stain caused by iron rust or some iron preparation, or a stain resembling such a stain. — **i. tree,** any of several unrelated trees with very hard wood, as the West Indian *Ironia ferrea* and the East Indian *Mesua ferrea.*

i'ron (ī'ŭrn), *v. t.; i'RONED* (ī'ŭrnd); *i'RON-ING.* **1.** To furnish, arm, or cover with iron; as, to *iron* a wagon.

2. To shackle with irons; to fetter or handcuff. "*Ironed* like a malefactor." *Scott.*

3. To smooth with an instrument of iron; esp., to smooth or press, as cloth, with or as with a heated flatiron.

to iron out, to smooth with or as with an iron; — as, *to iron out* a shirt; *to iron out* a road with a steam roller.

iron bacteria. Any of various bacteria of the genera *Crenothrix, Leptothrix*, and *Cladothrix*, possessing the power of acting upon iron compounds. Deposits of ocher and bog ore are produced through their agency.

i'ron-bark' (ī'ŭrn-bärk'), *n., or* **ironbark tree.** Any of several Australian eucalypts having hard gray bark and useful timber, as *Eucalyptus sideroxylon, E. paniculata,*

Irischerye. † IRISHRY.
I'rish-ize, *v. t.* To make Irish or like the Irish; to Hibernicize.
I'rish-ly, *adv.* In the style or way of the Irish. *Rare.*
I'rish-man's hur'ri-cane. = PADDY'S HURRICANE.
I'rish-ness, *n.* See -NESS.

iris ornament. = BARTON'S BUTTON.
iris root. Orris root.
irk, *a.* Weary; disgusted; irksome. *Obs.*
dolent; loath. *Obs.*
irk'sum. Irksome. *Ref. Sp.*
irn (*Scot.* ïrn), irne. Obs. or Scot vars of IRON.

Ir'-na'hash (ĭr'nā'hăsh; ĭr'-). *Bib.*
irne. † RUN, YEARN.
ir'nen, *a.* Iron. *Obs.*
I. R. O. *Abbr.* Internal, or Inland, Revenue Office, or Officer.
i'ron. † ERNE.
I'ron (ī'rŏn). *Bib.*

E. siderophloia, *E. resinifera*, etc. The last-named species is the source of Botany Bay kino.

iron blue. **1.** Steel blue (which see).
2. *Angling.* A kind of artificial fly.

i'ron-bound', *a.* Bound with or as with iron; hence: **a** Harsh or rugged; as, an *iron-bound* coast. **b** Bound with irons; shackled, as a prisoner. **c** Rigid, unyielding, rigorous; as, *iron-bound* traditions.

iron cement. A mixture of cast-iron borings or turnings with about one ounce of sal ammoniac for each hundredweight of iron, used damp as a cement for rust joints.

i'ron-clad' (ī'ŭrn-klăd'), *a.* **1.** Clad in iron; protected or covered with iron, as a vessel for naval warfare. Specif.: Designating an electromagnet, or dynamo field magnet, having the entire exterior of iron.
2. Rigorous; severe; exacting; as, an *ironclad* oath. *Colloq.*
ironclad note, *Banking*, a collateral note; — so called from its extreme terms in favor of the lender. *Colloq.* — **i. oath,** specif., *U. S. Hist.*, a rigorous oath of loyalty prescribed by Congress in 1867 to be taken by citizens of the reconstructed States.

i'ron-clad', *n.* **1.** An ironclad or otherwise armored naval vessel. *Hist.*
2. *Metal.* A kind of furnace for roasting mercury ore. *U. S.*
3. A late variety of apple with firm subacid flesh.

i'rone (ī'rōn), *n.* [IRIS + *-one.*] *Org. Chem.* An oily cyclic ketone, $C_{13}H_{20}O$, the odoriferous principle of violet root and probably of violet leaves also. It is isomeric with the artificial perfume called *ionone.*

i'ron-gray', **i'ron-grey'**, *a.* [AS. *īsengrēg.*] Of a gray color, somewhat resembling that of iron freshly broken. — *n.* An iron-gray color; also, a horse of this color.

i'ron-hand'ed, *a.* Having, or acting or governing with, an iron hand; inflexible; rigorous; iron.

i'ron-heart'ed, *a.* Hard-hearted; unfeeling; cruel; as, an *iron-hearted* master. *Cowper.*

i-ron'ic (ī-rŏn'ĭk), *a.* Ironical. *Sir T. Herbert.*

i-ron'i-cal (ī-rŏn'ĭ-kăl), *a.* [LL. *ironicus*, Gr. *εἰρωνικός* dissembling: cf. F. *ironique.* See IRONY.] **1** Pertaining to irony; containing, expressing, or characterized by, irony; as, an *ironical* remark.
2. Addicted to the use of irony; given to irony.
3. Dissembling; pretended. *Obs.*
— **i-ron'i-cal-ly**, *adv.* — **i-ron'i-cal-ness**, *n.*

i'ron-ing (ī'ŭr-nĭng), *n.* **1.** Act or process of smoothing or pressing, as clothes, with hot flatirons.
2. The clothes ironed. *Colloq.*
3. A putting in irons; shackling.
4. Furnishing or arming with iron.

i'ron-man (ī'ŭrn-măn), *or*, esp. in senses under 3, **i'ron-man'** (-măn'), *n.; pl.* **-MEN.** **1.** An iron worker; a maker or manufacturer of iron.
2. *Railroads.* A man who handles the rails in track laying.
3. **a** A self-acting spinning mule. **b** A coal-cutting machine. *Local, Eng.* **c** A kind of iron ore. *Obs. & Local, Eng.* **d** *Glass Manuf.* A mechanical device used in making large sheets of plate glass

i'ron-mas'ter (-măs'tẽr), *n.* One who conducts or manages the founding or manufacture of iron, esp. on an extensive scale; a manufacturer of iron.

iron mold *or* **mould.** **a** A spot on cloth, etc., stained by rusty iron or by ink. **b** A yellow lump of iron ore found in the chalk deposits. *Dial. Eng.*

i'ron-mon'ger (-mŭn'gẽr), *n.* A dealer in iron or hardware. — **i'ron-mon'ger-ing**, *n.* *Both Chiefly British.*

i'ron-mon'ger-y (-ĭ), *n.* *Chiefly British.* **1.** Hardware, a general name for all articles made of iron.
2. The shop or place of business of an ironmonger; a hardware store.
3. Ironmonger's trade or business; smith's work.

iron scrap. **a** Waste pieces or disused articles of wrought iron (*wrought-iron scrap*) suitable for reworking for rolling or forging. **b** Cast iron or castings suitable only for remelting (*cast scrap*, or *foundry scrap*).

i'ron-shot', *a.* *Min.* Shot with iron; having markings due to iron.

i'ron-side' (ī'ŭrn-sīd'), *n.* **1.** A man of great strength or bravery; specif. [*cap.*], *Eng. Hist.*: **a** Edmund II. (981?–1016), a Saxon king (1016). **b** Also *Ironsides* (construed as *sing.*). Oliver Cromwell (1599–1658).
2. [*cap.*] **a** *pl.* Cromwell's cavalry in the English Civil War; hence, any of various other bodies of hardy veteran troops. **b** *sing.* A member of Cromwell's cavalry or a similar force, or a soldier of that type. *Rare.*
3. (in form *ironsides*, but construed as *sing.*) *Nav.* An ironclad; as, "Old *Ironsides*" (which see).

i'ron-smith' (-smĭth'), *n.* **1.** An ironworker; a blacksmith.
2. Any of several East Indian barbets, as *Cyanops faber.* Their notes resemble the sounds made by a blacksmith.

i'ron-stone' (-stōn'), *n.* **1.** Any hard, earthy ore of iron; — in coal regions, generally siderite; in other regions, commonly hematite or limonite.
2. Short for IRONSTONE CHINA.

ironstone china. A hard white pottery, first made in England during the 18th century.

i'ron-ware' (ī'ŭrn-wâr'), *n.* Articles made of iron, as household utensils, tools, and the like; hardware.

i'ron-weed' (-wēd'), *n.* **a** In Great Britain, the knapweed. **b** In the United States, any asteraceous plant of the genus *Vernonia*, esp. *V. noveboracensis*, a northeastern species with flat-topped clusters of purple-rayed flower heads.

i'ron-wood' (ī'ŭrn-wŏŏd'), *n.* Any tree with unusually hard, strong, or heavy wood; also, the wood itself. The name is applied locally to a wide variety of trees; the following list includes the most important species (for further information see the generic names): **a** In general, species of *Sideroxylon* and *Diospyros.* **b** United States: *Carpinus caroliniana*, *Ostrya virginica*, *Lyonothamnus floribundus*, *Prosopis glandulosa*, *Olneya tesota*, *Cyrilla racemiflora*, *Clyfonia monophylla*, *Condalia ferrea*, *Reynosia latifolia*, *Bumelia lycioides*, and *B. tenax.* **c** West Indies: *Erythea paniculata*, *Trichilia hirta*, *Guaiacum sanctum*, *Sloanea jamaicensis*, species of *Erythroxylum.* **d** Africa: *Toddalia lanceolata* and species of *Olea.* **e** India: *Xylia xylocarpa*, *Mesua ferrea*, species of *Inga.* **f** China: *Metrosideros vera.* **g** Australia: *Tarrietia actinophylla*, *Notelæa ligustrina*, and various ironbarks (*Eucalyptus*).
ironwood of Burma *or* **Pegu,** acle.

i'ron-work' (-wŭrk'), *n.* **1.** Work in iron; anything made of iron, a general name of such parts of a building, vessel, etc., as consist of iron; iron articles collectively.
2. Now only in *pl.* (sometimes construed as a *sing.*). A furnace where iron is smelted, or a forge, rolling mill, or foundry, where it is made into heavy work, such as shafting, rails, cannon, merchant bar, etc.

i'ron-work'er (-wŭr'kẽr), *n.* A worker in iron; a person employed at ironworks. — **i'ron-work'ing**, *p. a.*

i'ron-wort' (-wŭrt'), *n.* **a** Any European mint of the genus *Sideritis*, supposed to heal sword cuts. **b** The hedge nettle.

i'ron-y (ī'ŭr-nĭ), *a.* [From IRON.] **1.** Made or consisting of iron; containing, or abounding in, iron; partaking of iron; iron; as, *irony* chains; *irony* particles.
2. Resembling iron in taste, hardness, or other physical property.

i'ro-ny (ī'rŏ-nĭ), *n.* [L. *ironia*, Gr. *εἰρωνεία* dissimulation, fr. *εἴρων* a dissembler in speech: cf. F. *ironie.*] **1.** Dissimulation; ignorance or the like feigned to confound or provoke an antagonist; — an etymological sense, used chiefly in *Socratic irony* (which see).
2. **a** A sort of humor, ridicule, or light sarcasm, which adopts a mode of speech the intended implication of which is the opposite of the literal sense of the words, as when expressions of praise are used where blame is meant; also, the figure of speech using this mode of expression. **b** An ironical utterance or expression.
3. A state of affairs or events which is the reverse of what was, or was to be, expected; a result opposite to and as if in mockery of the promised or appropriate result; as, the *irony* of fate.

Syn. — IRONY, SARCASM, SATIRE. The distinguishing quality of IRONY is that the meaning intended is contrary to that seemingly expressed; one says one thing and means the opposite. *Irony* may be gentle or cutting. It often implies an attitude of unemotional detachment. The word is frequently used fig. to suggest the mocking discrepancy between promise and fulfillment, or between appearance and reality; its application to the drama is exemplified below; as, "Sometimes I would . . . call her sweet, as if in *irony*; and call her hard and cold, which seemed a truth" (*Tennyson*); "She had a reputation for wit — a wit that never hurt, and *irony* that was only whimsical" (*Sir G. Parker*); "substituting for the feeling which makes men earnest the *irony* which leaves them free" (*Mrs. Humphry Ward*); "As if by a strange *irony*, it was to this very want of sympathy that she owed some of the grander features of her character" (*J. R. Green*); "that disproportion of things which Shelley has illuminated by the *ironical* flash of these eight words: The desire of the moth for the star" (*Stevenson*); "I refer to *irony* on the part of the author himself, to *ironical* juxtapositions of persons and events, and especially to the 'Sophoclean *irony*' by which a speaker is made to use words bearing to the audience, in addition to his own meaning, a further and ominous sense, hidden from himself, and, usually, from the other persons on the stage" (*A. C. Bradley*). The essential quality of SARCASM is bitterness or taunting reproachfulness; it may or may not be ironical, but it is always cutting or ill-natured (as irony need not be); as, "In the intercourse of familiar life, he [Swift] indulged his disposition to petulance and *sarcasm*" (*Johnson*); "Mr. Bennet was . . . a mixture of quick parts, *sarcastic* humor, reserve, and caprice" (*Jane Austen*). SATIRE is a (commonly) formal or elaborate holding up of (esp. public) vice or folly, always as colored or pervaded by the satirist's feeling, to ridicule or reprobation; it often makes use of irony, but is not necessarily ironical; as, "*Satire* · a sharp, well-mannered way of laughing a folly out of countenance" (*Dryden*); Juvenal's relentless *satire.* See SARCASTIC, BANTER, RIDICULE; cf. CARICATURE.

Ir'o-quoi'an (ĭr'ō-kwoi'ăn), *a.* Of, pertaining to, or designating, one of the principal linguistic stocks of the North American Indians. The territory of the northern Iroquoian tribes, of whom the Five Nations, or Iroquois proper, were the chief, extended from the shores of the St. Lawrence and of Lakes Huron, Ontario, and Erie south, through eastern Pennsylvania, to Maryland; that of the southern tribes, of whom the Cherokees were chief, formed part of Virginia, the Carolinas, Georgia, Tennessee, and Kentucky. All of the tribes were agricultural, and they were noted for large communal houses, palisaded towns, and ability to organize, as well as for skill in war. The principal tribes comprise the Cayuga, Cherokee, Conestoga, Erie, Mohawk, Neuter, Nottoway, Oneida, Onondaga, Seneca, Tionontati, Tuscarora, and Wyandot or Huron. See IROQUOIS. — *n.* An Indian of an Iroquoian tribe.

Ir'o-quois' (ĭr'ō-kwoi'), *n. sing. & pl.* [F., fr. a native name] An Indian of a powerful and warlike confederacy of tribes, formerly inhabiting central New York and known as the Five Nations. The original tribes of the league were the Mohawk, Oneida, Onondaga, Cayuga, and Seneca; later the Tuscarora were admitted. This confederacy took a prominent part in both the wars with the French and the Revolution, in each case siding with the English. They also conquered many Indian tribes, extending their expeditions as far west as the Mississippi. After the Revolution many of them removed to Canada, where more than half still reside. In the United States the largest bodies are found in New York and in Wisconsin.

ir-ra'di-ance (ĭ-rā'dĭ-ăns), *n.* [From IRRADIANT.] **1.** Act of irradiating; emission of rays of light.
2. That which irradiates or is irradiated; luster; splendor; irradiation; brilliancy. *Milton.*

ir-ra'di-an-cy (-ăn-sĭ), *n.; pl.* **-CIES** (-sĭz). Quality, state, or fact, of being irradiant.

ir-ra'di-ant (-ănt), *a.* [L. *irradians, -antis*, p. pr. See IRRADIATE.] Irradiating or illuminating; emitting rays of light; as, the *irradiant* moon. *Boyse.*

ir-ra'di-ate (-āt), *v. t.; -AT'ED* (-āt'ĕd); *-AT'ING* (-ā'tĭng). [L. *irradiatus*, p. p. of *irradiare* to irradiate. See IN- in; RADIATE.] **1.** To throw rays of light upon; to shine upon; to illuminate; to brighten; to adorn with luster.

Thy smile *irradiates* yon blue fields. *Sir W. Jones.*

2. To enlighten intellectually or spiritually; to illuminate; as, to *irradiate* the mind. *Bp. Bull.*
3. To affect by or as by heat or other radiant force. *Obs.*

2. That which is irradiated; a ray of light.
3. FIG.: Mental light or illumination.
4. *Physiol. & Optics.* The apparent enlargement of a bright object seen upon a dark ground, due to stimulation by the bright light of the portions of the retina around the image. The term is extended to other cases of diffusion of nerve stimuli or impulses from their normal path.
5. Emission of heat rays; radiation of heat.
6. In general, emanation, emission, or radiation, as of knowledge, or, *Obs.*, of a supposed influence or immaterial fluid from the eyes.

ir-ra'di-a-tive (ĭ-rā'dĭ-ā-tĭv), *a.* Tending to irradiate.

ir-ra'tion-al (ĭ-răsh'ŭn-ăl), *a.* [L. *irrationalis*: cf. F. *irrationnel.* See IN- not; RATIONAL.] Not rational; specif.: **a** Not endowed with reason; void of understanding; as, brutes are *irrational* animals. **b** Not according to reason; unreasonable; absurd; foolish.

It seemed utterly *irrational* any longer to maintain it. *I. Taylor*

c *Math.* Not exactly expressible by an integer nor by a vulgar fraction; surd; — said esp. of roots. See SURD; CUT, *n.*, 19. **d** *Gr. & Lat. Pros.* Not preserving the normal ratio between arsis and thesis (see RATIONAL); — applied to (1) a long syllable used where the normal measure calls for a short; as, the *irrational* spondee is marked –> when it replaces a trochee, <– when it replaces an iambus, or (2) a foot containing such a syllable. See *Optics.* Producing irregular dispersion, as a prism. See DISPERSION, 2.

Syn. — Absurd, foolish, preposterous, ridiculous; immoderate, exorbitant, excessive, extravagant — IRRATIONAL, UNREASONABLE. That is IRRATIONAL which is contrary to reason, regarded as a faculty of the mind, and which is therefore foolish or absurd; that is UNREASONABLE which is not in accordance with reason, in its relation to practical affairs, and which is accordingly extravagant, excessive, or immoderate, as, a panic and *irrational* fear, obstinate and *unreasonable* pertinacity; the *irrational* utterances of delirium, the *unreasonable* demands of a spoiled child. See RATIONAL, FOOLISH, LAUGHABLE.

irrational number. *Math.* **a** A number perfectly definite but not expressible in a closed form, as by a terminating decimal; thus, $\sqrt{2} = 1.4142\ldots$, the perimetric ratio (of a circle to its diameter), $\pi = 3.14159\ldots$. **b** One defined by a cut (C, C') in which C has no last and C' no first element. See CUT, *n.*, 19.

ir-ra'tion-al, *n.* **1.** An irrational being; a being not acting according to reason.
2. *Math.* An irrational quantity or number; a surd. Irrationals are exactly definable, and calculable to any degree of exactness, thorugh continued fractions or indeterminate decimals.

ir-ra'tion-al-ism (-ĭz'm), *n.* An irrational system of belief or action; quality of being irrational; irrationality. — **ir-ra'tion-al-ist**, *n.*

ir-ra'tion-al'i-ty (-ăl'ĭ-tĭ), *n.; pl.* **-TIES** (-tĭz). Quality or state of being irrational; specif.: **a** Quality of not being endowed with reason. **b** Quality of not being according to reason; unreasonableness; absurdity; foolishness; also, that which is irrational; an absurdity. **c** *Physics.* Inequality of dispersion of colors in refraction spectra given by different substances, as crown and flint glass.
irrationality of dispersion. *Optics.* See DISPERSION, 2.

ir-rec'og-ni'tion (ĭ-rĕk'ŏg-nĭsh'ŭn), *n.* A failure to recognize; absence of recognition.

ir-rec'on-cil'a-bil'i-ty (ĭ-rĕk'ŭn-sīl'ă-bĭl'ĭ-tĭ), *n.* Quality or state of being irreconcilable; irreconcilableness.

ir-rec'on-cil'a-ble (ĭ-rĕk'ŭn-sīl'ă-b'l; ĭ-rĕk'ŭn-sīl'ă-b'l; 277), *a.* **1.** Not reconcilable; implacable, incompatible, inconsistent, as, *irreconcilable* enemies, statements.

Syn.—Fret, inflame, excite, vex, anger, enrage, chafe, gall, tease, pique, sting, ruffle.—IRRITATE, EXASPERATE, NETTLE, PROVOKE, INCENSE. To IRRITATE is to excite to momentary impatience or anger; to NETTLE is to irritate in such a way as to cause pique; EXASPERATE commonly implies bitter or intense irritation, as at something unendurable; the word sometimes expresses keen vexation or annoyance, as, "I was indeed greatly *irritated* at the bishop's having suggested any grounds of suspicion . . . against a person whom he had never seen" (*De Quincey*); "It simply astounds and *irritates* the hearer by contradicting without a word of proof or preparation his fixed and familiar notions" (*M. Arnold*); "To take the widow *exasperates*, makes mad, her sister" (*Shak.*); "You know my hasty temper, and should not *exasperate* it" (*Goldsmith*), "Sometimes, when her uncle's easy way of taking things did not happen to be *exasperating*, it was rather soothing" (*G. Eliot*); "[This] . . . must be very *provoking* to the dignity of some dissenting doctors; and to *nettle* them still more, you in a manner impose upon them the necessity of being silent" (*Cowper*); "No man thoroughly *nettled* can say a thing general enough to pass off with the air of an opinion declared and not a passion gratified" (*Taller*); "*nettled* at this neglect" (*De Quincey*). To PROVOKE, as here compared, is to awaken strong annoyance or vexation, or (esp. in the form *provoking*) to tease or tantalize; INCENSE implies quick-flaming or slow-burning anger or irritation; as, "After supper, Dr. Johnson turned the discourse upon silent folks—whether by way of reflection and reproof, or by accident, I know not; but I do know he is *provoked* with me for not talking more" (*Mad. D'Arblay*); "a *provoking* little inward laugh" (*G. Eliot*); "Your spirits kindle to a flame, moved with the slightest touch of blame . . . conviction does but more *incense*" (*Swift*); "Apollo, *incensed* at the insults his priests had sustained" (*Goldsmith*). See HARASS, ACRIMONY, ANGER, IMPATIENT.

i'so-bar-ism (ī'sō-bär-ĭz'm ; ī-sŏb'ȧ-rĭz'm), *n.* Equality of weight or pressure.
i'so-base (ī'sō-bās), *n.* [*iso-* + Gr. *βάσις* step.] *Geol.* An imaginary line, or a line on a map or chart, passing through all points which have been elevated to the same extent, since some specified time, e. g., since the glacial period ; a contour of deformation.
i'so-bath'y-therm (-băth'ĭ-thûrm), *n.* [*iso-* + *bathy-* + Gr. *θέρμη* heat.] *Phys. Geog.* A line connecting points on the earth's surface where a certain temperature is found at the same depth. — **i'so-bath'y-ther'mal** (-thûr'-măl), **i'so-bath'y-ther'mic** (-mĭk), *a.*
i'so-bi-lat'er-al (-bī-lăt'ĕr-ăl), *a.* [*iso-* + *bilateral.*] *Bot.* Designating organs, as the leaves of *Iris,* in which there is no distinction between the surfaces ; — opposed to *dorsiventral.*
i'so-bront (ī'sō-brŏnt) } *n.* [*iso-* + Gr. *βροντή* thunder.]
i'so-bron'ton (-brŏn'tŏn) } *Meteor.* An imaginary line, or a line on a chart, marking the simultaneous development of a thunderstorm, as noted by observing the time when the thunder is heard at different places.
i'so-car'di-a (-kar'dĭ-ȧ), *n.* [NL. ; *iso-* + Gr. *καρδία* heart.] *Zool.* A genus of lamellibranch mollusks of the family Cyprinidæ, having a heart-shaped shell with well-separated and spirally coiled umbones. It is by some regarded as the type of a distinct family, **I'so-car-di'i-dæ** (-kär-dĭ'ĭ-dē).
i'so-car'pic (-kär'pĭk) } *a.* [*iso-* + *-carpic, -carpous.*] *Bot.*
i'so-car'pous (-pŭs) } Having carpels equaling the perianth divisions in number, as in the Ericaceæ.
i'so-ce-phal'ic (-sē-făl'ĭk) } *a.* [Gr. *ἰσοκέφαλος* like-
i'so-ceph'a-lous (-sĕf'ȧ-lŭs) } headed. See ISO- ; CEPHALON.] *Art.* Having the heads of the principal figures (whether seated, standing, or mounted) arranged in one horizontal line or nearly so, — said esp. of a bas-relief.
— **i'so-ceph'a-lism** (-sĕf'ȧ-lĭz'm), *n.* — **i'so-ceph'a-ly** (-lĭ), *n.*

Isocephalous Relief from the Parthenon.

i'so-chasm (ī'sō-kăz'm), *n.* [*iso-* + *chasm.*] An imaginary line connecting places on the earth's surface at which there is the same mean frequency of auroras. —
i'so-chas'mic (-kăz'mĭk), *a.*
i'so-cheim (ī'sō-kīm), *n.* [*iso-* + Gr. *χεῖμα* winter.] *Phys. Geog.* An imaginary line connecting places on the earth having the same mean winter temperature. Cf. ISOTHERE. — **i'so-chei'mal** (-kī'măl), **i'so-chei'me-nal** (-kī'mē-năl), **i'so-chei'mic** (-kī'mĭk), *a.*
i'so-chlor' (ī'sō-klōr'), *a.* [*iso-* + *chlorine.*] *Sanitary Chem.* Of or pert. to the same amount of chlorine ; — applied to imaginary lines each joining the points of a region at which the surface water normally contains the same amount of chlorine in the form of chlorides. — *n.* An isochlor line. Such lines are roughly parallel to the seacoast.
i'so-cho-les'ter-in (-kō-lĕs'tĕr-ĭn) } *n.* [See ISO- ; CHOLES-
i'so-cho-les'ter-ol (-ōl ; -ŏl) } TERIN.] *Chem.* An isomer of ordinary cholesterin, found esp. in lanolin, or wool fat. It melts at 138° C. ; cholesterin melts at 145° C.
i'so-chor (-kôr), *n.* [*iso-* + Gr. *χώρα* space.] *Physics.* A line upon a thermodynamic diagram so drawn as to represent the pressures corresponding to changes of temperature when the volume of the gas operated on is constant. — **i'so-chor'ic** (-kôr'ĭk), *a.*
i'so-chro-mat'ic (-krō-măt'ĭk), *a.* [*iso-* + *chromatic*] **1.** *Optics.* Of the same color ; — said of lines or curves of the same tint in the interference figures of biaxial crystals.
2. *Photog.* = ORTHOCHROMATIC.
i-soch'ro-nal (ĭ-sŏk'rō-năl), *a.* [See ISOCHRONOUS.] Uniform in time, of equal time ; performed in equal times ; recurring at regular intervals ; as, *isochronal* oscillations. — **i-soch'ro-nal-ly,** *adv.* — **i-soch'ro-nism** (-nĭz'm), *n.*
i-soch'ro-nize (-nīz), *v. t.* ; -NIZED (-nīzd) ; -NIZ'ING (-nīz'ĭng). [See ISOCHRONOUS.] To render isochronal.
i-soch'ro-non (-nŏn), *n.* [NL. See ISOCHRONOUS.] A clock that is designed to keep very accurate time.
i-soch'ro-nous (-nŭs), *a.* [Gr. *ἰσόχρονος* ; *ἴσος* equal + *χρόνος* time.] Uniform in time, isochronal. — **isochronous governor,** *Mach.,* a governor having the same height for every position of the balls, that is, having but one speed consistent with stability. — **i-soch'ro-nous-ly,** *adv.*
i-soch'ro-us (-ŭs), *a.* [*iso-* + Gr. *χρόα* color.] Of the same tint or color throughout.
i'so-cli'nal (ī'sō-klī'năl), *a.* [*iso-* + Gr. *κλίνειν* to incline.] Of, pert. to, having, or indicating, equality of inclination or dip ; as, *isoclinal* lines. — *n.* An isoclinal line.
isoclinal lines, lines joining points on the earth's surface at which a dipping needle has the same inclination to the plumb line.
i'so-cline (ī'sō-klīn), *n.* [See ISOCLINAL.] *Geol.* An anticline or syncline so closely folded that the rock beds of the two sides or limbs have the same dip.
i'so-co'ri-a (-kō'rĭ-ȧ ; 201), *n.* [NL. ; *iso-* + Gr. *κόρη* pupil.] *Med.* The condition of having the pupils of the two eyes of the same size.
i-soc'ra-cy (ĭ-sŏk'rȧ-sĭ), *n.* [Gr. *ἰσοκρατία* ; *ἴσος* equal + *κρατεῖν* to be strong, to rule, *κράτος* strength.] Equal power or rule ; a system of government in which all have equal political power. — **i'so-crat** (ī'sō-krăt), *n.* — **i'so-crat'ic** (-krăt'ĭk), *a.*
i'so-cro-ton'ic (-krō-tŏn'ĭk), *a.* [*iso-* + *crotonic.*] *Chem.* Designating, or pert. to, a liquid acid, $C_3H_5{\cdot}CO_2H$, variously formed, as in wood vinegar. It is isomeric with crotonic acid, and convertible into it by heat.
i'so-cry'mal (-krī'măl), *a.* *Phys. Geog.* Designating, or

Is'lam-it'ish (ĭs'lȧm-ĭ-ĭt'ĭsh ; ĭz'-), *a.* See -ISH.
Island City. Montreal, which is on an island ; — a nickname.
island continent. An island as large, or nearly as large, as a continent, as Australia.
island gems. *Gr. Archæol.* The gems, later than the Mycenæan gems, made on the islands of the Ægean.
island hen. A peculiar flightless gallinule (*Porphyrionis nesiotis*) inhabiting Tristan da Cunha.
is'land-hood. *n.* See -HOOD.
is-lan'dic (ĭs-lăn'dĭk), *a.* Of or pertaining to an island. *Rare.*
Is-lan'dic. Var. of ICELANDIC.

pertaining to, a line connecting points on the earth's surface having the same mean temperature for a specified coldest period of the year. — *n.* An isocrymal line.

i'so-cryme (ī'sō-krīm), *n.* [*iso-* + Gr. κρυμός cold.] An isocrymal line.

i'so-cy'a-nate (-sī'ă-nāt), *n. Chem.* A salt or ester of isocyanic acid. The esters are colorless, volatile liquids of suffocating odor, yielding amines when warmed with alkalies.

i'so-cy-an'ic (-sī-ăn'ĭk), *a.* [*iso-* + *cyanic.*] *Chem.* Designating, or pertaining to, a hypothetical acid, CO.NH (called also *carbimide*), isomeric with cyanic acid, and known in the form of its esters. See ISOCYANATE.

i'so-cy'a-nide (-sī'ă-nīd ; -nĭd ; 184), *n.* Also **-nid.** [*iso-* + *cyanide.*] *Chem.* Any of a series of compounds isomeric with the cyanides. See CARBAMINE.

i'so-dac'ty-lous (-dăk'tĭ-lŭs), *a.* [*iso-* + *-dactylous.*] *Zool.* Having the digits or toes similar or equal in length.

i'so-di'a-bat'ic (-dī'ă-băt'ĭk), *a.* [*iso-* + Gr. διαβατικός able to pass through.] *Physics.* Pertaining to the equal transmission of heat to or from a substance. Two lines or curves representing variations in the pressure and density of a fluid are said to be *isodiabatic* with respect to each other when the transmission of heat during any stage represented on one is equal to that during the corresponding stage on the other.

i'so-di'a-met'ric (-mĕt'rĭk), *a.* [*iso-* + *diametric.*] **1.** *Cryst.* Having, or pertaining to, equal lateral axes; — said of tetragonal and hexagonal crystals.

2. *Bot.* Having the diameters equal; of equal dimensions, as the cells of ordinary parenchymatous tissue.

i-sod'i-con (ī-sŏd'ĭ-kŏn), *n. ; pl.* **-icA** (-kă). Also **ei-sod'i-con.** [NL., *ir.* LGr. *εισοδικον*, fr. Gr. εἴσοδος entrance ; εἰς into + ὁδός way.] *East. Ch.* The short anthem sung when the priest enters the church with the evangelistary.

i'so-di-mor'phism (ī'sō-dī-môr'fĭz'm), *n.* [*iso-* + *dimorphism.*] *Min.* Isomorphism between the two forms, severally, of two dimorphous substances. Thus, iron sulphide and cobalt arsenide are both dimorphous, and each form of one is isomorphous with a form of the other, pyrite with smaltite, and marcasite with safflorite. — **i'so-di-mor'phic** (-fĭk), **i'so-di-mor'phous** (-fŭs), *a.*

i-sod'o-mum (ī-sŏd'ō-mŭm), *n.* Also **-mon** (-mŏn). [L., fr. Gr. *ισόδομον*, neut. adj.; ἴσος equal + δόμος a course in a building.] *Anc. Gr. Arch.* A variety of masonry in which blocks of equal length and thickness are laid in courses so that each vertical joint of a course comes over the middle of a block just below. — **i-sod'o-mous** (-mŭs), *a.*

i'so-dont (ī'sō-dŏnt), *a.* [*iso-* + *-odont.*] *Zool.* Having the teeth all alike.

i'so-drome (-drōm), *n.* [*iso-* + *-drome.*] *Nav.* A certain method of moving a fleet from one formation to another, the direction usually being changed eight points (90°), by means of paths of equal length for each ship. It is prohibited in the United States navy as dangerous.

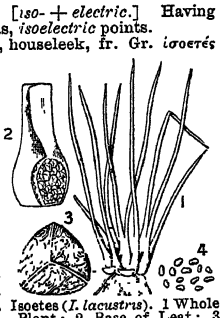
i'so-dy-na'mi-a (-dī-nā'mĭ-*a*), *n.* [NL ; *iso-* + Gr. δύναμις power.] State of being of equal strength or power.

i'so-dy-nam'ic (-dī-năm'ĭk) } *a.* Of, pert. to, having, or
i'so-dy-nam'i-cal (-ĭ-kăl) } denoting, equality of force. Isodynamic equivalent, *Physiol.*, in dietetics, the ratio of the combustion equivalents of fats and carbohydrates, that is, the ratio of interchange between these two classes of foodstuffs. Thus, 1 gram of fat is the *isodynamic equivalent* of 2.2 grams of carbohydrates. — **i. foods,** *Physiol.*, those foods that produce a similar amount of heat. — **i. lines,** *Magnetism*, lines connecting points on the earth's surface at which the magnetic intensity is the same.

i'so-dy'na-mous (-dī'nă-mŭs, -dĭn'ă-mŭs), *a.* [Gr. ἰσοδύναμος. See ISODYNAMIA.] **a** Of equal force or size. **b** Specif.: *Bot.* Isobrious.

i'so-e-lec'tric (-ē-lĕk'trĭk), *a.* [*iso-* + *electric.*] Having the same electric potential ; as, *isoelectric* points.

I-so'e-tes (ī-sō'ē-tēz), *n.* [L., houseleek, fr. Gr. ἰσοετές an evergreen plant, prop. neut. of *ἰσοετής* equal in years ; ἴσος equal + ἔτος year.] *Bot.* A large and widely distributed genus of plants, the quillworts, constituting a distinct family (**I'so-e-ta'ce-æ** [ī'sō-ē-tā'sē-ē]) and order (**I'so-e-ta'les** [-ē-tā'lēz]) of fern allies. They are aquatic or marsh plants with a short buried lobed stem (called a *trunk*) which sends up a tuft of quill-shaped leaves bearing the sporangia in their axils. The sporangia are of two kinds, some containing microspores, others megaspores, so that the prothallia are bisexual. Also [*l. c.*], a plant of this genus.



Isoetes (*I. lacustris*). 1 Whole Plant ; 2 Base of Leaf ; 3 Megaspore ; 4 Microspores.

i'so-ga-mete' (ī'sō-gă-mēt'), *n.* [*iso-* + *gamete.*] *Biol.* A gamete of a type not exhibiting sexual or other differentiations ; specif., *Bot.*, a planogamete.

i-sog'a-mous (ī-sŏg'ă-mŭs), *a.* [*iso-* + *-gamous.*] *Biol.* Reproducing through the conjugation of similar gametes. Cf. HETEROGAMOUS, 1 **a**, OOGAMOUS. — **i-sog'a-my** (-mĭ'), *n.*

i'so-gen (ī'sō-jĕn), *n.* [*iso-* + *-gen.*] **1.** *Biol.* An isogenous structure.

2. *Geom.* A figure having equal angles.

i'so-ge-net'ic (-jē-nĕt'ĭk), *a.* Lit., having the same or a similar origin; — only in **isogenetic induction,** *Plant Physiol.*, simple (as distinguished from *complex*) stimulation.

i-sog'e-nous (ī-sŏj'ē-nŭs), *a.* [*iso-* + *-genous.*] *Biol.* Having the same origin. — **i-sog'e-ny** (-nĭ'), *n.*

i'so-ge'o-therm (ī'sō-jē'ō-thûrm), *n.* [*iso-* + *geo-* + Gr. θέρμη heat.] *Geol.* A line or curved surface beneath the earth's surface through points having the same mean temperature. — **i'so-ge'o-ther'mal** (-thûr'măl), **i'so-ge'o-ther'mic** (-mĭk), *a.*

i'so-grom'ic (-krĭm'ĭk), *a.* Isocrymal [fulminurate

i'so-cy'an-u-rate, *n. Chem.* A

i'so-cy'a-nu'ric, *a.* [*iso-* + *cyanuric.*] *Chem.* = FULMINURIC.

F. *isomérique.*] **1.** *Chem.* Composed of the same elements united in the same proportion by weight, but differing in one or more properties owing to difference in structure, — specifically (and usually) applied to compounds having the same molecular weight, as distinguished from *polymeric* (which see). Cf. METAMERIC, ALLOTROPY. Acetylene, C_2H_2, and benzene, C_6H_6, are composed of carbon and hydrogen in the same proportion, but the molecular weight of the latter, as shown by the vapor densities, is three times that of acetylene ; they are *polymeric.* Butane and isobutane, however, both have the same formula, C_4H_{10}, the difference here being solely in the arrangement of the atoms in the molecule, as shown in the expanded formulas $CH_3{\cdot}CH_2{\cdot}CH_2{\cdot}CH_3$ (normal butane) and $CH_3{\cdot}CH(CH_3)$ (isobutane). They are *isomeric* (in the specific sense). Isomerism is common among organic compounds. That shown by butanes, in which the "skeletons" of the two compounds differ, is called **chain.** or **nucleus, isomerism,** as distinguished from **place.** or **position, isomerism.** The latter results when a substituting atom or group takes different positions, as seen in the two propyl alcohols, $CH_3{\cdot}CH_2{\cdot}CH_2OH$ and $CH_3{\cdot}CHOH{\cdot}CH_3$. Many cases of isomerism are not explained by ordinary structural formulas. In spatial isomerism, or *stereoisomerism*, the isomers contain like atoms joined in the same order but having different relations in space. Here is included **optical isomerism** (so called because the two isomers act differently on polarized light ; see *asymmetric carbon atom*, under ASYMMETRIC, and TARTARIC ACID), *alloisomerism* (which see), and a kind of isomerism shown by certain nitrogen compounds (see BENZALDOXIME). Isomerism due to different modes of arrangement of like molecules, resulting in differences in physical properties, is called **physical isomerism** ; calcite and aragonite perhaps furnish examples. Isomerism in which the isomers change into each other more or less readily is called **dynamic,** or **equilibrium, isomerism** ; it has also been called **tautomerism, desmotropism, merotropism,** etc. Some limit *desmotropism* to cases in which the isomers are easily interconvertible, and apply *tautomerism* to cases in which desmotropism is a possibility not yet realized. When two desmotropic forms exist together in equilibrium the phenomenon is called **allelotropism,** and they constitute an *allelotropic mixture.* If the equilibrium is such that one of the forms is present to a vanishing extent the form is called the **pseudo form,** and the phenomenon is called **pseudomerism.**

2. *Zoöl.* Pertaining to, or of the nature of, an isomere.

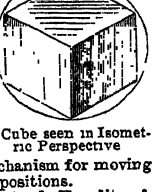
3. *Bot.* = ISOMEROUS **a.**

i'so-mer'i-cal (ī'sō-mĕr'ĭ-kăl), *a.* Isomeric.

i'som'er-ism (ī-sŏm'ĕr-Iz'm), *n. Chem.* State, quality, or relation, of being isomeric. See ISOMERIC.

i-som'er-ous (-ŭs), *a.* [*iso-* + *-merous.*] Having an equal number of parts, ridges, markings, etc., specif. : **a** *Bot.* Having the members of each floral whorl equal in number. Cf. HETEROMEROUS, 2 **a.** **b** *Anat.* Having an equal number of ridges ; — said of the successive molar teeth in the case of certain mammals. **c** *Chem.* = ISOMERIC. **d** *Zoöl.* Pertaining to, or having the leg structure of, the Isomera.

i'so-met'ric (ī'sō-mĕt'rĭk) } *a.* [*iso-* + Gr. μέτρον meas-
i'so-met'ri-cal (-rĭ-kăl) } ure.] Pert. to, or characterized by, equality of measure. Specif.: *Cryst.* Pert. to or designating that system of crystallization in which the three axes are of equal length and at right angles to each other ; monometric ; regular, cubic. Cf. CRYSTALLIZATION. **isometric contraction,** *Physiol*, the contraction of a muscle against a large resistance, as a strong spring, which permits the muscle to shorten very little. The resultant curve is known as an *isometric curve.* — **i. line,** *Thermodyn.*, a line of equal volumes in a pressure-volume diagram. Cf. ISOPIESTIC, *n.* — **i. perspective** *or* **projection,** orthogonal projection on a plane equally inclined to three principal axes of an object, so that lengths parallel to these are represented proportionally. It is used in mechanical sketches to show proportions, etc.



Cube seen in Isometric Perspective

i'so-met'ric, *n. Thermodynamics.* An isometric line.

i'so-met'ri-cal-ly, *adv.* In an isometric manner ; by isometric projection.

i'so-met'ro-graph (-trō-grăf), *n.* [*iso-* + Gr. μέτρον measure + *-graph.*] A device for ruling equidistant parallel lines, consisting essentially of a mechanism for moving a straightedge into successive parallel positions.

i-som'e-try (ī-sŏm'ĕ-trĭ), *n.* [*iso-* + *-metry.*] Equality of, or in respect of, measure ; specif.: **a** *Geog.* Equality of elevation ; as, the *isometry* of Alpine summits. **b** The relation of corresponding figures in isometric projection.

i-sog'o-nal (ī-sŏg'ō-năl), *a.* [See ISOGONIC] Having equal angles ; isogonic. — **isogonal transformation,** *Geom.*, a transformation in which angles are conserved, as any transformation by aid of a function of a complex variable.

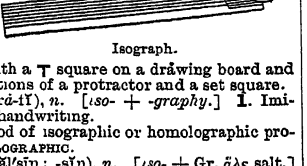
i'so-gon'ic (ī'sō-gŏn'ĭk), *a.* [*iso-* + Gr. γωνία angle.] Pertaining to, or noting, equal angles.

isogonic lines, *Magnetism*, imaginary lines joining places on the earth's surface at which the variation of the magnetic needle from the meridian or true north is the same.

i'so-gon'ic, *n.* An isogonic line.

i'so-go'ni-o-stat' (-gō'nĭ-ō-stăt'), *n.* [Gr. ἰσογωνιος isogonic + ἱστάναι to make to stand.] *Physics.* A device for maintaining a train of prisms automatically in the position of minimum deviation.

i'so-graph (ī'sō-graf), *n.* [*iso-* + *-graph.*] An instrument consisting of two short straightedges connected by a large circular joint marked with angular degrees, used with a T square on a drawing board and combining the functions of a protractor and a set square.



Isograph.

i-sog'ra-phy (ī-sŏg'ră-fĭ), *n.* [*iso-* + *-graphy.*] **1.** Imitation of another's handwriting.

2. The art or method of isographic or homolographic projection. See HOMOLOGRAPHIC.

i'so-hal'sine (ī'sō-hăl'sĭn ; -sīn), *n.* [*iso-* + Gr. ἅλς salt.] An imaginary line or surface connecting points of equal salinity in the ocean.

i'so-hy'dric (-hī'drĭk), *a.* [*iso-* + 2d *hydro-* + *-ic.*] *Phys. Chem.* Pertaining to or designating solutions of electrolytes having equal concentration of a common ion (as, for acids, the hydrogen ion), so that they do not affect one another's conductivity on being mixed.

i'so-hy'e-tal (-hī'ĕ-tăl), *a.* [*iso-* + *hyetal.*] *Meteor.* Pertaining to or indicating equal rainfall ; as, *isohyetal* lines, lines connecting places on the earth's surface which have the same annual rainfall. — *n.* An isohyetal line.

i'so-ke-rau'nic (-kē-rô'nĭk), *a.* [*iso-* + Gr. κεραυνός thunderbolt.] *Meteor.* Having thunderstorm phenomena of equal frequency or equivalent severity or simultaneous occurrence.

i'so-ke-rau'no-graph'ic (-nō-grăf'ĭk), *a. Meteor.* Designating areas over which the keraunographic records of thunderstorm phenomena are the same or similar.

i'so-ke-rau'no-phon'ic (-fŏn'ĭk), *a. Meteor.* Designating areas over which thunderstorm discharges are audible in the keraunophone with equal intensity.

i'so-la-ble (ī'sō-lă-b'l ; ĭs'ō-), *a.* [See ISOLATE.] Capable of being isolated.

i'so-late (ī'sō-lāt, ĭs'ō- ; 277), *v. t.* ; **-LAT'ED** (-lāt'ĕd) ; **-LAT'ING** (-lāt'ĭng). [F. *isolé*, fr. It. *isolato*, p. p. of *isolare* to isolate, fr. *isola* island, L. *insula.* See 1st ISLE ; cf. INSULATE.] **1.** To place in a detached situation ; to place by itself or alone ; to insulate ; to separate from others.

2. *Chem.* To separate from all foreign substances ; to make pure ; to obtain in a free state.

3. *Elec.* = INSULATE.

i'so-lat'ed (-lāt'ĕd), *p. a.* Placed or standing alone ; detached, separated ; solitary. — **isolated language** *or* **speech.** See ISOLATING LANGUAGE. — **i. pawn,** *Chess*, a pawn when there is no pawn of the same color on either of the adjoining files. — **i. point,** *Math.*, any point (in an assemblage) that is not a limit point, also, an acnode.

i'so-lat'ing (-lāt'ĭng), *p. pr. & vb. n.* of ISOLATE. — **isolating language,** *Philol.*, any of those languages in which each word, usually a single syllable (whence these languages are often called *monosyllabic*), expresses a distinct idea approximating that of the ideal root (see ROOT). Variations in parts of speech and syntactical relations are determined exclusively by the order in which the words are joined and by the use of particles. These languages, therefore, consist of strings of formally independent words. "Thus if English were made up entirely of sentences such as the following, it would be an isolating language : *You know many people ; Do you know it ? A ten-pound note*" (*H. Sweet*). The pure languages of this type are all contained in the Indo-Chinese family, which has the further character of word discrimination by means of tones (see TONE). From this characteristic they have been called "*polytonic languages ;*" some Indo-Chinese languages, however, possess only one tone, and where more exist they are not an essential, but an accidental, characteristic of the languages. The number of tones varies from four or more in Chinese to only one in western Tibetan. Languages approaching the isolating form are : the Otomi of Mexico, Ewe, Tshi, and Yoruba (Negro languages of Upper Guinea) ; Negrito (of the Philippines) ; also, the analytical inflectional languages. See INFLECTIONAL LANGUAGES, INDO-CHINESE LANGUAGES.

i'so-la'tion (-lā'shŭn), *n.* [Cf. F. *isolation.*] Act of isolating, or state of being isolated ; insulation ; loneliness.

Syn. — See SOLITUDE.

i'so-la'tion-ist, *a.* A person who favors or advocates isolation ; esp., one who favors what is considered to be a policy of isolation in national affairs.

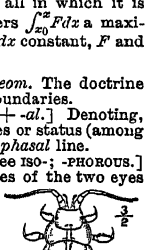
i'so-la-tive (ī'sō-lā-tĭv, ĭs'ō-), *a. Phon.* Of changes in sounds, occurring in isolation ; not dependent on the influence of neighboring sounds ; — contrasted with *combinative.*

Isolative changes are those which affect a sound without any reference to its surroundings, while combinative changes imply two sounds in juxtaposition, which modify each other in various ways. *H Sweet.*

i'solde' (ī-sōld'), *or* **I-seult'** (ĭ-sōōlt'), *n.* [OF. *Isolt, Iseut.*] In Arthurian romance, either of two women, the wife and the beloved of Tristram. See TRISTRAM.

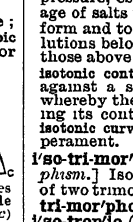
i-sol'o-gous (ī-sŏl'ō-gŭs), *a.* [*iso-* + Gr. λόγος proportion.] *Chem.* Pertaining to or designating any series of compounds of related structure and a regular difference of

i'so-morph (ī'sŏ-môrf), *n.* [See ISOMORPHOUS.] **1.** One of two or more substances related by isomorphism.
2. *Biol.* An animal, plant, or group having superficial similarity to another, although phylogenetically different.
i'so-mor'phic (-môr'fĭk), *a.* **1.** *Cryst.* Having similar crystalline form. See ISOMORPHISM.
2. *Math.* Having for each of its operations S, and for each product of two operations ST, unique correspondents S' and $S'T'$; — said of a group G with respect to a group G'. When G and G' are of the same order and G' is isomorphic with G, they are simply isomorphic, or of the same type; but if G be of higher order than G', the correspondence is not one to one, but many to one, and then G is multiply isomorphic with G'.
3. *Biol.* Alike in form; exhibiting isomorphism.
i'so-mor'phism (-fĭz'm), *n.* [Cf. F. *isomorphisme.*] **1.** *Cryst.* A similarity of crystalline form between substances of similar composition, as between sulphates of barium ($BaSO_4$) and of strontium ($SrSO_4$); sometimes, similarity of form between substances of unlike composition (which is more properly called *homœomorphism*).
2. *Math.* Of groups, quality of being isomorphic.
3. *Biol.* Similarity in organisms of different ancestry resulting from convergence. See CONVERGENCE, 3.
i'so-mor'phous (-fŭs), *a.* [*iso-* + *-morphous.*] Isomorphic; exhibiting isomorphism.
i'so-neph (ī'sŏ-nĕf), *n.* An isonephelic line.
i'so-ne-phel'ic (-nĕ-fĕl'ĭk), *a.* [*iso-* + Gr. *νεφέλη* a cloud.] *Meteor.* Designating, or pertaining to, lines joining stations that have the same average percentage of cloudiness; as, *isonephelic* lines or regions.
i'so-ni'trile (ī'sŏ-nī'trĭl; -trĭl), *n.* Also **i'so-ni'tril.** [*iso-* + *nitrile.*] *Chem.* Carbamine.
i'so-ni-tro'so- (-nī-trō'sō-). [*iso-* + *nitroso-.*] *Org. Chem.* A combining form (also used adjectively), signifying: *Pertaining to, containing,* or *designating, the bivalent group* NOH, which is called also the *oxime* group. See OXIME, NITROSO-.
i'so-nom'ic (ī'sŏ-nŏm'ĭk), *a.* [Gr. *ἰσόνομος*; *ἴσος* equal + *νόμος* law.] Having equal laws or rights, characterized by isonomy.
i-son'o-my (ī-sŏn'ŏ-mĭ), *n.* [Gr. *ἰσονομία*: cf. F. *isonomie.* See ISONOMIC.] Equality of laws or rights, equal distribution of rights and privileges.
i'so-nym (ī'sŏ-nĭm), *n.* [Gr. *ἰσώνυμος* having the same name; *ἴσος* same + *ὄνυμα, ὄνομα,* name.] A paronym.
— **i'so-nym'ic** (-nĭm'ĭk), *a* — **i-son'y-my** (ī-sŏn'ĭ-mĭ), *n.*
i-sop'a-thy (ī-sŏp'ă-thĭ), *n.* [*iso-* + *-pathy.*] *Med.* **a** Theory that it is possible to cure a disease by means of the virus of the same disease. **b** Theory of curing a diseased organ by eating the analogous organ of a healthy animal.
i'so-per'i-met'ric (ī'sŏ-pĕr'ĭ-mĕt'rĭk) } *a.* [Gr. *ἰσοπερι-*
i'so-per'i-met'ric-al (-pĕr'ĭ-mĕt'rĭ-kăl) } *μετρος*; *ἴσος* equal + *περιμετρον* circumference: cf. F. *isopérimètre.* See PERIMETER.] *Geom.* Having equal perimeters; connected with isoperimetry. — **isoperimetric figures,** (plane) figures having equal perimeters. — **i. problems,** problems in which is sought a curve of fixed length that possesses some maximum or minimum property; — now called **problems of relative maxima and minima,** including all in which it is sought to find the form of y that renders $\int_{x_0}^{x} Fdx$ a maximum or minimum while keeping $\int_{x_0}^{x} \phi dx$ constant, F and ϕ being functions of x, y, and $\frac{dy}{dx}$.
i'so-per-im'e-try (-pĕr-ĭm'ē-trĭ), *n.* *Geom.* The doctrine of figures having equal perimeters or boundaries.
i'so-phas'al (-făz'ăl), *a.* [*iso-* + *phase* + *-al.*] Denoting, or marking, likeness or equality of phases or status (among the elements of a compound); as, an *isophasal* line.
i'so-pho'ri-a (-fō'rĭ-ă; 201), *n.* [NL. See ISO-; -PHOROUS.] *Med.* Condition of having the visual axes of the two eyes in the same horizontal plane.
i'so-pi-es'tic (-pī-ĕs'tĭk), *a.* [*iso-* + Gr. *πιέζειν* to press.] *Thermodynamics.* Having, or denoting, equal pressure; isobaric. — *n.* An isopiestic line.
isopiestic line, a line showing, in a diagram, the relations of temperature and volume under constant pressure; — called also *isobar.*
I'so-pleu'ra (-plōō'rȧ; 243), *n. pl.* [NL. See ISO-; PLEURA.] *Zoöl.* The Amphineura. — **i'so-pleu'ral** (-răl), *a.* — **i'so-pleu'ran** (-răn), *a. & n.* — **i'so-pleu'rous** (-rŭs), *a.*
i'so-pod (ī'sŏ-pŏd), *a. Zoöl.* Belonging to the Isopoda. — *n.* One of the Isopoda.



One of the Isopoda (*Idothea irrorata*). *a* Caudal Shield, or Pygidium, consisting of the last four abdominal segments, consolidated.

I-sop'o-da (ī-sŏp'ŏ-dȧ), *n. pl.* [NL. See ISO-; -PODA.] *Zoöl.* A suborder of sessile-eyed crustaceans of the order Arthrostraca, in which the body is usually depressed and composed of seven free thoracic segments each of which bears a pair of legs which are similar in size and direction on the different segments in typical members of the group. The gills are borne on the appendages of the abdomen, which is short and often reduced by the fusion of some of its segments so that a large caudal shield is formed. The species are numerous, and mostly quite small. Many are marine, others live in fresh water, and others, as the pill bugs or sow bugs, are terrestrial. — **i-sop'o-dan** (ī-sŏp'ŏ-dăn), **i-sop'o-dous** (-dŭs), *a.* — **i-sop'o-dan,** *n.*
i'so-pol'i-ty (ī'sŏ-pŏl'ĭ-tĭ), *n.* [Gr. *ἰσοπολιτεία.* See ISO-; POLITY.] Equality of political rights. — **i'so-po-lit'i-cal** (-pŏ-lĭt'ĭ-kăl), *a.* — **i-sop'o-lite** (ī-sŏp'ŏ-līt), *n.*
i'so-prene (ī'sŏ-prēn), *n.* [Etym. uncertain.] *Chem.* An oily, volatile hydrocarbon, C_5H_8, obtained by the distillation of caoutchouc or gutta-percha. It is a hemiterpene.
i'so-pro'pyl (-prō'pĭl), *n. Chem.* A univalent radical, $(CH_3)_2CH$, isomeric with normal propyl. See iso-, PROPYL.
i'sop-seph'ic (ī'sŏp-sĕf'ĭk; -sē'fĭk), *a.* [Gr. *ἰσόψηφος*; *ἴσος* equal + *ψῆφος* pebble, counter.] Equal in numerical value; — said of two or more words whose letters represent the same total according to the old Greek notation giving a certain value to each letter. — *n.* One of two or more isopsephic verses. — **i'sop-se'phism** (-sē'fĭz'm), *n.*
I-sop'ter-a (ī-sŏp'tĕr-ȧ), *n. pl.* [NL.; *iso-* + Gr. *πτερόν* wing.] *Zoöl.* A division of the Neuroptera often regarded as a separate order, consisting of the termites, or white ants. — **i-sop'ter-ous** (-ŭs), *a.*
i'so-pyre (ī'sŏ-pīr), *n.* [*iso-* + Gr. *πῦρ* fire.] *Min.* An impure opal containing iron, alumina, etc
i'sor-rop'ic (ī'sŏr-rŏp'ĭk), *a.* [Gr. *ἰσόρροπος* in equipoise; *ἴσος* equal + *ῥοπή* momentum.] Of equal value. — **isorropic line** (in a diagram), *Geom.*, the locus of all the points for which a specified function has a constant value.



Isosceles Triangle ($ab = ac$)

i-sos'ce-les (ī-sŏs'ē-lēz), *a.* [L., fr. Gr. *ἰσοσκελής*; *ἴσος* equal + *σκέλος* leg.] *Geom.* Having two equal sides; — said of a triangle.
i'so-seis'mal (ī'sŏ-sīs'măl), *n.* An isoseismal line.
i'so-seis'mal (-măl) } *a.* [*iso-* + *seismal, seis-*
i'so-seis'mic (-mĭk) } *mic.*] Affected with, or pertaining to, equal force by an earthquake shock — **isoseismal line,** an imaginary line connecting all points on the surface of the earth where an earthquake shock has the same intensity. The isoseismal lines corresponding to different intensities of shock make a system of curves about the epicenter.
i'sos-mot'ic (ī'sŏs-mŏt'ĭk), *a.* [*iso-* + *osmotic.*] Of or pertaining to equal osmotic pressure; as, *isosmotic* solutions.
I'so-spon'dy-li (ī'sŏ-spŏn'dĭ-lī), *n. pl.* [NL.; *iso-* + Gr. *σπόνδυλος, σφόνδυλος,* a vertebra.] *Zoöl.* A large order of soft-rayed, physostomous, teleost fishes, having abdominal ventral fins, a mesocoracoid or precoracoid arch (in all typical forms), and the anterior vertebræ unmodified and similar to the others. It is the most primitive group of teleosts. It includes 20 or 25 families, of which the herring and salmon families are the most important, and contains both marine and fresh-water forms, some inhabiting the deep seas. Cf. MALACOPTERYGII. — **i'so-spon'dy-lous** (-lŭs), *a.*
i'so-spore (ī'sŏ-spōr, 201), *n. Biol.* **a** One of the spores produced by an isosporous organism. **b** A zygospore.
i-sos'po-rous (ī-sŏs'pŏ-rŭs; ī'sŏ-spō'rŭs; 201), *a.* [*iso-* + Gr. *σπορος* fruit.] *Biol.* Producing but one kind of spore, as the ferns and Equisetaceæ. Cf. HETEROSPOROUS.
i-sos'ta-sy (ī-sŏs'tă-sĭ), *n.* [See ISO-; STASIS.] The state or quality of being isostatic. Specif., *Geol.*, general equilibrium in the earth's crust, supposed to be maintained by the yielding or flow of rock material beneath the surface under gravitative stress. By the theory of *isostasy* each unit column of the earth, from surface to center, has approximately the same weight, and the continents stand higher than the ocean beds chiefly because the material of the crust has there less density.
i'so-stat'ic (ī'sŏ-stăt'ĭk), *a.* [*iso-* + *static.*] *Physics & Geol.* Subjected to equal pressure from every side; being in hydrostatic equilibrium, as a body submerged in a liquid at rest; pertaining to, or characterized by, isostasy.
i'so-stem'o-nous (-stĕm'ŏ-nŭs; -stē'mŏ-nŭs), *a.* [*iso-* + Gr. *στήμων* thread.] *Bot* Having stamens equal in number to the perianth divisions. — **i'so-stem'o-ny** (-stĕm'ŏ-nĭ), *n.*
i'so-sul'pho-cy'a-nate (-sŭl'fō-sī'ă-nāt), *n. Chem.* An ester of the hypothetical isosulphocyanic acid.
i'so-sul'pho-cy-an'ic (-sī-ăn'ĭk), *a. Chem.* Pertaining to or designating an acid, HNCS, isomeric with sulphocyanic acid, and known only in its esters, the mustard oils.
i-sot'e-ly (ī-sŏt'ē-lĭ), *n.* [Gr. *ἰσοτελεια*; *ἴσος* equal + *τέλος* tax.] In ancient Athens, equality with the citizens in the matter of public burdens, taxation, the right to own land, etc., granted to some aliens.
i'so-there (ī'sŏ-thēr), **i-soth'er-al** (ī-sŏth'ēr-ăl; ī'sŏ-thēr-ăl), *n.* [*iso-* + Gr. *θέρος* summer: cf. F. *isothère.*] *Phys. Geog.* A line joining points on the earth's surface having the same mean summer temperature. — **i-soth'er-al,** *a.*
i'so-therm (ī'sŏ-thûrm), *n.* [*iso-* + Gr. *θερμη* heat, fr. *θερμός* hot: cf. F. *isotherme.*] *Phys. Geog.* A line joining or marking points on the earth's surface having the same temperature at a given time, or the same mean temperature for a given period. See ISOBAR, *Illust.*
i'so-ther'mal (-thûr'măl), *a.* [Cf. F. *isotherme.*] Relating to, or indicating, equality of temperature; specif., *Phys. Geog.*, relating to the geographical distribution of temperature, as exhibited by means of isotherms; as, an *isothermal* line; an *isothermal* chart — *n.* An isothermal line.
isothermal coördinates. See COORDINATE, *n.* — **i. line.** **a** An isotherm. **b** *Physics.* A line on a diagram of energy representing variations in pressure and volume under conditions of constant temperature. — **i. lines** (of a surface), *Math. & Physics,* the lines whose equations are $u = a$ constant, $v = a$ constant, where u and v are thermal parameters (which see). They divide the surface into infinitesimal squares. — **i. modulus,** the modulus of cubic compressibility corresponding to compression at constant temperature. See under MODULUS. — **i. zones,** *Phys. Geog.*, spaces on opposite sides of the equator having the same mean temperature, and bounded by corresponding isothermal lines.
i'so-ther'mo-bath (ī'sŏ-thûr'mŏ-băth), *n.* [*iso-* + *thermo-* + Gr. *βάθος* depth.] *Phys. Geog.* A line drawn through points of equal temperature in a vertical section of the ocean. — **i'so-ther'mo-bath'ic** (-băth'ĭk), *a.*
i'so-ther-om'brose (-thēr-ŏm'brōs), *n.* [*iso-* + Gr. *θερος* summer + *ὄμβρος* rain.] *Phys. Geog.* A line connecting or marking points on the earth's surface which have the same mean summer rainfall.
i'so-ton'ic (-tŏn'ĭk), *a.* [Gr. *ἰσότονος.* See ISO-; TONIC.] **1.** Having, or indicating, equal tones, or tension.
2. *Physiol.* Having the same or equal osmotic pressure; isosmotic; — said of solutions which have like osmotic pressure, esp. solutions which contain the proper percentage of salts to keep the red blood corpuscles unaltered in form and to prevent the removal of the hæmoglobin. Solutions below this strength are said to be *hypo-isotonic* and those above this strength *hyperisotonic.*
isotonic contraction, *Physiol.*, the contraction of a muscle against a small constant resistance under conditions whereby the muscle is stretched by a constant force during its contraction. The resultant curve is known as an **isotonic curve.** — **i. system,** *Music,* the system of equal temperament. See TEMPERAMENT.
i'so-tri-mor'phism (-trī-môr'fĭz'm), *n.* [*iso-* + *trimorphism.*] Isomorphism between the three forms, severally, of two trimorphous substances. Cf. ISODIMORPHISM. — **i'so-tri-mor'phous** (-fŭs), *a.*
i'so-trop'ic (-trŏp'ĭk) } *a.* [*iso-* + *-tropic, -tropous.*]
i'sot'ro-pous (ī-sŏt'rō-pŭs) } **1** *Physics.* Having the same properties in all directions. Cf. ÆOLOTROPIC.
2. *Biol.* Not having predetermined axes, as certain eggs.
i-sot'ro-py (-sŏt'rō-pĭ), *n.* State or quality of being isotropic
i'so-type (ī'sŏ-tīp), *n.* [*iso-* + *-type*] *Biol.* An animal, plant, or group common to two or more countries or life regions. — **i'so-typ'ic** (-tĭp'ĭk), *a*
i-sox'a-zole (ī-sŏk'sȧ-zōl), *n.* [*iso-* + *oxazole.*] *Org. Chem.* A hypothetical cyclic compound, CH N·O·CH:CH, one of the two simplest furomonazoles; also, a derivative of it.
Is'ra-el (Iz'rā-ĕl), *n.* [L. *Israel* or Gr. *Ἰσραήλ,* fr. Heb. *Yisrāēl.*] **1.** *Bib.* Jacob; — so called after he wrestled with the angel (see *Gen.* xxxii. 28).
2. Jacob's descendants; the children of Israel; the Jews or Hebrews; the Jewish world or people.
3. Fig. and allusively: God's chosen people; the elect, the Christian church; real Christians, collectively.
Is'ra-el-ite (-ĕl-īt), *n.* [L. *Israelites,* Gr. *Ἰσραηλίτης,* fr. *Ἰσραήλ, Ἰσράηλος,* Israel, Heb. *Yisrāēl,* i. e., champion of God; *sārāh* to fight + *ēl* God.] **1.** A descendant of Israel, or Jacob; a Hebrew; a Jew.
2. One of God's chosen people; a real Christian.
Is'ra-el-ite, *a.* Of or pertaining to Israel; Jewish.
Is'ra-el-it'ic (Iz'rā-ĕl-ĭt'ĭk) } *a.* [L. *Israeliticus.*] Of

-ist (-ĭst). [Gr. *-ιστής*: cf. F. *-iste*, L. *-ista*.] A noun suffix denoting: **a** *One who does, or makes a practice of* (1) a given action, commonly expressed by a corresponding verb in *-ize*; as in moral*ist*, monopol*ist*, theor*ist*; or (2) a specified class of conduct; as in bigam*ist*, casu*ist*, sensual*ist*. **b** *One who practices* a given art; as in rhapsod*ist*, artis*t*; *one professionally or particularly occupied with*, or *skilled in*, a given department of knowledge; as in alchem*ist*, botan*ist*, physic*ist*; or a given subject or thing; as in annal*ist*, humor*ist*, flor*ist*, oculi*st*, novel*ist*, balloon*ist*. **c** *One who professes*, or *adheres to*, a given doctrine, system, or cult, commonly denoted by a corresponding noun in *-ism*; as in athe*ist*, hedoni*st*; — often formed on a proper name; as in Buddhi*st*, Darwini*st*; or on an adjective; as in social*ist*, imperiali*st*, opportuni*st*, royali*st*.

☞ The reference "See -IST" is sometimes given as the only definition of a word ending in *-ist*, if its meaning can readily be gathered from the definitions of the suffix and the root word.

isth'mi-an (Ĭs'mĭ-ăn; Ĭsth'-; Ĭst'-; *cf.* ISTHMUS), *a.* [L. *Isthmius*, Gr. Ἰσθμιος. See ISTHMUS.] Of or pertaining to an isthmus; specif. [*cap.*]: **a** Of or pertaining to the Isthmus of Panama; as, the *Isthmian* canal. **b** Of or pertaining to the isthmus connecting the Peloponnesus with the mainland of Greece, or designating, or relating to, the games anciently celebrated there under the patronage of Corinth. The **Isthmian games**, which were held every two years in the spring, formed one of the four great Panhellenic festivals (the Olympian, Pythian, and Nemean being the others). The games, which comprised the usual contests (see AGONES), were founded 582 B. C., though mythically their establishment was ascribed either to Poseidon (in whose honor they were held) or to Theseus. The victor's prize is variously given as a palm branch or a crown of fir (earlier a garland of ivy or parsley).

Isth'mi-an, *n.* A native or inhabitant of an isthmus; specif. [*cap.*], a member of one of the native peoples of the Isthmus of Panama.

isth'moid (-moid), *a.* [Gr. *ισθμοειδης*.] Resembling an isthmus.

i-su'ret (ī-sū'rĕt) } *n.* Also **-in**. [*iso-* + *urea*.] *Chem.* A
i-su'ret-ine (-ĭn; -ēn) } white, crystalline, basic substance, $NH_2CH{:}NOH$, formed by the action of hydroxylamine on hydrocyanic acid. It is isomeric with urea.

I-su'rus (ī-sū'rŭs), *n.* [NL.; *iso-* + Gr. *ουρα* tail.] *Zoöl.* A genus of large voracious lamnoid sharks (*mackerel sharks*) having slender teeth with entire edges and without basal cusps. By some the genus is made the type of a family, **I-su'ri-dæ** (-rĭ-dē). — **i-su'roid** (-roid), *a.*

it (ĭt), *pron.* [ME. *it*, *hit*, AS. *hit*, neut. of *hē*. The accusative *hit* gradually displaced the dative *him*; and in all constructions *hit* became *it* in standard English between the 12th and 15th centuries. See HE.] The neuter pronoun of the third person, corresponding to the masculine pronoun *he* and the feminine *she*, and having the same plural (*they*, *their* or *theirs*, *them*). *It* is used: **1.** As a substitute for any neuter noun in the nominative or objective case; as, here is the book, take *it* home. *It* is now used only of an inanimate object or of an animate one in which sex is disregarded, as usually in speaking of a lower animal, sometimes of an infant or in contemptuous or humorous reference to a person.
Will make or man or woman madly dote
Upon the next live creature that *it* sees. *Shak.*
It is sometimes used redundantly with its noun, as esp. in the old ballad style or for emphasis.
The wound *it* seem'd both sore and sad. *Goldsmith.*
In the objective case it is sometimes a reflexive; as, the bird took to *it* a mate.
2. As a demonstrative, esp. as subject of some form of *to be*, and pointing: **a** To something about to be stated, named, or mentioned, or well known.
It is I, be not afraid. *Matt.* xiv. 27.
b Referring to an act, thing, matter, or statement (often comprising a clause or phrase) implied or expressed as a subject of consideration; as, what is *it* [that you wish]? I don't doubt *it* [what you say]; *it* is thought *he will come*; *it* is wrong *to do this*; *it* [the distance] is three miles to Boston; *it* is late; he tried to climb, but could not do *it*.

☞ Peculiarities of construction are: (1) The verb formerly agreed with the appositional noun or pronoun following; as, *it am* I. When a relative clause follows this noun or pronoun, its verb still agrees with the noun or pronoun; as, *it* is I that *have* done this. (2) *It* was formerly often used with *is*, *was*, *were*, where *there* or *he*, *she*, *that*, is now; as, "*It* is a peerless kinsman." *Shak.* (3) In old ballad style *it is*, *it was*, often thus introduces the subject; as, "*It is* an ancient mariner." *Coleridge.*
3. As an indefinite nominative for an impersonal verb; as, *it* snows; *it* rains; *it* hurts. Also, *Archaic* or *Colloq.*, *it* says, *it* tells (in a book, paper, etc.).
4. As a substitute for such general terms as, the state of affairs, the circumstances, or the like; as, how fares *it* with the sick man? *it* is all over with him; *it* will come to a quarrel; *it* lies within his choice; if *it* were not for objections; there was nothing for *it* but *to submit*.
Think on me when *it* shall be well with thee. *Gen.* xl. 14.
5. As a grammatical (usually anticipatory) subject or object of a verb of which the logical subject or object is an infinitive phrase or a clause; as, *it* is hard to believe what one hears; I take *it* that you agree; sometimes in a periphrastic construction for the sake of a shift of emphasis; as, *it* was at Portsmouth that the treaty was made.
6. As an indefinite object after some verbs, or after a substantive used as a verb; as, to foot *it* (i. e., to walk); to lord *it* (i. e., to play the lord). *Now Often Colloq.*
Whether the charmer sinner *it*, or saint *it*,
If folly grows romantic, I must paint it. *Pope.*
7. As a possessive. *Obs. or Dial.* *It* as possessive commonly displaced the original neuter genitive *his*, beginning in the 16th century, and was in turn displaced by *it's*, *its*, beginning about 1600. See HIS, ITS.
The day present hath ever inough to do with *it* owne grief.
Geneuan Test.
Do, child, go to *it* grandam, child. *Shak.*
It shall fright all *it* friends with borrowing letters. *B. Jonson.*
8. Specif., in "tag" and other children's games, the player who has a task laid on him, as that of catching or touching the other players.

EBURNEAN.] **1.** The hard, creamy-white, opaque, fine-grained substance, consisting of a peculiar form of dentine, which composes the tusks of elephants; also, the dentine of the tusks of other large mammals, or, in a broader sense, that of any tooth. The ivory of the elephant is particularly valued on account of its beauty, uniformity, and elasticity. For the manufacture of billiard balls no equally good substitute has been found. Most of the supply is obtained from Africa, and the demand for it is rapidly causing the extinction of the African elephant. Some ivory is obtained from the walrus, hippopotamus, and narwhal, and from the extinct mammoth, whose tusks are still frequently found in parts of Siberia.

2. A tusk, esp. of the elephant; also, *Slang or Colloq.* (chiefly in the *pl*), a tooth.

3. The color of ivory; whiteness, as of the skin.

4. Any article made of ivory; as: **a** A carving in ivory. **b** A season ticket or the like, as made of a tablet of ivory. *Cant, Eng.* **c** A die; — usually in *pl.*, dice. *Slang.* **d** A billiard ball. *Colloq.* **e** *pl.* The keys of a piano. *Slang.*

5. An ivorylike substance; an imitation of ivory; as, vegetable *ivory* (see *ivory nut*).

i'vo-ry-type' (ī'vō-rĭ-tīp'), *n. Photog.* A picture produced by superposing a very light print, rendered translucent by varnish, and tinted upon the back, upon a stronger print, so as to give the effect of a photograph in natural colors.

i'vo-ry--white', *a.* Of the color of ivory, white like ivory. — *n.* **a** The color of ivory. **b** Short for *ivory-white porcelain*, a cream-white variety anciently made in China or in modern times imitated by the Japanese and Chinese.

i'vy (ī'vĭ), *n.; pl.* IVIES (ī'vĭz). [AS. *īfig;* akin to OHG. *ebawi, ebah, ebahewi*, G. *epheu.*] **1.** A well-known climbing araliaceous shrub (*Hedera helix*) with evergreen ovate or five-angled leaves, small yellowish flowers, and black berries. The stem clings to walls by means of numerous fine aërial roots. The ivy is native of Europe and Asia, but is widely cultivated. The ivy was anciently sacred to Dionysus or Bacchus, and a garland or bush of it, or a representation of one or the other, was formerly placed outside a tavern or house as a sign that wine was sold within.

Ivy.

2. Usually with an attributive or qualifying adjective, any of various other plants more or less resembling the true ivy; as, *American ivy, German ivy*, etc.

ivy tree. **1.** An old plant of ivy. *Obs.*

2. **a** An araliaceous evergreen tree (*Nothopanax colensoi*) of New Zealand. **b** The mountain laurel. *Southern U. S.*

ivy vine. **a** An American vitaceous plant (*Ampelopsis cordata*) with ovate, somewhat cordate leaves. **b** The Virginia creeper.

i'vy-wort' (ī'vĭ-wûrt'), *n.* **a** Any plant of the family Araliaceæ. **b** The Kenilworth ivy.

i-wis', y-wis' (ĭ-wĭs'), *adv.* [ME. *ywis, iwis*, AS. *gewis* certain, akin to D. *gewis*, G. *gewiss*, and E. *wit* to know. See WIT to know; Y-.] Certainly; indeed; truly. *Archaic.*

"*Yuss,*" quod he, "it is full dear, I say." *Chaucer.*

She answered me, "*I-wisse*, all their sport in the park is but a shadow to that pleasure that I find in Plato." *Ascham*

☞ The common form *iwis* was often written with the prefix apart from the rest of the word and capitalized, as, *I wis, I wisse*, etc. The prefix was mistaken for the pronoun *I*, and *wis, wisse*, for a form of the verb *wit*, to know. See WIS, cf. WIT, to know.

Our ship, *I wis,*
Shall be of another form than this. *Longfellow.*

Ix'i-a (ĭk'sĭ-ȧ), *n.* [NL., fr. Gr. *ἰξός* birdlime; — from the viscid nature of some species. Cf. L. *ixia*, Gr. *ἰξία*, name of a plant.] *Bot.* A genus of South African bulbous iridaceous plants (sometimes called **corn lilies**), having linear sword-shaped leaves and spikes of remarkably showy flowers, mostly in shades of pink or purple. They are commonly in cultivation. Also [*l. c.*], a bulb, plant, or flower of this genus.

Ix'i-o-lir'i-on (-ō-lĭr'ĭ-ŏn), *n.* [NL.; *Ixia* + Gr. *λείριον* lily.] *Bot.* A genus of bulbous amaryllidaceous plants containing two Asiatic species, cultivated for their deep blue or purple umbeled flowers. Also [*l. c.*], a plant, flower, or bulb of this genus.

Ix-i'on (ĭk-sī'ŏn), *n.* [L., fr. Gr. Ἰξίων.] *Gr. Myth.* A king of the Lapithæ, bound in Tartarus to an endlessly revolving wheel for aspiring to the love of Hera and boasting of his supposed success, she having in reality sent to him a cloud in her shape, by which he became father of the race of centaurs. — **Ix'i-o'ni-an** (ĭk'sĭ-ō'nĭ-ăn), *a.*

Ix-o'ra (ĭk-sō'rȧ; 201), *n.* [NL., fr. *Isvara* a Hindu divinity, fr. Skr. *īçvara* lord.] *Bot.* A large genus of cosmopolitan tropical rubiaceous shrubs and small trees. They bear corymbs of handsome, sometimes fragrant, flowers having tubular salver-shaped corollas and exserted stamens. The East Indian *I. coccinea*, with showy scarlet flowers, is a favorite in cultivation. The very hard wood of the larger species, called *iron trees*, is valuable.

ix'tle } (ĭks'tlē; -tlĭ; ĭs'-), *n.* [Mex. *istle.*] The fiber obtained
ix'tli } from various tropical American plants, specif.: **a** The fine, soft fiber of the bromeliaceous plant *Bromelia sylvestris*. **b** The fiber from various Mexican agaves of the group of which *Agave heteracantha* is the type. It varies greatly in appearance and quality, and is variously used for cordage, basketry, etc. The ixtle that is shipped from the port of Tampico is known commercially as **Tampico fiber**; it is probably a mixture of fibers from various species.

ixtle grass. The plant *Bromelia sylvestris*, yielding ixtle.

iz'ar (ĭz'ȧr), *n.* [Hind. & Per. *izār* drawers, trousers.] **a** The outer garment of Mohammedan women of the poorer classes, consisting of a piece of white calico, large enough to cover the whole person. **b** The loin cloth of the ihram.

-ize (-īz). [F. *-iser*, L. *-izare*, Gr. *-ίζειν.*] A suffix forming verbs with the following senses: **1.** (Transitive verbs) **a** *To subject to* the action, treatment, or process denoted by the root; as in bapt*ize*, catechi*ze*, apostrophi*ze*, tantali*ze*, satiri*ze*. **b** *To render, make into, put into conformity with,* or *make like* (the thing, character, or quality denoted by the root); as in Christian*ize*, real*ize*, steril*ize*, idol*ize*, pulver*ize*, colon*ize*, bastard*ize*, systemat*ize*, German*ize*, Russian*ize*. **c** Specif.: *Chem. To impregnate, treat,* or *combine, with;* as in oxid*ize*, phosphor*ize*.

2. (Intransitive verbs) *To act in the way of,* or *practice* (that which the root denotes); as in Calvin*ize*, apostat*ize*, botan*ize*, tempor*ize*; — including intransitive uses of many words under def. 1.

☞ Certain words ending with the sound of *īz* are spelt with *-ise* after the French *-iser* or *-ise;* as, dev*ise*, surpr*ise*. But the great body of words so ending are spelt either *-ize* or *-ise*, though most authorities, among them the Oxford English Dictionary, now spell them with *-ize*, as in this Dictionary; and there is a tendency to extend this spelling to all these words.

☞ The reference "See -IZE" is sometimes given as the only definition of a word ending in *-ize*, if its meaning can be readily gathered from the definitions of the suffix and root word.

iz'tle (ĭs'tlē; -tlĭ), *n.* [Mex. *istli.*] A kind of obsidian which is used by the Indians in making arrow points, knives, etc.

J

J (jā). **1.** The tenth letter of the English alphabet. See ALPHABET, *Illust.* It is a comparatively late variant form of the Latin I, which was used indifferently as a vowel or as a consonant, its consonantal value being that of English *y* in *yet*. The form *j*, with or without the dot, was developed from *i*, with or without the dot, during the Middle Ages, but it was long used in certain positions in the word merely, without regard to the sound as consonant or vowel. The *j* gradually became differentiated from *i* in function as well as form, but it was not until the 17th century that the distinction of *j* as consonant and *i* as vowel was fully established and the capital forms of *J* introduced. The two letters thus developed were until quite recently classed together. Cf. I. In English, the regular and practically uniform sound of *j*, as in *jet* (= *dzh*), the same as *g* in *gem*, dates from the 11th century, that being the sound represented by *i* when consonantal in words then introduced from Old French. See *Guide to Pron.*, § 188. J is etymologically most closely related to *i*, *y*, *g*; as in *jot*, *iota*; *jest*, *gesture*; *join*, *jugular*, *yoke*. See I.

2. As a *symbol*, used to denote or indicate: **a** Rarely, the tenth in a series; tenth in order or class, or, sometimes, the numeral ten; as, *J* Battery; manuscript *J*. **b** *Math.* (1) [*cap.*] The Jacobian. (2) One of three mutually perpendicular unit vectors, the other two being *i* and *k*. **c** [*cap.*] *Physics.* The mechanical equivalent of heat.

3. As an *abbreviation:* In the form **J.**: Various proper names, as James, John, etc.; Jehovistic Prophetic Document, or its author, the earliest stratum being also designated J^1, later strata J^2, J^3 (*O. T. Criticism*); Judge; Justice.

4. As a Roman numeral, J formerly stood for I, surviving in this use as the final form of I in medical prescriptions; as, *ij* (= 2); *vj* (= 6).

J, j, *n.; pl.* JS or J's (jāz). **1.** The letter J, j, or its sound.

2. Something shaped like the letter J

3. Short for J PEN.

J, *a.* Having the general form of, or marked with, the capital J; as, a J bolt or J-bolt.

J bolt, a U-shaped bolt with one leg slightly longer than the other. — **J pen,** a pen with a short broad point, stamped with the letter J.

2. A trimming of a piece of ruffled lace, tulle, chiffon, or the like, worn by women down the front of the dress.

ja-cal' (hă-kal'; 189), *n.* [Amer. Sp., fr. Mex. *zacalli*.] In Mexico and the southwestern United States, a kind of plastered house or hut, usually made by planting poles or timber in the ground, filling in between them with screen work or wickerwork, and daubing one or both sides with mud or adobe mortar; also, this method of construction.

jac'a-mar (jăk'ă-mär), *n.* [F. *jacamar*, Braz. *jacamarica*; cf. Pg. *jacamár*.] Any of many species of picarian birds of the subfamily Galbulinæ (see GALBULIDÆ) found in tropical forests from Mexico to Brazil. They are usually brilliant metallic green or bronze above and rufescent below, with a white throat. They have a long sharp bill, and feed on insects which they catch on the wing

Jacamar.

jac'a-na (jăk'ă-nä), *n.* [Pg., fr. native name in Brazil.] Any of certain wading birds constituting the family *Jacanidæ*, syn. *Parridæ*. They usually have a frontal plate, a spur at the bend of the wing, and extremely long toes, by means of which they run about on floating vegetation, as lily pads. The typical genus, *Jacana*, syn. *Parra*, is American. The Mexican jacana (*Jacana spinosa*), found from southern Texas to Colombia, is chiefly dark chestnut with greenish yellow markings on the wings. Related genera occur in Africa and southern Asia. Although often classed with the rails, they show many affinities with the plovers.

Mexican Jacana (*J. spinosa*).

Jac'a-ran'da (jăk'ă-răn'dă), *n.* [Braz.; cf. Pg. *jacarandá*.] **1.** *Bot.* A large genus of tropical American bignoniaceous trees with pinnate or bipinnate leaves and paniculate blue flowers, the corolla having a tubular base and irregularly five-lobed limb.

2. [*l. c.*] A tree of this genus; also, the handsome mottled wood of some species of these trees, or a similar wood obtained from trees of other families.

ja'cinth (jā'sĭnth; jās'ĭnth; 277), *n.* [F. *jacinthe*, L. *hyacinthus*. See HYACINTH.] The hyacinth. *Obs*, except as the name of the gem and in heraldry. As the name of a modern gem, a distinction is made by some between the jacinth and hyacinth, *Jacinth* being used of a gem more nearly pure orange in color.

jac'ĭ-ta'ra palm (jăs'ĭ-tä'rä). [Braz. *jacitara*] Any Brazilian palm of the genus *Desmoncus*, the distal pinnæ of whose leaves are transformed into retrorse hooks, enabling the stem to climb. See TIPITI.

jack (jăk), *n.* [Pg. *jaca*, Malayalam *chakka*.] The fruit of a large East Indian moraceous tree (*Artocarpus integrifolia*), closely allied to the breadfruit; also, the tree, or its fine-grained yellow wood, which is much used in cabinetwork, also for dyeing. The tree differs from the breadfruit in having entire leaves. The fruit often weighs thirty pounds or more; the seeds are roasted and eaten.

Jac'o-be'an (jăk'ō-bē'ăn; *já*-kō'bē-ăn; 277), *n.* A Jacobean statesman or writer.

Ja-co'bi-an (*ja*-kō'bĭ-ăn), *a.* Of or pertaining to the German mathematician Karl G. J. Jacobi (1804–51), or his mathematical discoveries.

Jacobian ellipsoid of equilibrium, an ellipsoid of three unequal axes, a figure of equilibrium of a rotating homogeneous fluid. Jacobi proved that such a figure of equilibrium is possible when $v^2 < 2\pi e\rho(0.18711)$, v being the angular velocity of rotation, ρ the density, and e the unit of attraction. — **J. function**, *Math.*, a theta function or any kindred function, introduced by Jacobi into the theory of elliptic functions.

Ja-co'bi-an, *n. Math.* The determinant $|\, u_x\ v_y\ w_z\ \ldots\,|$, whose constituents in regular order are the first derivatives of n functions $u, v, w, \ldots$ of n independent variables, $x, y, z, \ldots$ It is highly important in both analysis and geometry, and has been extended by Clifford to similar systems of determinants.

Jac'o-bin (jăk'ō-bĭn), *n.* [F. See JACOB.] **1.** *Eccl. Hist.* A Dominican friar; — so named because the first convent established by the Dominicans in Paris was in a hospice bearing the name of St. Jacques (L. *Jacobus*).

2. One of a society or club of radical democrats in France during the revolution of 1789. The society (originally a loose organization known as the "Club Breton" and meeting at Versailles) was called by its members the "Society of Friends of the Constitution," but by its adversaries its members were called *Jacobins* from their meeting place, an old Jacobin convent in the Rue Saint Honore, Paris. The society came to be controlled by violent agitators, and, under the leadership of Robespierre, conducted the Reign of Terror. With his fall their power was broken, although the society was not finally dissolved until 1799. Hence: A plotter against an existing government; a violent radical or turbulent demagogue.

Jain'ism (jīn'ĭz'm; jān'-), *n.* The heterodox Hindu religion, of which the most striking features are the exaltation of saints or holy mortals, called *jinas* (spiritual conquerors), above the ordinary Hindu gods, and the denial of the divine origin and infallibility of the Vedas. It is intermediate between Brahmanism and Buddhism, having some things in common with each. Jainism was founded by Mahavira Jnatriputra about the 6th century B. C. Its main sects are the **Digambara,** whose images are unclothed, whose ascetics go naked, and who assert that woman cannot attain salvation; the **Svetambara,** who allow woman's salvation and whose images are clothed in white; and the Dhundia, who carry to an extreme the doctrine of the preservation of animal life.
The chief point of difference between *Jainism* and Buddhism is that the former rejects the doctrine of Nirvana, and believes that when the soul has been delivered from the trammels of successive existences it begins a spiritual life in some indefinable mansion of the blessed. *Census of India,* 1901.

Turk. *yeñi-cheri* new soldiers or troops] [*Often l. c.*] A soldier of a body of Turkish infantry that existed from the 14th to the 19th century. The first Janizaries were personal slaves of the Sultan, and the later ones were mainly slaves, conscripts, and the sons of subject Christians seized as tribute. They were peculiarly privileged, and formed the main fighting force of the Turks. They finally became so unruly that, on a revolt by them in 1826, many thousands of them were killed, the rest dispersed, and the organization was abolished. The name has been frequently applied in literature to any Turkish soldier.

Jan'sen-ism (jăn'sĕn-ĭz'm), *n.* The doctrines of the Roman Catholic bishop Cornelius Jansen (1585–1638) and his followers; also, their ecclesiastical agitation, chiefly in France, in the latter part of the 17th and earlier part of the 18th century. The Jansenists maintained that in his fallen condition man is unable to do good or obey God's commandments, and that he is equally unable to resist the divine grace, through accession of which alone is salvation possible. This doctrine, closely resembling Calvinism, was asserted as a restoration of the teachings of Augustine. The Roman Catholic Church, however, repeatedly condemned Jansenism as heresy. The chief center of Jansenism was the famous Port Royal school, which was founded by the Abbé de Saint Cyran, and of which Blaise Pascal was a member. Antoine Arnauld and Pasquier Quesnel were the last great leaders of Jansenism. The movement was strongly evangelical in principle, and its propaganda was largely directed against the Jesuits.

[It. *San Gennaro*.] A Christian bishop martyred by decapitation under Diocletian and made the patron saint of Naples, in the crypt of the cathedral of which his body is preserved. In a chapel of the same are his head and two vials said to contain his clotted blood. His day is September 19.

Jan'u-a-ry (jăn'ū-ā-rĭ), *n.* [L. *Januarius*, fr. *Janus* an old Latin deity, the god of the sun and the year, to whom the month of January was sacred; cf. *janua* a door.] The first month of the year, having 31 days. The beginning of the year was changed in 1752 by English statute from March 25 to January 1, at the same time that the Gregorian calendar was adopted. See CALENDAR.—*Janiary* and *May*, an old man and his young wife who befools him, in Chaucer's "Merchant's Tale."

Ja'nus (jā'nŭs), *n.* [L. See JANUARY.] *Rom. Relig.* An ancient Roman deity, primarily god of gates and doors, hence, of all beginnings. In prayers his name was first, and his priest, *Rex sacrorum*, held foremost rank in the pontifical college. The first hour of the day, the calends of each month, and the first month (*January*) were sacred to him. His feast was the Agonium of Jan. 9. In the Forum was his double-doored shrine, ascribed to Numa Pompilius, closed only in time of absolute peace. He was represented with two opposite faces, probably symbolizing the two faces of a door. Originally he was probably god of the household door, as Vesta of the hearth, though in late myth he was made a king of early Latium. Cf. DI.

Jap'a-nese' (jăp'ȧ-nēzʹ; -nēsʹ; 277), *n.* 1. *sing. & pl.* A member of the native race of Japan, also, a native or inhabitant of Japan. The aborigines of Japan, the Ainus, were driven northward first by a mixed Mongoloid race entering from Korea, second by a Mongoloid, or possibly Polynesian, race entering from the south. The fusion of these two races, with local Ainu intermixture, forms the Japanese of the historical period, of whom two types are distinguished. The so-called aristocratic or Korean type is marked by light yellow to almost white skin, dolichocephaly, fine features, with straight or convex nose, and slender delicate physique; the plebeian type is dark brown in color, moderately brachycephalous, with prominent cheek bones, small nose, receding forehead, and sturdy physique. The eyes vary from the straight to the Mongolian type, and the stature is short. The native civilization is largely of Chinese and Buddhistic origin, but, especially in arts, of a wholly individual development. In modern times it is an eclectic commingling of the Oriental and the Occidental. The chief religions are Buddhism, Confucianism, and Shinto.

2. The language of the Japanese, an agglutinative tongue distantly related to Korean and possibly to the Ural-Altaic family of languages. It contains many Chinese loan words pronounced in the Japanese manner. In writing, Chinese ideographs are usually used for the principal words in the sentence, and characters of a syllabary called *kana* (which see) for the agglutinatives and inflectional endings. The native literature begins with the 8th century See AGGLUTINATIVE LANGUAGES

Jes'u-it (jĕz'ū-ĭt), *n.* [Cf. F. *Jésuite*, Sp. *Jesuita*, It. *Gesuita.*] **1.** *R. C. Ch.* One of a religious order founded by Ignatius Loyola in 1534, and approved by Paul III. in 1540, under the title of the Society (or Company) of Jesus. The order consists of novices, scholastics, the spiritual coadjutors, the temporal coadjutors or lay brothers, and the professed. The Jesuit novice after two years becomes a scholastic, and takes his first (simple) vows of poverty, chastity, and obedience. Some years after, at the close of a second novitiate, he takes his second vows and is ranked among the coadjutors; later he may become one of the professed, who furnish the high officials of the order. The professed are bound by a fourth vow, from which only the Pope can dispense, requiring them to go wherever the Pope may send them for missionary duty. The coadjutors teach in the schools, and are employed in general missionary labors. The Society is governed by a general who holds office for life. He has associated with him "assistants" (five at the present time), representing different provinces. They were driven out of France, Spain, Portugal, and other Roman Catholic countries before, in 1773, the order was suppressed by the Pope. They were permitted to remain as individuals in other countries, and in those, like Prussia and Russia, not in the Roman obedience, they even retained their organization. They were reëstablished in 1814. The Society was first established in the United States in 1807. The Jesuits have displayed in their enterprises a high degree of zeal, learning, and skill, but by their enemies have been generally reputed to use art and intrigue in promoting or accomplishing their purposes, whence the words *Jesuit, Jesuitical*, and the like, have acquired an opprobrious sense. Abbr. *S. J.*

2. A crafty person; an intriguer. See def. 1.

3. [*l. c.*] A form of woman's 18th-century morning gown.

Jes'u-it-ess, *n.* [Cf. F. *Jésuitesse.*] *R. C. Hist.* **a** A member of a society of women (Daughters of the Society of Jesus) founded at Rome by Isabella Rossella of Barcelona in 1545 and placed by Pope Paul III under the spiritual leadership of Loyola. It soon disbanded. **b** A member of a congregation of women founded in 1609 at St. Omer, France, by an Englishwoman, Mary Ward, for the education of girls according to the principles of the Jesuit order. It soon spread to England, Belgium, and Germany, but was suppressed in 1631 by Pope Urban VIII. for insubordination.

‖ jeu'nesse' do'rée' (zhū'nĕs' dō'rā'). [F.] Lit., gilded youth; young people of wealth and fashion, esp. if given to prodigal living; — in the French Revolution, applied to young men of the upper classes who aided in suppressing the Jacobins after the Reign of Terror.

Jew (jū; jōō; 277), *n.* [ME. *Jew, Jeu, Giw,* OF. *Jüeu, Jüieu, Gieu* (two syllables), F. *Juif,* L. *Judaeus,* Gr. Ἰουδαῖος, fr. Ἰουδαία the country of the Jews, Judea, fr. Heb. *Yĕhūdāh* Judah, son of Jacob. Cf. JUDAIC.] Orig., one belonging to the tribe or kingdom of Judah; after the return from the Babylonish captivity, any member of the new Hebrew state; hence, any person of the Hebrew race or people or any one whose religion is Judaism. The Jews of to-day do not uniformly reveal a pure Semitic type, but show evidences of intermixture in the various countries where they dwell. As a rule they are shorter than the native populations and, especially in northern Europe, more brunet. They are characteristically distinguished mainly by their features, especially by the turn of the nostrils and a peculiar cast of the eyes and eyebrows.

The *Jews* are not a race, but only a people, after all. In their faces we read its confirmation; while in respect of their other traits we are convinced that such individuality as they possess — by no means inconsiderable — is of their own making from one generation to the next, rather than a product of unprecedented purity of physical descent. *W. Z Ripley*

jew'bush' (-bo͝osh'), *n.* A West Indian euphorbiaceous shrub (*Pedilanthus tithymaloides*), possessing powerful emetic and drastic qualities.

jew'el (jū'ĕl; jōō'ĕl; 277), *n.* [ME. *juel, jowel,* OF. *juel, joel,* F. *joyau,* dim of OF. *ju, jeu,* sport, L. *jocus;* hence orig., a toy, trinket, plaything. Cf. JOKE.] **1.** A costly ornament of gold, silver, enameled work, or the like; now, usually one for personal wear and having enamel or precious stones as a part of its design.

Jewish calendar, a lunisolar calendar in use among Hebraic peoples, reckoning from the year 3761 B. C., the date traditionally given for the Creation. It received its present fixed form from Hillel II. about 360 A. D. The present names of the months, which are Babylonian-Assyrian in origin, replaced older ones, as *Abîb, Bul,* etc., at the time of the Babylonian Exile. Nineteen years constitute a lunar cycle, of which the 3d, 6th, 8th, 11th, 14th, 17th, and 19th years are leap years. The year 5663 [1902-3 A. D.] was the first year of the 299th lunar cycle. The common year is said to be *defective, regular,* or *perfect* (or *abundant*) according as it has 353, 354, or 355 days. The leap year has an intercalary month, and a total of 383 (defective), 384 (regular), or 385 (perfect, or abundant) days. The calendar is complicated by various rules providing for the harmonious arrangement of festivals, etc., so that no simple perpetual calendar can be constructed. The following table gives the months in order, with the number of days assigned to each. Only three months vary in length. They are: Heshvan, which has 30 days in perfect years; Kislev, which has 30 days in regular and perfect years; and Adar, which has 30 days in leap years. The ecclesiastical year commences with Nisan and the civil year with Tishri. The date of the first of Tishri, or the Jewish New Year, is also given for the Jewish years 5661-5696 (1900-1935 A. D.). From these tables it is possible to transform any Jewish date into Christian, or vice versa, for the years 1900-1935 A.D.

Syn. — Coalesce, conjoin, connect; incorporate, compound, mix, mingle, blend, merge. — JOIN, COMBINE, UNITE, CONSOLIDATE, AMALGAMATE agree in denoting the association, with varying degrees of closeness, of two or more objects (see MINGLE). JOIN, the most general term, may express connection of any degree of closeness; as, to *join* hands, timbers (as by a mortise *joint*), forces; "Were there not an identity in the substance, man and woman might *join*, but they could never unify" (*Coleridge*). COMBINE, rather more than *unite*, keeps in mind the elements which are associated; UNITE lays slightly greater emphasis on the resulting unity; as, the *combined* fleets of England and Japan; "In the highest [organism] . . . a great number of parts *combine* to perform each function, each part doing its allotted share of the work" (*Huxley*); "All our family are collected here . . . discoursing each their separate concerns, but all *united* into one whole" (*E. Fitz Gerald*); the *United* States. CONSOLIDATE emphasizes the compactness or stability arising from the association of the parts (see CONDENSE); AMALGAMATE emphasizes the closeness of their union; as, to *consolidate* two railroads, to *amalgamate* two races; "Imagination also shapes and creates . . . by innumerable processes; and in none does it more delight than in that of *consolidating* numbers into unity, and dissolving and separating unity into number" (*Wordsworth*); "a thorough *amalgamation* of the Saxon, Norman, and scholarly elements of English" (*Lowell*). In the main, similar distinctions hold for the corresponding nouns. See ATTACH, UNION.

join (join), *v. i.* **1.** To come together so as to be united or connected; to be joined, lit. or fig.; to be contiguous, close, or in contact; to unite; to mingle; to form a union; to enter into association or alliance; as, two rivers *join*.

b Shared by, or affecting, two or more; held, or obligating, or obligated, in common; as, a *joint* account; a *joint* fine; *joint* indictment. "A *joint* burden laid upon us all." *Shak.* Specif., in diplomacy, designating an action or expression in which two or more governments unite (distinguished from an *identic* action or expression); as, *joint* intervention; a *joint* note. At the Common law a *joint obligation*, as a joint debt, bond, contract, etc., binds each of the obligors to the performance of the entire obligation, and a judgment against one merges the obligation in the judgment; and a suit to enforce such an obligation must be brought by the obligees jointly. At the Roman law the term *joint* is applied to the rights and obligations, and the parties, concerned in common in cases of correality or solidarity. In some of the systems founded on the Roman law, as the French law of Louisiana, the Roman-Dutch law of South Africa, etc., a joint obligation imposes only a pro-rata liability, unless there has been an express assumption of the liability in solido. See SOLIDARITY. Cf. *joint and several*, below.

3. United, joined, or sharing with another or with others; not solitary in interest or action; holding in common with an associate, or with associates; acting together; as, *joint* heir; *joint* creditor; *joint* debtor, etc. (Cf. def. 2, above.) "*Joint* tenants of the world." *Donne.*

4. *Hindu Law.* Of or pert. to a joint family (see below).

joint and several, *Law*, designating, or pertaining to, the debt, credit, obligation, etc., which is held in such a way that the parties in interest are engaged both together and individually; thus a *joint and several* debt is one for which all the debtors may be sued together or either of them individually. Cf. SOLIDARITY; also, see under def. 2 **b**, above. —**j. annuity.** See ANNUITY. —**j. committee**, *Parliamentary Practice*, a committee composed of members of the two houses of a legislative body, for the appointment of which concurrent resolutions of the two houses are necessary. —**j. family**, *Hindu Law*, a commune or body composed entirely of members descended actually or by assumption (as in case of adoption) from a common ancestor through males, together with their wives and unmarried daughters, and (in its complete form) having their food, property, and idols in common. The head or manager of the joint family is elective, and does not have patriarchal powers. —**j.-life policy**, *Insurance*, a policy insuring two or more lives and made payable to the survivor upon the death of the other or others. —**j. meeting.** See JOINT SESSION. —**j. resolution**, *Parliamentary Practice*, a resolution adopted jointly by the two branches of a legislative body. —**j. rule**, *Parliamentary Practice*, a rule of proceeding adopted by the concurrent action of both branches of a legislative assembly. —**j. session**, *or* **meeting**, *Parl. Law*, a session, meeting, or sitting, of two bodies met together and acting as one body. —**j. sitting.** See JOINT SESSION. —**j. stock**, stock or capital held in company; capital held as a common stock or fund. —**j.-stock company**, *Law*, a company or association consisting of a number of individuals organized to conduct a business for gain with a joint stock, the shares owned by any member being transferable without the consent of the rest. Less often called a *joint-stock association*. At common law such a company is a form of partnership differing from the ordinary form of partnership by the transferability of shares, as in a corporation, the death of a stockholder not dissolving the company, and by the fact that the managing of the company is limited to persons specially authorized. Statutes both in Great Britain and the States of the United States provide for the organization and registration of such companies, with the effect of assimilating the companies more or less to corporations. Under the British Companies Acts companies may be incorporated with limited or unlimited liability, those with unlimited liability corresponding essentially to the ordinary corporations formed in the United States under general corporation laws. See CORPORATION, LIMITED LIABILITY. —**j.-stock savings bank.** See SAVINGS BANK. —**j. tenancy**, *Law*, a tenure by two or more persons of estate by unity of interest, title, time, and possession, under which the survivor takes the whole.

In Dutch law there is no such tenure as *joint tenancy* or joint ownership in the English sense. Persons to whom the same thing has been bequeathed, movable or immovable, take it as coöwners without any right of survivorship. *Geo. T. Morice.*

—**j. tenant**, *Law*, one who holds an estate by joint tenancy.

2. A joint; juncture. *Rare.*

3. *Law.* The joint tenancy of an estate, or the estate so held. *Obs.*, except specif.: Orig., an estate settled on a wife to be taken by her in lieu of dower; hence, under the Statute of Uses (27 Henry VIII., c. 10), as defined by Coke upon Littleton, a settlement upon the wife herself of "a competent livelihood of freehold for the wife, of lands or tenements, to take effect presently in possession or profit after the decease of the husband, for the life of the wife at least." The statute made such a jointure, known as a legal jointure, if made and expressed in the deed to be in satisfaction of the entire dower, a bar to dower (which had been revived by the statute). A settlement made otherwise than this is not a bar, except a provision made, and accepted by a woman (not being an infant) before her marriage, in lieu of dower, when equity will generally enforce it as a bar, and it is known as **equitable dower** *or* **jointure.**

jougs (jōōgz), *n.* [F. *joug* a yoke, L. *jugum.* See YOKE.] An iron collar fastened to a wall or post, formerly used in Scotland as a kind of pillory.

joule (joul; *commonly* jōōl: *see note below*), *n.* [After James P. *Joule*, English physicist.] *Physics.* A unit of work or energy which is equal to 10^7 ergs, and is practically equivalent to the energy expended in one second by an electric current of one ampere in a resistance of one ohm. One *joule* is approximately equal to .738 foot pound, or 0.24 small calorie.

☞ The proper name is pronounced *joul* (*ou* as in *out*), and this is the correct pronunciation for the unit; but the incorrect *jōōl* is very common, esp. in the United States.

joul'e-an (-ē-ăn), *a.* [See JOULE.] *Physics.* Designating heat formed by conversion from some other form of energy, as electricity. — **joulean effect,** *Elec.*, heating, or loss of power (watts), due to ohmic resistance. See JOULE'S LAW, 1.

joule'me'ter (joul'mē'tẽr; jōōl'-, *see* JOULE), *n.* An integrating wattmeter for measuring the energy in joules expended in an electric circuit or developed by a machine.

Joule's cycle (joulz; jōōlz: *see* JOULE). *Thermodyn.* The cycle for the air engine proposed by Joule. In it air is taken by a pump from a cold chamber and compressed adiabatically until its pressure is equal to that of the air in a hot chamber, into which it is then delivered, thereby displacing an equal amount of hot air into the engine cylinder. Here it expands adiabatically to the temperature of the cold chamber into which it is finally exhausted. This cycle, reversed, is used in refrigerating machines.

Joule's equivalent. The mechanical equivalent of heat. See under MECHANICAL.

Joule's law. **1.** *Elec.* The law that the rate at which heat is produced in any part of an electric circuit is measured by the product of the square of the current into the resistance of that part of the circuit. If the current (i) is constant for an interval of time (t), the energy (H) in heat units is equal to i^2Rt, R being the resistance. **2.** *Thermodyn.* The law that there is no change of temperature when a gas expands without doing external work and without receiving or rejecting heat.

jounce (jouns), *v. t.* & *i.*; JOUNCED (jounst); JOUNC'ING (joun'sĭng). [Cf. JAUNCE; perh. influenced by *bounce.*] To fall, drop, or bump so as to shake; to jolt; to shake, esp. by rough riding or by driving over obstructions.

the grand sabbatical year, which was announced by sound of trumpet; confused in Latin with *jubilum* a shout.] **1.** In this sense spelt in the A. V. & R. V. of the English Bible, **jubile.** *Jewish Hist.* An institution, a sort of exalted sabbatical year, the record of whose ordination is contained in Lev. xxv. 8–17 (part of the so-called Law, or Code, of Holiness), and which was to be kept every fiftieth year (i. e., the year following the completion of the seventh sabbatical year), its announcement to be by the sound of the trumpet on the Day of Atonement. It was to be observed by the liberation of all slaves who were Hebrews, the restoration to their former owners of all lands which had been alienated during the whole period, and by omission of sowing and reaping of any kind and even of the gathering of grapes. It is very doubtful, on account of the difficulty involved in two successive fallow years, etc., if the institution, in this elaborate form, was ever observed. Cf. SABBATICAL YEAR.

2. *R. C. Ch.* A year of remission of the penal consequences of sin, proclaimed from time to time by the Pope. An ordinary jubilee now occurs at Rome every twenty-fifth year, from Christmas to Christmas, and is extended in the following year to the rest of the Church. As established by Boniface VIII. in 1300, an ordinary jubilee was to be granted every one-hundredth year, one of the original requirements being a pilgrimage to Rome. The interval between jubilees was reduced to fifty years, then to thirty-three years, and lastly, by Paul II. in 1470, who dispensed with the requirement of a personal pilgrimage to Rome, to the present number of years. An extraordinary jubilee may be granted at any time, to the whole Church or a part of it, and is not necessarily or even usually for a whole year. The usual conditions for gaining a jubilee, of whatever kind, are three days' fasting, visiting of certain churches, praying according to the intention of the Pope, giving of alms, confession, and communion.

ju'dex (jōō'dĕks), *n.*; *pl.* JUDICES (-dĭ-sēz). [L.] *Rom. Law.* A private person appointed to hear and determine a case, having some of the functions of both the judge and the jury of English law, and corresponding most nearly to a modern arbitrator appointed by the court.

judge (jŭj), *n.* [ME. *juge*, OF. & F. *juge*, fr. L. *judex, judicis*, but influenced prob. by OF. *jugier* to judge; *jus* law + the root of *dicere* to say. See JUST, *a.*, DICTION; cf. JUDGE, *v.*, JUDICIAL.] **1.** A public officer who is invested with authority to determine litigated questions; one who gives a judgment; esp., the presiding magistrate in a court of justice. In its ordinary modern legal use the word *judge* means a presiding magistrate of a court of justice named as a "judge" in his commission; but, in wider senses, it is used to designate any person who performs one or more of the functions above mentioned, including a justice of the peace, a referee, or even a juryman, as the context indicates. In both the United States and Great Britain the term *judge* has become a general and often loose title applied informally to judicial officers of most descriptions, whatever their official designations. Thus where the members of a court are officially known as "Justices," one is often individually referred to as "Judge So-and-So" or "the Judge." So "Recorders," "Surrogates," "Chancellors," etc., are frequently called "Judge." In Great Britain "Judge" is never used as a title in social life. In America and some British possessions the custom of so using it is general.

2. a *Jewish Hist.* One of the supreme magistrates, with both civil and military powers, who governed Israel, with intermissions, for more than four hundred years after Joshua's death. **b** *pl.* [*cap.*] The seventh book of the Old Testament. It records the history of the judges, and is called in full the **Book of Judges.** See OLD TESTAMENT.

3. A person appointed to decide in a trial of skill, speed, etc., between two or more parties; an umpire; as, a *judge* in a horse race.

4. One who has skill, knowledge, or experience, sufficient to decide on the merits of a question, or on the quality or value of anything; one who discerns properties or relations with skill and readiness, a connoisseur; a critic.

> A man who is no *judge* of law may be a good *judge* of poetry, or eloquence, or of the merits of a painting *Dryden*

5. *Mining.* A kind of measuring rod.

6. *Chess.* A rook, or castle. *Obs. & R.*

2. To render judgment against; to doom; condemn. *Obs*

3. To hear and determine (a matter) judicially; to decide by judgment; to try; also, to decree or adjudge to be or be done. "Chaos [shall] *judge* the strife." *Milton.*

4. To arrogate judicial authority over; to sit in judgment upon; to be censorious toward.

> Judge not, that ye be not *judged.* *Matt* VII 1

5. To determine or pronounce upon inquiry or deliberation; to conclude or decide by the exercise of the judgment; to esteem; think; reckon.

> If ye have *judged* me to be faithful to the Lord *Acts* XVI. 15.

6. To exercise the functions of a (Hebrew) judge over; to govern. *Archaic.* "A king to *judge* us." 1 *Sam.* VIII. 5.

Syn. — See ADJUDICATE.

judge, *v. i.* **1.** To hear and determine, as in causes on trial; to decide as a judge; to pronounce judgment.

> The Lord *judge* between thee and me. *Gen.* XVI 5
> Father, who art judge
> Of all things made, and *judgest* only right! *Milton.*

2. To assume the right to pass judgment on another; to sit in judgment or condemnation; to criticize or pass adverse judgment upon others.

> Forbear to *judge*, for we are sinners all *Shak.*

3. To compare facts or ideas, and perceive their relations and attributes, and thus distinguish truth from falsehood; to exercise the judgment; to make a judgment; to determine, to discern; to distinguish; to form an opinion.

> *Judge* not according to the appearance *John* VII 24.

Judge Advocate. *Mil. & Nav.* In the United States, an officer, often, but not always, of the Judge-Advocate-General's department, appointed to act as prosecutor at a court-martial: he acts as the representative of the government, as the responsible adviser of the court, and also, to a certain extent, as counsel for the accused, when he has no other counsel. In Great Britain he represents the Judge-Advocate-General as legal adviser to the court, but does not act as prosecutor, that duty being assigned to an officer of the staff or of the prisoner's regiment.

Judge-Advocate-General, *n.* **a** In the United States, either of two officers, one attached to the War Department and having the rank of brigadier general, the other attached to the Navy Department and having the rank of colonel of marines or captain in the navy. The first is chief of the legal bureau of the army; the other performs a similar duty for the navy, and the department of each passes upon and revises the proceedings of courts-martial in its arm of the service. The Judge-Advocate-General of the army is also custodian of the titles to lands under the control of the War Department, with a few exceptions in the District of Columbia. **b** In England, one of His Majesty's judges who is the constitutional adviser of the crown as to the proceedings of courts-martial. His office has general oversight and control of all matters of military law.

judge'-made', *a.* Created by judges or judicial decision; — applied esp. to law applied or established by the judicial interpretation of statutes so as to extend or restrict their scope, as to meet new cases, to provide new or more effectual remedies, etc., and often used opprobriously of acts of judicial interpretation considered as doing this.

> The law of the 13th century was *judge-made* law in a fuller and more literal sense than the law of any succeeding century has been. *Sir Frederick Pollock.*

judg'ment, judge'ment (jŭj'mĕnt), *n.* [ME. *jugement*, F. *jugement*, LL. *judicamentum*, fr. L. *judicare.* See JUDGE, *v.*] **1.** The pronouncing of an opinion or decision of a formal or authoritative nature; also, the opinion or decision given.

2. *Law.* **a** The act of determining, as in courts, what is conformable to law and justice; also, the determination, decision, decree, or sentence of a court. **b** The obligation, esp. a debt, created by the decision or decree of a court; also, the official certificate evidencing such a decision or decree. Cf. QUASI CONTRACT, ESTOPPEL BY RECORD.

3. *Theol.* The mandate or sentence of God as the judge of all; esp., final award; the last sentence.

4. A calamity regarded as sent by God, by way of recompense for wrong committed; a providential punishment. "*Judgments* are prepared for scorners." *Prov.* xix. 29.

5. Justice; righteousness. *Obs. or Archaic.*

> For I, the Lord, love *judgment.* *Is.* lxi. 8.

6. The mental act of judging; the operation of the mind, involving comparison and discrimination, by which knowledge of the values and relations of things, whether of moral qualities, intellectual concepts, logical propositions, or material facts, is mentally asserted or formulated; as, by careful *judgment* he avoided the peril, by a series of wrong *judgments* he forfeited confidence.

> I ought to deme, of skillful *judgement*,
> That in the salte sea my wife is deed. *Chaucer*

Judgment is the Yea-No consciousness; under it I include every mode and degree of affirmation and denial — everything in the nature of an acknowledgment explicit or implicit of objective existence *G. F. Stout*

Judgment is not, in relation either to impressions, ideas, or concepts, a mechanical combination of parts which remain outside each other. It is an expression — perhaps at bottom the only expression — of the unity in which consciousness consists *B. Bosanquet*

7. The power or faculty of performing such operations (see def. 6); esp., when unqualified, the faculty of judging or deciding rightly, justly, or wisely, good sense; as, a man of *judgment*; a politician without *judgment.*

> He shall judge thy people with righteousness and thy poor with *judgment* *Ps* lxxii 2.

8. The conclusion or result of judging; an opinion; a decision; specif. *Logic.* The formal expression embodying a logical conclusion; proposition; — emphasizing the fact that what is logically important is not the form, but the meaning of a proposition, not the words, but the thought.

> She in my *judgment* was as fair as you. *Shak.*

Every *judgment* affirms an idea of reality, and therefore asserts the reality of an idea. *B. Bosanquet.*

9. A religious belief or opinion of a sectarian nature; a "persuasion;" as, the Presbyterian *judgment. Obs.*

10. *Obs* **a** The office of a judge or ruler. **b** A jurisdiction.

Syn. — JUDGMENT, SENSIBILITY, TASTE, are here compared esp. in their æsthetic relations. JUDGMENT implies nice and discriminating perception or discernment; SENSIBILITY connotes delicacy and susceptibility of feeling; TASTE includes both; as, "the faculty of *taste* or correct *judgment*" (*Worsfold*); "A rectitude of *judgment* in the arts, which may be called a good *taste*, does in a great measure depend upon *sensibility*" (*Burke*); "Persons of much *sensibility* are always persons of *taste*" (*Cowper*); "*Taste*: a . . . noble sense of harmony and high propriety" (*Swinburne*); "that *taste* which is the conscience of polite society" (*Lowell*). See TASTE, SENSE, DISCERNMENT.

3. That branch of government in which judicial power is vested; the system of courts of justice in a country; the judges, taken collectively; judicature; as, an independent *judiciary*; the Senate committee on the *judiciary*. The theory which lies at the basis of most political organizations of the present day distinguishes three great powers of government, the legislative, the executive, and the judiciary, which ought to be distinct from, and independent of, each other. This theory was advanced by Montesquieu, but is now generally discarded in political science as inaccurate and impracticable of application except in a general way. Cf. EXECUTIVE, LEGISLATURE, 1st CHECK, 6.

The distinction between the departments undoubtedly is, that the legislature makes, the executive executes, and the *judiciary* construes, the law. 10 *Wheat.* 46 (per *Marshall C. J.*).

The Supreme Court of the United States has . . . asserted the power of the United States *judiciary* to . . . pronounce an act of the legislature null and void whenever it comes into conflict with such private rights or property as, according to the interpretation placed upon the Constitution by the *judiciary*, are guaranteed in that instrument (CIV. Ju'no (jōō'nō; 243), *n.*; *pl.* JUNOS (-nōz). [L.] **1.** *Rom. Relig.* An ancient Italian goddess, consort of Jupiter, whose attributes she largely shared. The calends of all the months were sacred to her, as the ides to Jupiter. As **Ju'no Re-gi'na** (rē-jī'nä) she shared with Jupiter and Minerva the Capitoline temple and the dominant state cult. As **Ju'no Cu-ri'tis** (kū-rī'tĭs), or **Qui-ri'tis** (kwĭ-rī'tĭs), she was represented as a war goddess armed with lance and shield. As **Ju'no Sos'pi-ta** (sŏs'pĭ-tä), the savior, similarly armed, she was originally the goddess of Lanuvium, where she retained a special priesthood. As **Ju'no Lu-ci'na** (lū-sī'nä) she was goddess of childbirth; as **Ju'no Pro'nu-ba** (prō'nū-bä), of marriage. In the latter functions appears the special character of Juno as a women's goddess, in connection with which she was worshiped by them at the **Matronalia**, March 1, and at the **Nonæ Caprotinæ**, July 7. Further, every woman was supposed to have an individual *Juno*, symbolizing sex activities or powers, as the man a *genius*. In Roman myth Juno was identified with the Greek *Hera*.

Ser'e-na'tor (sĕr'ĕ-nā'tŏr), the "clearer-up of storms," etc. (2) As primarily a god of the state and guardian of its official life, Ju'pi-ter Op'ti-mus Max'i-mus (often written "Jupiter O.M."), "best and greatest," whose temple on the Capitoline (hence called also Ju'pi-ter Cap'i-to-li'nus) was founded by the Tarquins and dedicated in the first year of the Republic, 509 B. C. The flamen Dialis had charge of his cult, to which were attached both the augurs and fetiales. (3) As guardian of law, fidelity, and truth, he was called Ju'pi-ter Fĭd'i-us (= *Dius Fidius*; see FIDES), while as protector of boundaries, he was Ju'pi-ter Ter'mi-nus. Closely connected were Ju'pi-ter Fe-re'tri-us (fĕ-rē'trĭ-ŭs), the giver of victories, to whom the best of the spoils were dedicated, and Ju'pi-ter Sta'tor, who gave the army its powers of resistance. In close connection with Jupiter Optimus Maximus were Juno and Minerva, forming a triad whose worship was the central cult of the Roman Empire. See DI; cf. AMON, LIBER.

2. *Astron.* One of the planets, the brightest except Venus, and the largest of them all, its mean diameter being about 87,000 miles. It revolves around the sun in 4,332.6 days (11.86 years), at a mean distance of 5 2028 from the sun, the earth's mean distance being unity. Jupiter has four large satellites, discovered by Galileo in 1610, the first telescopic celestial objects ever found. They average in size rather larger than the moon, and revolve round the primary in periods varying from 42 h. (distance, 261,000 miles) to 16^2/$_3$ days (distance 1,167,000 miles). Barnard in 1892 found a small, faint, fifth satellite interior to these; and exterior to them, three additional very faint satellites have since been found by photography.

3. Hence: **a** *Alchemy.* Tin. *Obs.* **b** *Her.* Azure, in the old method of blazoning by the heavenly bodies.

Jupiter process. A patented process for making cast steel by melting wrought-steel scrap with about 2 per cent of ferrosilicon, up to about 0.5 per cent of ferromanganese, and about 3 per cent of aluminium, and casting in molds of a special composition. The product is about as strong and ductile as forged steel. — **Jupiter steel.**

ju'pon (jōō'pŏn; 277), *n.* [F. *jupon*, fr. *jupe* skirt, Sp. *aljuba* a Moorish garment, Ar. *jubbah*.] **1.** A surcoat or long sleeveless coat worn over the armor.

2. A woman's jacket or tunic. *Obs.*

3. A woman's skirt or upper petticoat.

Ju'ra (jōō'rä; *F.* zhü'rä'), *n.* [F. & L.] **1.** A range of mountains between France and Switzerland.

2. *Geol.* The Jurassic period. See JURASSIC.

ju'ral (jōō'răl), *a.* [L. *jus, juris*, right.] Of or pert. to law; juristic; legal; also, of or pert. to rights or obligations. — **jural person**, *Law*, a juristic person. *Rare.*

ju'rant (jōō'rănt), *a.* [L. *jurans, -antis*, p. pr. of *jurare* to swear.] Making oath; swearing; — specif. opposed to *nonjurant*. — *n.* One who makes oath.

Ju-ras'sic (jōō-răs'ĭk), *a.* [From the *Jura* mountains between France and Switzerland; cf. F. *jurassique*.] *Geol.* Designating, or pertaining to, the period of the Mesozoic era succeeding the Triassic, and the corresponding system of rocks. See GEOLOGY, *Chart.* — *n.* The Jurassic period or system; — called also the *Jura*. During the Jurassic there were extensive geographic changes, the sea invading great areas of Europe, Asia, and western North America, and lesser areas elsewhere in a later part of the period. The Jurassic seas were ruled by ichthyosaurs, plesiosaurs, and other reptiles adapted to aquatic life. On land, too, saurians (dinosaurs, pterosaurs, etc.) abounded, and many of them were of great size. Birds made their first appearance, so far as now known. Among plants, cycads reached their culmination. In the eastern half of North America Jurassic formations are not certainly known. If they exist, they constitute the lower part of the Potomac series. In the western interior of the United States the Jurassic formations are not always readily distinguished from the Triassic, and both are sometimes described under the name Jura-Trias.

ju'rat (jōō'răt; *F.* zhu'rä'), *n.* [LL. *juratus*, fr. L. *juratus* sworn, p. p. of *jurare* to swear: cf. F. & Pr. *jurat*. See JURY, *n.*] **1.** A person under oath, as a juror. *Obs. or Hist.*

2. Any of various public officials; as: **a** A municipal officer similar to an alderman in some English towns, esp. the Cinque Ports. **b** A magistrate for life in the Channel Islands, Guernsey and Jersey each having twelve and Alderney six. **c** In France, etc.: (1) A municipal magistrate, as in Bordeaux. (2) A company or corporation officer sworn to enforce the corporate law.

3. [L. *juratum*, neut. p. p. of *jurare* to swear.] *Law.* A memorandum or certificate added to an affidavit or statement under oath, properly at the end, stating when, before whom, and (in British practice) where, it was made.

ju'ra-to-ry (jōō'rä-tō-rĭ), *a.* [L. *juratorius*, fr. *jurare* to swear.] Pert. to or comprising, or expressed in, an oath; as, *juratory* obligation. — **juratory caution**, *Scots Law*, a security, sometimes used in judicial proceedings, consisting of a sworn inventory and pledge of the goods of the jurant.

Ju'ra-Tri'as, *n. Geol.* The Jurassic and Triassic, treated as one. See JURASSIC. — **Ju'ra-Tri-as'sic**, *a.*

ju'ri-bal'li } eral meliaceous trees, esp. *Trichilia moschata*, *Soymida febrifuga*, and *Khaya senegalensis*, the astringent bark of which is used as a febrifuge.

ju-rid'i-cal (jōō-rĭd'ĭ-kăl), *a.* [L. *juridicus*; *jus*, *juris*, right, law + root of *dicere* to say: cf. F. *juridique*. See JUST, *a.*; DICTION.] **1** Of or pert. to the administration of justice, or the office of a judge; acting or used in the administration of justice; as, a *juridical* custom.

The body corporate of the kingdom, in *juridical* construction, never dies. *Burke.*

2. Of or pertaining to law in general, or jurisprudence; juristic; legal.

juridical days, days on which courts are open. — **j. person**, *Law*, a juristic person. See PERSON.

Ju'rin's law (jōō'rĭnz). [After James *Jurin* (1684-1750), English physician.] *Physics.* The principle that the height of a capillary column of a liquid at a particular temperature is inversely proportional to the diameter of the tube.

ju'ris-con'sult (jōō'rĭs-kŏn'sŭlt; -kŏn-sŭlt'; 277), *n.* [L. *jurisconsultus*; *jus*, *juris*, right + *consultus* skilful, p. p. of *consulere* to consult: cf. F. *jurisconsulte*.] A man learned in law, esp. in the Civil law; a jurisprudent; a jurist.

From about a century before Christ the existence of a class of professional *jurisconsults* may be dated. Any one that had confidence in his own knowledge gave legal advice to such persons as had confidence enough in him to become his clients. . . . During the republic it was entirely voluntary for a magistrate to accept, or for any one to submit to him, advice on points of law. Nevertheless, the ignorance of the prætor and of the judices naturally made them welcome . . [such] assistance . . Augustus . . established a privileged class of authorized *jurisconsults*, to whose decisions special weight should attach. *W. A. Hunter.*

ju'ris-dic'tion (-dĭk'shŭn), *n.* [ME. *jurisdiccion, jurediccioun*, F. *juridiction*, OF. also *juredaction*, L. *jurisdictio*; *jus*, *juris*, right, law + *dictio* a saying, speaking. See JUST, *a.*; DICTION.] **1.** *Law.* The legal power, right, or authority to hear and determine a cause or causes, considered either in general or with reference to a particular matter; power to exercise judicial authority, whether in civil or criminal matters; legal power to interpret and administer the law in the premises. The jurisdictions of different courts are chiefly classified as: *original* or *appellate*; *exclusive* or *concurrent*; *civil* or *criminal*; *common-law* or *equitable*; *in rem* or *in personam*; *ancillary*, etc.

2. Authority of a sovereign power to govern or legislate; right to make or enforce laws; power or right to exercise authority; control. "Heaven's high *jurisdiction*." *Milton.*

3. Sphere of authority; the limits within which any particular power may be exercised, or within which a government or a court has authority.

Syn. — JURISDICTION, AUTHORITY are often interchangeable. But JURISDICTION applies esp. to AUTHORITY as exercised within certain defined limits; as, paternal *authority* is paramount within its *jurisdiction*. See POWER, INFLUENCE, ASCENDANCY.

ju'ris-dic'tion-al (-ăl), *a.* Of or pert. to jurisdiction; as, *jurisdictional* rights, the *jurisdictional* facts, or those necessary to found jurisdiction. — **ju'ris-dic'tion-al-ly**, *adv.*

ju'ris-pru'dence (-prōō'dĕns), *n.* [L. *jurisprudentia*; *jus*, *juris*, right, law + *prudentia* a foreseeing, knowledge of a matter, prudence: cf. F. *jurisprudence*. See JUST, *a.*; PRUDENCE.] **1.** Knowledge of or skill in law. *Obsoles.*

2. The science or philosophy of law. See LAW.

The term *jurisprudence* is wrongly applied to actual systems of law, or to current views of law, or to suggestions for its amendment, but is the name of a science. This science is a formal, or analytical, rather than material one. It is the science of actual, or positive, law. . . . It may therefore be defined provisionally as "the formal science of positive law." *T. E. Holland.*

3. Law, or a system of laws; a department of law; as, medical *jurisprudence*. (See *Citation* above.)

Still less justifiable is the use, so frequent both in French and in English, of *jurisprudence* as the equivalent of law. *T. E. Holland*

ju'ris-pru'dent (-dĕnt), *a.* [See JURISPRUDENCE.] Understanding law; skilled in jurisprudence.

ju'ris-pru'dent, *n.* [Cf. F. *jurisprudent*.] One skilled in law or jurisprudence; a jurist.

ju'ris-pru-den'tial (jōō'rĭs-prōō-dĕn'shăl), *a.* Of or pertaining to jurisprudence. — **ju'ris-pru-den'tial-ist**, *n. Rare.* — **ju'ris-pru-den'tial-ly**, *adv.*

ju'rist (jōō'rĭst; 243), *n.* [F. *juriste*, LL. *jurista*, fr. L. *jus*, *juris*, right, law. See JUST, *a.*] **1.** A lawyer. *Obs.*

2. One who professes the science of law; one versed in the law, esp. in the Civil law.

3. A university law student. *Eng.*

ju-ris'tic (jōō-rĭs'tĭk), *a.* Of or pert. to a jurist or jurisprudence; relating to, created by, or recognized in, law, legal. **juristic act**, an act of a private individual directed to the origin, termination, or alteration of a right. The characteristics of a juristic act are: the **essentialia**, or those facts without which it cannot exist; the **naturalia**, or those always presumed to be part of the transaction, though the presumption may be contradicted; the **accidentalia negotii**, or those which are not presumed and must therefore be proved. *T. E. Holland.* — **j. person.** See PERSON.

ju-ris'ti-cal (-tĭ-kăl), *a.* Juristic.

ju'ror (jōō'rẽr; 243), *n.* [OF. *jureor* one who takes oath, F. *jureur*, L. *jurator* a swearer, fr. *jurare*, *jurari*, to swear. See JURY, *n.*] **1.** One of a number of men sworn to deliver a verdict as a body; specif., *Law*, a member of a jury; also, a person duly designated and summoned to serve on a jury; a juryman.

"*Juror*" is uniformly used by the jurists most familiar with the subject as including persons designated or ordered to be summoned as *jurors*. For stronger reasons, it would include them after they are summoned and have appeared in court. *45 C. C. A.* 443.

2. A false witness; a slanderer. *Obs.*

3. A member of any jury for awarding prizes, etc.

4. One who takes oath, esp. of allegiance. *Obs. or Hist.*

ju'ry (jōō'rĭ; 243), *n.*; *pl.* JURIES (-rĭz). [OF. *jurée* an oath, juridical inquiry, fr. *jurer* to swear, L. *jurare*, *jurari*; akin to *jus*, *juris*, right, law. See JUST, *a.*; cf. JURAT, ABJURE.]

1. *Law.* A body of men sworn to give a true answer, or verdict, upon some matter submitted to them; esp., a body of men selected according to law, impaneled and sworn to inquire into and try any matter of fact, and to render their true answer, or verdict, according to the evidence legally adduced. The bodies ordinarily meant by the term *jury* are the *grand jury*, the *coroner's jury*, and distinctively the *trial*, or *petit*, *jury* (see these terms), and it is used in these senses in the earliest known cases of its use in English; the term is now historically applied to various earlier bodies (see *Citation*). It is the province of the trial jury to determine the truth of the alleged facts in a civil case, and the guilt or innocence of the accused in a criminal case. See, also, STRUCK JURY, VERDICT, CHARGE, *n.*, 15.

The essence of the *jury* — if we use the term *jury* in the widest sense that can be given to it — seems to be this: a body of neighbors is summoned by some public officer to give upon oath a true answer to some question. That question may take different forms: it may or may not be one which has arisen in the course of litigation; it may be a question of fact or a question of law, or again what we should nowadays call a question of mixed fact and law. . . . The English *jury* has been so highly prized by Englishmen, so often copied by foreigners, that its origin has been sought in many different directions. At the present day, however, there can be little doubt as to the quarter to which we ought to look. We must look to the Frankish inquisitio, the prerogative rights of the Frankish kings. *Pollock & Mait*

The decided weight of authority is that, where the right to trial by *jury* is secured by the constitution, the legislature cannot authorize a verdict by a less number than twelve, that the constitutional reservation implies a right to the concurrent judgment of that number, and any statute limiting it is unconstitutional and void. *Bouvier's Law Dict.*

2. A committee for determining relative merit or awarding prizes at an exhibition or competition; as, the *jury* on art.

3. **a** The body of dicasts of ancient Athens. See DICAST. **b** In Roman law, the judices acting in a trial. See JUDEX. **jury of inquest**, a coroner's jury. — **j. of matrons** *or* **women**, *Law*, a jury of discreet women called to determine the question of pregnancy. — **j. of the vicinage**, *Law*, formerly, a jury drawn from the neighborhood; now, a jury drawn from the county in which the court is held.

ju'ry (jōō'rĭ), *a.* [Of uncertain origin.] *Naut.* For temporary use, usually in an emergency; as, a *jury* anchor.

jury mast. **a** A temporary mast, in place of one that has been carried away, or broken. **b** *Med.* An apparatus to support the trunk and head in spinal disease.

ju'ry-man (-măn), *n.*; *pl.* -MEN (-mĕn). **1.** One who is impaneled on a jury, or who serves as a juror. See JUROR.

2. *Gr Antiq.* A dicast; — commonly, but inaccurately, so called in translations. See DICAST.

ju'ry-rigged', *a. Naut.* Rigged for temporary service. See JURY, *a.*

‖ **jus** (jŭs), *n.*; *pl.* JURES (jōō'rēz). [L.] *Law.* Law; laws, collectively; a rule or principle of law; a law; also, legal right; legal power; — dist. in Roman law from *jas* and *lex*. *Jus* is chiefly used in phrases, mostly of Roman or Civil law, some of which (as **jus o'bli-ga'ti-o'nis** (ŏb'lĭ-gā'shĭ-ō'nĭs), a right of obligation, a duty, **j. pos-ses'si-o'nis** (pŏ-zĕsh'ĭ-ō'nĭs), law or right of possession, **j. re-ten'ti-o'nis** (rē-tĕn'shĭ-ō'nĭs), right of retention) are near enough to corresponding English terms to be fairly self-explanatory. Other important phrases, not so self-explanatory, are: **j. ac'cre-scen'di** (ăk'rĕ-sĕn'dĭ), *Rom. & Civil Law*, a right of accrual, as the right of survivorship, or of a coheir to lapsed portions. — **j. ad-mi'ni-stra'ti-o'nis** (ăd-mĭn'ĭ-strā'shĭ-ō'nĭs), *Scots Law*, the right of the husband to administrate his wife's affairs, except as excluded by statute or stipulation. — **j. ad rem**, *Civil & Canon Law*, a right to a thing; a jus in personam. See IN PERSONAM a. — **j. æ'di-li'ci-um** (ē'dĭ-lĭsh'ĭ-ŭm) *or* **æ-di'li-um** (ē-dĭl'ĭ-ŭm). Law.* The right of conubium **b** Loosely, in modern writers, the body of rules and conventions of a people or community governing intermarriage. — **j. de-li'be-ran'di** (dē-lĭb'ẽr-ăn'dī) [L., right of deliberating], *Civil Law*, the right granted to an heir to take a certain time (*tempus deliberandi*) to decide whether to accept the inheritance or not (see INHERITANCE). This right formerly existed in Scots law, and the time set was at first a year (**annus deliberandi**), which was curtailed in 1858 and 1860 to six months; and now, although not expressly abolished, the right no longer exists, since the heir is no longer personally liable for the debts of his ancestor. — **j. de'vo-lu'tum** (dē'vō-lū'tŭm), *Scots Law*, a right (to present to a benefice) that has devolved upon the presbytery upon failure of presentation by (formerly) the patron or (now) the congregation. — **j. dis'po-nen'di** (dĭs'pō-nĕn'dī), right of disposal, as of goods pending fulfillment of a condition which would vest a right to them in another. — **j. di-vi'num** (dĭ-vī'nŭm), divine law or right. — **j. e'di-cen'di** (ē'dĭ-sĕn'dī) See PRÆTOR — **j. et nor'ma lo-quen'di**, the law and rule of speech *Horace (Ars Poetica*, 72). — **j. fe'ti-a'le** *or* **fe'ci-a'le** (fē'shĭ-ā'lē), the fetial law. — **j. gentium.** See in main *Vocabulary*. — **j. gla'di-i** (glăd'ĭ-ī), right of the sword; the right to put to death; i. e., executory or supreme jurisdiction. — **j. ho'no-ra'ri-um** (hŏn'ō-rā'rĭ-ŭm), *Rom. Law*, the law established by the edicts of the magistrates, consisting chiefly of the prætorian law (**jus præ-to'ri-um** [prē-tō'rĭ-ŭm]) and the law of the curule ædiles (**jus æ-di'li-um** [ē-dĭl'ĭ-ŭm] *or* **æ'di-li'ci-um** [ē'dĭ-lĭsh'ĭ-ŭm]). — **j. ho-no'rum** (hō-nō'rŭm), *Rom. Law*, the right to hold honors, that is, offices of public trust. — **j. in per-so'nam** (ĭn pẽr-sō'năm), a right in personam. See IN PERSONAM. — **j. in re** (rē), a right in rem. See IN REM. — It is enforceable by an action in rem. — **j. in rem** (rĕm), a right in rem. See IN REM. — **j. in'ter gen'tes** (ĭn'tẽr jĕn'tēz), international law. — **j. La'ti-i** (lā'shĭ-ī), *Rom. Law*, the right of a Latin, that is, of a person who has certain rights of or to Roman citizenship. Prior to the bestowal of full Roman citizenship on all Latium many Latin towns and colonies enjoyed many, if not all, of the private rights of Roman citizenship, the most important of which were the commercium and the right to acquire full citizenship on holding a magistracy or post

‖ **just'au'corps'** (*zhus'tō'kōr'*), *n.* [F., lit., close to the body.] A tight-fitting garment for the body; esp., in the dress of the 16th century and later, a variety of the doublet distinguished from others by fitting closely.

jus'tice (*jŭs'tĭs*), *n.* [ME. *justice, justise*, OF. id., F. *justice*, fr. L. *justitia*, fr. *justus* just. See JUST, *a.*] **1.** Quality of being just (in any sense).

2. The principle of rectitude and just dealing of men with each other; also, conformity to it; integrity; rectitude; — one of the cardinal virtues. Ideal justice was conceived by Plato to be obtained in perfect social harmony in beneficent activities. Aristotle held justice to be the practice of virtue toward others; he distinguished **distributive justice**, or distribution according to merit, from **corrective justice**, designed to rectify errors of distribution, and *equity* from mere *legality.* In modern ethics, the conceptions of *liberty* and *equality* as essential principles of justice are supplemented by the evolutional conception of justice as determined by social inheritance, esp. as involving *natural expectations* of human conduct. From **conservative justice**, based on natural expectation, Sidgwick has distinguished an **ideal justice**, based upon respect for the rights of the ideal member of an ideal society.

3. Righteousness; conformity to divine law. *Obs.*

4. Rightfulness; uprightness; equitableness; as, the *justice* of a cause.

5. Conformity to truth, fact, or right reason; fairness; rightfulness; truth; impartiality; as, the *justice* of a description or of a judgment, historical *justice.*

6. The maintenance or administration of that which is just; the rendering to every one his due or right; just treatment; requital of desert; also, merited reward or punishment; that which is due to one's conduct or motives. Justice when personified is usually represented as a goddess (the Roman *Justitia*) holding a sword or scales, often both. Her eyes are sometimes blindfolded or closed in token of impartiality. "This even-handed *justice.*" *Shak.*

7. Administration of law; the establishment or determination of rights according to the rules of law or equity.

8. A court of justice, or its jurisdiction; also, punishment inflicted by law.

9. Jurisdiction. *Obs.*

10. Infliction of punishment, esp. capital punishment; also, the place or instrument, as a gallows. *Obs.*

11. A person duly commissioned to hold courts, or to try and decide controversies and administer justice; a judge or magistrate; a member of the judiciary; esp.: **a** In England, a judge of the Supreme Court of Judicature, formerly of the King's Bench, Common Pleas, or Exchequer; in the United States, a judge of a common-law court or a superior court of record. **b** A justice of the peace; an inferior magistrate; as, a police *justice.*

Syn. — JUSTICE, EQUITY. In ordinary usage (for legal distinctions, see defs.) JUSTICE implies the strict and judicial rendering of what is due; EQUITY emphasizes rather the idea of fairness or even-handed impartiality; as, "*Justice* is grave, decorous, and in its punishments rather seems to submit to a necessity than to make a choice" (*Burke*); "I come before you with the plainconfidence of an honest servant in the *equity* of a candid and discerning master" (*id.*); "[In Homer] the Divine law of *justice* is conceived . . . clearly. . . . The supreme power is the . . . immortal lover of *justice* and . . . hater of iniquity" (*Froude*); "a future life . . . wherein the seeming shortcomings of the Divine administration will be carried out with larger *equity*" (*id.*). See HONESTY, RECTITUDE, FAIR, INJUSTICE.

justice of the peace, *Law*, a subordinate magistrate appointed (first in 1327) for the conservation of the peace in a specified district, with, esp. formerly in England, other incidental administrative and financial powers specified in his commission. In Great Britain and the United States his principal duties are to administer summary justice in minor cases, to commit for trial in a superior court on cause shown, and, in Great Britain, to grant licenses and act, if a county justice, as judge at Quarter Sessions. — **justices in eyre.** See EYRE. — **justice's justice,** that administered by petty or unpaid magistrates, esp. when unduly severe. *Ironical.* — **to do justice to,** to treat with fairness or according to merit; to render what is due to. — **to do (one) justice,** to pledge in drinking. *Obs.* — **to do one's self j.,** to acquit one's self in a way worthy of one's powers.

jus'tice (*jŭs'tĭs*), *v. t.*; JUS'TICED (-tĭst); JUS'TIC-ING (-tĭ-sĭng). [OF. *justicier, justisier.*] To administer justice to or in respect of. — *v. i.* To administer justice. *Obs.*

Jus-ti'ci-a (*jŭs-tĭsh'ĭ-ä*), *n.* [NL., after James *Justice*, Scotch gardener and botanist.] *Bot.* A large genus of chiefly tropical acanthaceous herbs of varied habit, having entire leaves and small white, violet, pink, or red flowers in loose cymes, the corolla bilabiate with a short limb, the lower anther cell spurred. Some species have astringent properties, others yield coloring matters; a few are cultivated for the flowers. Also [*l. c.*], a plant of this genus.

K

K (kā; *formerly also* kē). **1.** The eleventh letter of the English alphabet. It is a voiceless stopped, or mute, consonant, classed as a guttural although the position of the stop varies somewhat with the following or preceding sound. Its form and sound are from the Latin, which used the letter but little except in the early period of the language (cf. C). It came into the Latin from the Greek, which took it from the Phœnician and general Semitic letter *Kaph.* See ALPHABET, *Illust.* Etymologically K is most nearly related to *c, g, h* (which see). In many words of one syllable *k* is used after *c*, as in *crack, check, deck*, being necessary in the derivatives, as *cracked, checked, decked, cracking*, since *c* before the vowels *e* and *i* is usually sounded like *s*. Formerly, *k* was added to *c* in certain words of Latin origin, as in *musick, publick, republick*, where it is now omitted. See *Guide to Pron.*, § 191.

2. As a *symbol*, used to denote or indicate: **a** The tenth or, when J is used for the tenth, the eleventh in a series; tenth (or eleventh) in order or class; sometimes, the numeral ten (or eleven); as, Company *K*; quire *k*. **b** [*cap.*] *Astron.* A prominent Fraunhofer spectral line caused (in part) by calcium. **c** [*cap.*] *Chem.* Potassium (Kalium). **d** *Math.* (1) One of three mutually perpendicular unit vectors, the other two being *i* and *j*. (2) A frequent constant coefficient. **e** *Cryst.* See MILLER SYMBOLS. **f** *Physics.* Centuple calorie (see CALORIE). **g** *Mech.* Modulus of cubic compressibility.

3. As a medieval Roman *numeral*, K = 250; K, 25,000.

4. As an *abbreviation:* **a** In the form **K.**: Various proper names, as Katherine, Kenneth, etc.; King; Kings; Knight. **b** In the form **k.** or **K.**: king (*Chess*). Often used for various words beginning with *c*, the German equivalents of which begin with *k*, as: capacity (*Elec.*), carat (*Assaying*, etc.), constant; the (solar) constant (*Astron.*); cumulus (*Meteor.*).

K, *or* **k** (kā), *n.*; *pl.* K's or Ks (kāz). The letter K, k, or its sound; also, something of the general shape of the letter, usually of capital K.

K, *adj.* Of the general shape of the letter **K**; as, a **K** frame, or **K**-frame.

Ka-byle' (kă-bīl'), *n.* [Ar. *qabīlah* tribe, pl. *qabāil.*] A Berber of Algeria or Tunis. The Kabyles are of two types, blond and brunet; the former may represent the blond Libyans depicted on ancient Egyptian monuments. They are an agricultural, communal people, now mainly Arabic speaking, and, though Mohammedan, have little of the Arab fanaticism. See BERBER.

Kad'dish (kăd'ĭsh), *n.* [Aramaic *kaddīsh* holy, because the prayer of the ritual begins with the words in Aramaic "extolled and holy be his great name."] *Jew. Ritual.* The doxology recited in the synagogue at the close of prayers, having five forms (for scholars, individuals, congregations, burials, and mourning), and composed of praise and invocation of blessings, esp. the establishment of God's kingdom.

Kad-iak', *or* **Kod-iak', bear** (kăd-yăk'; kŏd-). A very large brown bear (*Ursus middendorffi*), found on Kodiak Island, Alaska. It is larger than the grizzly and has shorter, thicker claws. It feeds largely upon salmon. Closely related species or subspecies are found along the coast of Alaska from near Sitka to Bering Sea and in Kamchatka.

Kaf (kăf; käf), *n.* [Ar. *qāf.*] In Oriental legend, a mountain, composed of a single emerald, surrounding the world.

Kaf-fra'ri-a (kă-frā'rĭ-ă; 115), *n.* Also *Caffraria.* [See KAFIR.] *Zoögeog.* The South African province or subregion, including Cape of Good Hope, Natal, and adjacent provinces. — **Kaf-fra'ri-an** (-ăn), *a.*

Ka'fir (kä'fēr) } *n.* [Ar. *kāfir* infidel, pagan, fr. *kafara* to
Kaf'fir (kăf'ĕr) } be skeptical in religious matters, — a name given to certain infidel races by the Mohammedans.]

1. An "infidel," that is, a non-Mohammedan.

2. A native of Kafiristan, which is inhabited by the Presungalis, a primitive peaceable race, remarkable for endurance and industry, probably the earliest immigrants, and speaking a language of which practically nothing is known; the Waigulis, of different language, but of whom little is known; and the Siah-Posh, the chief Kafir people, speaking an Indo-European language, mainly herdsmen, and brave warriors, who were only in 1895, after centuries of resistance, subdued by the Afghans and compelled to accept Islam in place of their former paganism.

3. A member of the most intelligent and powerful of the Bantu races of South Africa. The country of the Kafirs proper, including the Xosa, Tembu, and Mpondo tribes, is the region between Cape Colony and Natal, but the term is often understood to cover the Zulus of Natal, and various related tribes as well. The Kafirs are among the tallest peoples in the world, and are noted for their fine physique, warlike valor, and elaborate social organization. They are mostly agriculturists and herdsmen. See BANTU.

4. *pl. Eng. Stock Exchange.* South African stocks, esp. land or mining stocks.

Kafir, *or* **Kaffir, boom** (bōōm), a South African fabaceous tree (*Erythrina caffra*), the soft wood of which is used locally for shingles. — **K. bread,** the farinaceous pith of the Hottentot

Kant'i-an (kăn'tĭ-ăn), *a.* Of or pert. to Immanuel Kant, the German philosopher ; conformed or relating to the doctrines of Kant. — **Kantian philosophy.** = KANTIANISM.

Kant'i-an, *n.* A follower of Kant ; one who holds or advocates the philosophical views of Kant or doctrines directly derived from them.

Kant'i-an-ism (-Iz'm), *n.* The philosophy of Immanuel Kant (1724–1804), founder of the Critical System of Philosophy, so called because it is presented in the form of three Critiques, that of the Pure Reason (1781) ; of the Practical Reason (1788) ; of the Judgment (1790). Kant tells that he was aroused from his dogmatic slumber by the skepticism of Hume, who explained the law of causality as originating in habit — "the habit of surveying things constantly conjoined with each other." Kant by a searching analysis of experience discovered that while its contents or matter comes from sense perception, its form is given a priori and comes from the activity of the mind itself. Time and space are thus given to sense impressions, to make possible their projection as objects in the form of things and events. Again, such categories of the understanding as unity, plurality, and totality ; reality, negation, limitation ; substance and cause, possibility, existence, and necessity, — all express activities of the mind itself, which we transfer to nature in the process of knowing it. A third coefficient is added by the ideas of the reason, God, freedom, and immortality, which relate to the unconditioned, and furnish ultimate presuppositions of the world of experience. Thus Kant opposes to Hume's explanation of causality, as resting on custom or habit, a theory which makes this important element of experience originate in the mind's own activity. But because of this doctrine he denies to the mind a knowledge of things-in-themselves. Experience, according to him, knows only phenomena. The mind furnished the forms of experience and the sense organs furnish only impressions. Our knowledge is therefore only subjective. But Kant in his Critique of the Practical Reason shows the utter indispensableness of a belief in God, freedom, and immortality, if we are to have the institutions of civilization. And in the Critique of the Judgment he further shows that Art and Literature rest on an a priori idea of the Beautiful ; and that without the a priori idea of intelligent purpose or design in nature we could not recognize any phenomena of life in plants or animals or other organisms. It follows from this that we could not interpret vocal or written signs, and therefore could not invent nor learn language. Even if we could think we could not express our thoughts nor participate in the thoughts of one another. It remained for the followers of Kant to see that his agnosticism was gratuitous. For he had endowed man so richly by making him the originator of all the forms to be found in experience — which make blind sensations into an organized world — that it occurred at once to such thinkers as Fichte, Schelling, and Hegel, who took an inventory of the sum of human knowledge by experience, that its entire wealth consisted in forms imposed by us upon a chaotic series of sense impressions void and formless until mind gives them time and space, quantity, causal relations, and a divine purpose. The world that we know as the world of experience is the same world that Kant analyzed in his Critiques, and it makes no difference, except a verbal one, whether we say that the world of our experience is subjective and phenomenal or that the world of our experience is objective and real. For in any case we divide the world of experience, such as it is, into subject and object and their union, and thus make an exhaustive inventory. We have no ground for setting up an objectivity other than the objectivity inventoried in our world of experience. The agnosticism of Kant and the systems of philosophy founded on the later interpretations of his results, taken together, make a modern philosophy based on psychology, while the ancient philosophy created and formulated by the Greek thinkers was ontological in method and results. But both systems agree (according to Hegel) in their ultimate views of man and nature See FICHTEANISM, SCHELLINGISM, HEGELIANISM. *W. T. Harris.*

Kan'to-He-ge'li-an (kăn'tō-hā-gā'lĭ-ăn ; -hē-gē'lĭ-ăn), *a.* Pertaining to Kant and Hegel or their doctrines ; broadly, designating, or pertaining to, the modern idealism which takes its rise from the teachings of Kant and Hegel.

ka-thar'sis (*kä*-thär'sĭs), *n.* [Gr. κάθαρσις, fr. καθαίρειν to cleanse.] A word used by Aristotle in his famous definition of tragedy to describe the effects produced on the spectator. "Through pity and fear working a purification of these emotions." In 1857 Jacob Bernays published an essay on it which drew out seventy or more treatises from distinguished scholars on the meaning of the word *katharsis* in this place The poet shows us tragic deeds followed by their necessary consequences, and thus produces pity for the well-intentioned tragic character and terror if his mistakes are such as we should commit under like circumstances The world wisdom of a people is largely derived from its national poets, not as a moral philosophy, but as a vicarious experience. Aristotle held that tragedy purifies the spectator by showing him how his feelings and convictions will result when carried out. (See what he says of the tragic plot — "the soul of tragedy") Without making the experience himself, he profits by participating in the world experience depicted for him by the poet It is more or less in human nature to recoil against direct advice, especially moral advice We do not like to have its application made personal; but in the work of art we see the moral energies of society acting upon ideal personages, and the lesson to the spectator is more impressive and more wholesome, because it is accepted by him in his freedom, and not imposed upon him by external authority. *W. T. Harris.*

kermes mineral. A soft reddish brown powder consisting essentially of antimony trisulphide, but usually containing also oxide and alkali, probably in the form of a pyroantimonate. It is prepared in various ways, and was formerly much used as an alterative, diaphoretic, and emetic. Kermesite is a native form.

ker'mis (kûr'mĭs), **ker'mess** (-mĕs), *n.* [D. *kermis;* cf. G. *kirmes;* prop., church mass. See CHURCH; MASS a religious service.] **a** In and near the Low Countries, a local outdoor festival and fair, orig. held annually on the feast day of the local patron saint or of the chief church. **b** In the United States, an indoor entertainment and fair

kern, kerne (kûrn), *n.* [Ir. *ceatharnach* a foot soldier, *ceatharn* a band of soldiers. Cf. CATERAN.] **1. a** A light-armed foot soldier of the Celtic populations of Ireland or (by extension) Scotland; — used chiefly of medieval times; also, a body of kerns collectively. Cf. GALLOGLASS. **b** A rude peasant of the wilder parts of Ireland, such as those from whom the military kerns were largely recruited.

A bare-legged Irish *kerne,* whose only clothing is his ragged yellow mantle, and the unkempt "glib" of hair *C. Kingsley.*

2. Any boor or rustic person. *Obs. or R.*

kern (kûrn), *n.* [Cf. D. & G. *kern* kernel, E. *kern* to harden, *kernel.*] Kernel; corn; grain. *Rare.*

kern, *v. t. & i.* [ME. *kernen, curnen;* akin to E. *corn.* See CORN, KERNEL.] To corn, or harden; to granulate; salt. *Chiefly Dial. Eng., Scot., & Ir*

kern, *n.* [F. *carne* a projecting angle, L. *cardo, cardinis,* a hinge. *Oxf. E. D.*] *Type Founding.* A part of the face of a type which projects beyond the body, or shank.

kern, *v. t.;* KERNED (kûrnd); KERN'ING. *Type Founding.* To form with a kern, also, to smooth (type) about the kern.

kern, *n.* [G., prop., kernel.] *Math.* The area bounded by the curve whose envelope is the locus of the antipoles of the limits of the entire sectional area under consideration; — usually called a *central kern.*

ker'nel (kûr'nĕl), *n.* [ME. *kernel, kirnel, curnel,* AS. *cyrnel,* fr. *corn* grain. See CORN.] **1.** A seed, as that of an apple or grape. *Obs. or Dial. Eng.*

2. A kerchief.

3. The inner portion of a seed within the integuments, consisting of the embryo and endosperm or perisperm; — used generally of edible seeds, and hence of the endocarp in nuts, drupes, or other seedlike fruits; as, the *kernel* of a walnut; the *kernel* of a peach stone.

4. A gland or glandlike body; a tonsil. *Obs. or Dial.*

5. The central, substantial, or essential part of anything; the gist; the core; as, the *kernel* of an argument.

Kernel of Deuteronomy, *Old Test. Criticism,* the contents of the earliest form of Deuteronomy, probably comprising chapters v.–xxvi., and xxviii. (according to some, xii.–xxvi.), with which various critics include other passages.

ker'nel (kûr'nĕl), *v. i.;* -NELED (-nĕld) or -NELLED; -NEL-ING or -NEL-LING. To harden or ripen into kernels; to produce kernels.

ker'nel, *v. t.* To inclose as a kernel.

ker'neled, ker'nelled (kûr'nĕld), *a.* Having a kernel.

ker'nel-ly (-nĕl-ĭ), *a.* Full of kernels; resembling kernels; of the nature of kernels.

ker'nos (kûr'nŏs), *n.* [Gr. *κέρνος.*] *Class. Archæol.* A vessel comprising several small cups or vases joined together. It appears to have been used at the Eleusinian mysteries for carrying first fruits.

ker'o-sene' (kĕr'ō-sēn'), *n.* [Gr. *κηρός* wax.] An oil used for illuminating purposes, formerly obtained from the distillation of mineral wax, bituminous shale, etc., and hence called also *coal oil.* It is now produced in immense quantities by the distillation and purification of petroleum. See PETROLEUM. Chemically, kerosene is a mixture of several hydrocarbons, chiefly of the methane series. The oil is known in the trade as **water-white, superfine white, prime white, standard white,** or **good merchantable,** according as it is colorless or of increasing yellowish tint. The flashing point (which see), however, is of much more importance.

Ker'ri-a (kĕr'ĭ-ā), *n.* [NL., after William *Kerr,* English gardener.] *Bot.* A genus of Japanese rosaceous shrubs related to *Spiræa,* consisting of a single species (*K. japonica*), which has slender branches and solitary bright yellow flowers. It is sometimes called the *Japanese rose.*

ker'ry (kĕr'ĭ), *n.; pl.* -RIES (-ĭz). [From *Kerry,* county in Ireland.] One of an Irish breed of small, entirely black cattle, noted for the quality of their milk.

Kerry Hill. A mountain breed of English sheep having short wool and black and white speckled faces. They resemble the Downs.

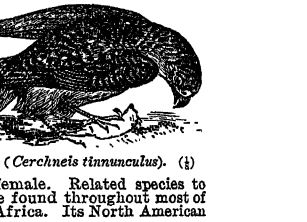
ker'san-tite (kĕr'zăn-tīt), *n. Petrog.* A variety of diorite containing an abundance of biotite, often occurring in dikes. First from Kersanton, France.

ker'sey (kûr'zĭ), *n.; pl.* -SEYS (-zĭz). [Prob. from town of *Kersey* in Suffolk, Eng.] **1.** A kind of woolen cloth, usually coarse and ribbed, woven from wool of long staple. Kersey was manufactured in England as early as the 13th century. It was used esp. for hose.

2. *pl.* Varieties of kersey; trousers made of kersey.

ker'sey-mere (-mēr), *n.* [For *cassimere,* confounded with *kersey.*] A kind of woolen cloth = CASSIMERE.

kes'trel (kĕs'trĕl), *n.* [Formerly also *castrel;* cf. F. *crécerelle,* OF. *quercerelle.*] A common small European falcon (*Cerchneis tinnunculus,* syn. *C. alaudarius*) noted for its habit of hovering in the air against a wind. It is about a foot long, and largely bluish gray above in the male and reddish brown in the female. Related species to which the name is applied are found throughout most of Europe, Asia, and northern Africa. Its North American ally is the sparrow hawk.



Kestrel (*Cerchneis tinnunculus*). (½)

☞ This word is often used in contempt, as of a mean kind of hawk. "Kites and *kestrels* have a resemblance with hawks." *Bacon.*

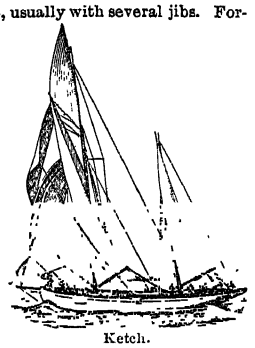
ke'tate (kē'tāt), *n.* [*ketone* + *-ate.*] *Chem.* An ether from a ketone, of the general formula $\frac{X}{Y}C{<}\frac{OR}{OR'}$.

ke'ta-zine (kē'tā-zĭn; -zēn; 184), *n.* Also **-zin.** *Org. Chem.* A compound of the general formula $\frac{X}{Y}C=N\cdot N=C{<}\frac{R}{R'}$, got by treating a ketone with hydrazine.

ketch (kĕch), *n.* [See JACK KETCH.] A hangman. — *v. t.* To hang.

ketch (kĕch), *n.* [Prob. fr. *catch,* n. or v.] *Naut.* A fore-and-aft rigged vessel with mainmast and small mizzen set

forward of the rudder post, usually with several jibs. Formerly the ketch often had square sails on one or both masts and had the mainmast stepped almost in the middle, leaving a long free forward deck. In this shape it was much used as a bomb vessel.



Ketch.

The difference between the *ketch* and the yawl is this: in the yawl the mizzenmast is stepped abaft the rudder post, and in the *ketch* forward of it. *T. F Dav.*

ketch'up (kĕch'ŭp), *n.* [Malay *kĕchap;* perh. of Chin. origin.] Catchup.

ke'tene (kē'tēn), *n. Org. Chem.* A colorless gas, $H_2C{\cdot}CO$, of penetrating odor, prepared by decomposition of acetone, ethyl acetate, or acetic anhydride by high heat, as in the electric arc.

ke-thib' (kē-thēb'), *p. p.* Also *kethibh*, *ketıb*, and *k'thibh*. [Heb. *kĕthīb.*] *Bib.* Lit., written; — used to note that a reading of the Hebrew Bible is that of the text. — *n.* The reading itself so noted. See KERE.

ke'tine (kē'tĭn, -tēn; 184), *n.* Also **-tin.** [See KETONE.] *Chem.* Any of a series of bases got by reducing certain isonitroso compounds of the ketones, esp. $C_4H_2(CH_3)_2N_2$, got by reducing isonitroso-acetone. In general they are unstable oily substances of a pungent aromatic odor.

ke-tip'ic (kē-tĭp'ĭk), *a.* [*ketone* + *adipic.*] *Chem.* Pertaining to or designating an unstable acid, $CO_2H{\cdot}CH_2{\cdot}CO{\cdot}CO{\cdot}CH_2{\cdot}CO_2H$, obtained in the form of an ester by the action of sodium on a mixture of oxalic ester and acetic ester. The free acid is a white amorphous powder.

ke'to- (kē'tō-). *Org. Chem.* A combining form denoting *the presence of the ketone group;* as, *keto*hexose.

ke'tol (kē'tōl; -tŏl), *n.* [*ketone* + *indol.*] *Org. Chem.* **a** A compound which is both a ketone and an alcohol; as, methyl *ketol*, CH_3COCH_2OH. **b** = INDOL.

ke'tone (kē'tōn), *n.* [Cf. ACETONE.] *Org. Chem.* A compound containing the carbonyl group (CO) united with two hydrocarbon radicals (or with a single bivalent radical). If these radicals are alike, the ketone is said to be *simple;* if unlike, the compound is called a *mixed* ketone. The ketones are in general colorless volatile liquids having a pungent ethereal odor, or (if of high molecular weight) crystalline solids. They are closely related to the aldehydes, and are obtained by the distillation of certain salts of organic acids, by the oxidation of secondary alcohols, and in other ways. Acetone is the best-known ketone. The simple ketones are named by adding *-one* to the stems of the organic acids from which they are derived; thus, *acetic* acid gives *acetone*, *butyric* acid, *butyrone*, etc.

ketone group. *Org. Chem.* The characteristic group of ketones; carbonyl, —CO—, united as in a ketone.

ke-ton'ic (kē-tŏn'ĭk), *a. Chem.* Pert. to, or derived from, a ketone. — **ketonic acid,** a compound which is both a ketone and an acid, as pyroracemic acid, $CH_3{\cdot}CO\ CO_2H$.

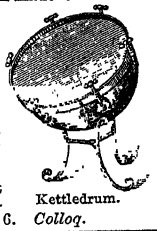
ke'tose (kē'tōs), *n.* [*ketone* + *-ose.*] *Chem.* A ketonic sugar. See MONOSACCHARIDE.

ke-tox'ime (kē-tŏk'sĭm; -sēm), *n. Chem.* A ketonic oxime; — distinguished from *aldoxime.*

ket'tle (kĕt'l), *n.* [ME. *ketel;* cf. AS. *cetel, cetil, cytel;* akin to D. *ketel*, G. *kessel*, OHG. *chezzil*, Icel. *ketill*, Sw. *kittel*, Dan. *kjedel*, Goth. *katils;* all perh. fr. L. *catillus*, dim. of *catmus* a deep vessel, bowl.] **1.** A metallic vessel for boiling liquids; a pot or cauldron; now, esp., a teakettle. **2.** The contents of a kettle; a quantity or mess cooked or treated in a kettle at one time. **3.** A shallow metal pail; as, a *kettle* of beer; a dinner *kettle. Local, U. S.* **4. a** The box of a compass. **b** *Mining.* A shallow kibble to raise or lower miners or material in the shaft. *Scot.* **c** *Geol.* (1) A pothole. (2) = KETTLE HOLE. **5.** Short for KETTLEDRUM.

kettle of fish. **a** Orig., *Scot.*, a kettle of fish cooked on a boating picnic; hence, a picnic. **b** Hence, a muddle; mess; a confused or awkward state of affairs; — usually in the phrase a *fine, nice, pretty,* etc., *kettle of fish.* — **k. of hats,** the hats dyed in a kettle at the same time. *Trade Term.*

ket'tle-drum' (-drŭm'), *n.* **1.** A drum made of a hollow hemisphere of thin copper or brass with parchment stretched over the mouth, which can be tuned, usually by means of screws, to a definite pitch. *Kettledrums,* in pairs, were formerly used in martial music for cavalry, but are now chiefly confined to orchestras, where two or more, differently tuned, as to the tonic and dominant of the piece performed, are technically called *tympani.*



Kettledrum.

2. A kettledrummer. *Obs.* **3.** An informal party at which a light collation is served, held in the afternoon or early evening. Cf. DRUM, *n.*, 6. *Colloq.*

kettle hole. *Geol.* A steep-sided hollow, without surface drainage, esp. in a deposit of glacial drift.

kettle moraine. *Geol.* A terminal moraine the surface of which is marked by many kettle holes.

kettle stitch. [G. *kettelstich;* cf. *kette* chain.] *Bookbinding.* The chain stitch made at the head and tail of a book in fastening the threads of contiguous sheets.

ket'u-ba (kĕt'ōō-bä'), *n.* [Heb. *kethubāh* document.] A Jewish marriage contract. It provides for a money settlement payable to the wife at divorce or at the husband's death. It was instituted by the rabbis to check divorce.

Keu'per (koi'pĕr), *n.* [G.] *Geol.* The upper division of the German Trias. See GEOLOGY, *Chart.* — **Keu'per,** *a.*

kev'el (kĕv'l), *n.* Also *cavel, cavil.* [Orig. uncert.; cf. GAVEL a mallet.] A kind of hammer or ax hammer for roughly shaping stone.—*v. t.* To break (stone) with a kevel.

kev'el (kĕv'l), *n.* [Prob. fr. OF. *keville,* dial. form of *cheville* peg; but cf. also Icel. *kefli* a stick.] *Naut.* A strong cleat or bollard to which sheets, etc., are belayed.

Ke'wee-naw'an (kē'wē-nô'ăn), *a.* [From *Keweenaw* Point, Michigan.] *Geol.* Designating a major division of the Proterozoic or Algonkian in the Lake Superior region. See GEOLOGY, *Chart.* The system includes a body of igneous rock of prodigious thickness, conglomerates, and sandstones. The copper-bearing rocks of the Lake Superior region are a part of the system. — **Ke'wee-naw'an,** *n.*

kex (kĕks), *n.* [Cf. W. *cecys,* pl., hollow stalks, *cegid* hemlock, Corn. *cegas,* L. *cicuta.*] **1.** The dry stalk of various hollow-stemmed plants, esp. certain tall umbellifers, as cow parsnip, wild chervil, etc. *Chiefly Dial. Eng.* **2.** Hemlock. *Now Chiefly Dial. Eng.* **3.** The covering or integument of a chrysalis. *Obs.*

key (kē), *n.* [Sp. *cayo,* of Celtic origin; cf. W. *cae* hedge, inclosure, Breton *kae* hedge, wall, embankment, quay. Cf. QUAY.] A low island or reef, as one of the coral islets on the southern coast of Florida.

key (kē), *n.* [ME. *keye, key, kay,* AS. *cǣg.*] **1.** An instrument by means of which the bolt of a lock is shot or drawn; usually, a removable metal instrument with wards shaped to fit to the mechanism of a particular lock and operated by turning or pushing. The possession of the keys of a town, a building, or the like, has been often made the symbol of authority, possession, official position, etc. **2.** That which affords or prevents entrance, control, or possession, etc.; as, the *key* of a line of defense; the *key* of a country; the *key* of a political situation. Hence, that which serves to unlock, open, discover, or solve something unknown or difficult, as, the *key* to a riddle. Cf. POWER OF THE KEYS. **3.** A simplified version or analysis which accompanies something as a clue to its explanation, as an outline map, a word-for-word translation, a book or table containing the solutions to problems, ciphers, allegories, or the like, or a table or synopsis of conspicuous distinguishing characters of members of a taxonomic group. **4.** The mainstay; a leading person or principle; specif., in a pack, one of the best hounds. *Obs.* **5** A tool or other device resembling a key in form or function, as an instrument which is turned like a key in fastening or adjusting anything, as a watch *key,* a compass *key,* a tuning hammer, a spanner or wrench, or the like. Specif.: **a** A dentist's rotary extracting instrument. **b** *Ordnance.* A bolt for securing the cap square to the cheek in a gun carriage. **c** *Bookbinding.* Any of the metal **U**-shaped devices used to secure the bands in position in the sewing press. **6.** *Mach.* **a** A comparatively small, slightly tapered piece with parallel sides, used for wedging pulleys, cranks, etc., on shafts. The three distinct types are: **saddle key,** concaved to fit a turned shaft; **key on flat,** which fits on a flattened seat on the shaft; **sunk key,** which fits into a keyway in the shaft. See CONE KEY, FEATHER KEY. **b** See GIB AND COTTER. **c** A cotter, split pin, or the like. **7.** *Carp.* **a** A slightly tapered piece of wood driven in a mortise between the parts of a scarfed joint to bring them together. **b** A strip of wood inserted in a piece of timber across the grain to prevent casting. **c** The last board laid in a floor. **d** The rough surface on the "wrong" side of a veneer to hold the glue. **8.** *Building.* **a** The plastering forced between the laths to hold the rest in place; the hold which plaster has on a wall, or the roughness of the wall affording this hold. **b** A hollow in a tile or the like to hold mortar or cement. **c** A keystone or similarly placed stone or voussoir in an arch. **9.** A wedge to split a tenon in a mortise, or the end of a shaft in a hammer head, or the like, to tighten its hold. **10.** *Masonry.* **a** A wedge of metal or the like used to make a dovetail joint in a stone. **b** A wedge driven between two feathers to break a stone. See PLUG AND FEATHER. **11. a** In keyboard musical instruments, one of the levers, or esp. the exposed front end of it, by depressing which the player actuates the mechanism that produces the tones. It may be a finger lever or *digital,* or, when played by the foot, a *pedal.* See KEYBOARD, and ORGAN, *Illust. of Action.* **b** A valve lever by which the player's finger opens or stops a vent in the side of a flute, clarinet, or similar instrument; also, in a valve instrument, as the cornet, the projecting tip of a piston with a disklike cap for the finger to press on, or a similar valve disk or button on the accordion, etc. **12.** *Music.* **a** The lowest note, or keynote, of a scale. *Obs.* **b** A system or family of tones based on their relation to a keynote, from which it is named; the tonality of a certain scale; as, the *key* of C major. Its diatonic tones in their ascending order in either major or minor mode are called: 1 (and 8), *keynote,* or *tonic;* 2, *supertonic;* 3, *mediant;* 4, *subdominant;* 5, *dominant;* 6, *submediant;* 7, *subtonic,* or *leading tone.* Chromatic tones, as temporary members of a key, are called by such names as "sharp

Signatures and Letter Names of the Keys.

four," "flat seven," etc. In the modern system of tempered scales, the keys of C major and *a* minor are called **natural,** because their scales are played on the "naturals," or white keys, of a keyboard. The other keys are **sharp keys** or **flat keys** according as their scales use one or more sharps or flats. A major and a minor key using the same signature are **relative keys,** as to each other. The triads on the dominant and subdominant, which bear the closest harmonic relation to the tonic, are, with the tonic triad, the principal chords of a key, comprising together its diatonic tones. **Related keys** are such as have keynotes in close relation, as of tonic, dominant, and subdominant. Keys in which this relation is distant or lacking are **remote keys,** as to each other. **c** The total harmonic and melodic relations of such a family of tones; tonality; as, a delicate sense of *key.* **13.** General pitch or tone of the voice; also, a certain tone of voice; as, a plaintive *key.*

The *key* in which speakers pitch their utterances depends partly on their vocal organs, men naturally using a lower *key* than women and children. *L. Soames.*

14. Hence: Characteristic style, tone, or intensity of thought, feeling, or action, etc.; as, his writings are all in the same *key.*

You fall at once into a lower *key.* *Cowper.*

15. a In such instruments as the typewriter, linotype, etc., any of a set of levers analogous to the keys of a pianoforte. **b** *Elec.* Any device for closing or opening an electric circuit; specif., *Teleg.,* a metallic lever for rapidly and easily opening and closing the circuit of the sending or transmitting part of a station equipment. **16.** *Bot.* = KEY FRUIT. **17.** = KEY MONEY. *Eng.* **18.** *Advertising.* The matter used to key an advertisement. See KEY, *v. t.,* 4.

key and Bible, a form of divination to discover a thief (or, in modern play, the name of a sweetheart, husband or wife to be, etc.), in which a Bible is suspended by a key placed at Ps. l. 18: "when thou sawest a thief." Names are read, and the turning or falling of the book designates the person. — **k. of art.** *Alchemy.* = ALEMBEROTH. — **k. of life,** the ankh. — **K. of the North,** the ancient castle of Newark-on-Trent, Nottinghamshire, Eng., dismantled at the close of the Civil War. — **k. on fiat.** See def. 6 **a,** above. — **to have the k. of the street,** to be locked out; to have no house to go to. *Humorous.* — **under k.,** under lock and key. *Obs.*

key (kē), *v. t.;* KEYED (kēd), KEY'ING. **1.** To lock or fasten with a key; to fasten firmly; to fix, adjust, or determine, the key or keys of. See KEY, *n.* **2.** Specif.: *Mech.* **a** To secure by means of a key, as a hammer head to a haft, a pulley on a shaft, or plaster to lathing. **b** To finish off (an arch) by inserting the keystone; — sometimes with *in* or *up.* **3.** *Music.* To regulate the pitch of; as, to *key* the strings; — usually with *up.* **4.** *Advertising.* To insert in (an advertisement) some direction or other matter intended to identify answers to it. **to key up,** to produce or cause a nervous tension in, as, *keyed up* to company manners.

key block. *Quarrying.* A block blasted out to permit removal without injury of an adjacent block or blocks.

key'board' (kē'bōrd'; 201), *n.* **1.** The bank or row of keys on an organ, clavichord, harpsichord, pianoforte, etc., on which the performer plays. With the modern system of tempered scales, the keyboard consists of a double row

D.*] **1.** In vertebrates, one of a pair of glandular organs, situated in the body cavity near the spinal column, which serve to excrete urea, uric acid, and various other harmful or superfluous substances; a urinary or renal organ. In invertebrates, the term is extended to organs of similar function variously situated (cf. NEPHRIDIUM, ORGAN OF BOJANUS, GREEN GLAND, etc.). In man the kidneys are bean-shaped organs, about four inches long, situated in the back of the abdomen, behind the peritoneum, and embedded in a mass of fat. They consist chiefly of a mass of epithelium-lined tubules (the *uriniferous tubules*) which collect and discharge the secretion, urine, into the main cavity, or pelvis, of the organ, whence it is led by a long tube (the ureter) to the bladder to be periodically discharged. Each tubule terminates in the cortical part of the kidney in a filtering apparatus (the Malpighian capsule) to which blood is brought by a small branch of the renal artery. A plexus of capillaries also surrounds other parts of the tubules, and as the fluid which has filtered through the Malpighian capsule passes along the tubule, it is further modified by the secretory and absorbent activities of the epithelium. In the embryos of the higher vertebrates the excretory organ of each side consists of three parts, called from their situation the *pronephros, fore kidney* or *head kidney;* the *mesonephros, mid kidney*, or *Wolffian body;* and the *metanephros*, or *hind kidney*. The pronephros is rarely functional in the adult (only in a few of the lower vertebrates) and usually disappears. The mesonephros usually (or, as many believe, always) forms the functional kidney in adult fishes and amphibians (no metanephros being developed except perhaps in elasmobranchs), but in the reptiles, birds, and mammals the mesonephros, though functional in the embryo, atrophies and is superseded by the metanephros.

ki-ne'si-at'rics (kĭ-nē'sĭ-ăt'rĭks; kī- ; 277), *n.* [*kinesi-* + Gr. *ἰατρικός* pert. to medicine, fr. *ἰατρός* a physician.] *Med.* A mode of treating disease by appropriate muscular movements. — **ki-ne'si-at'ric** (-ăt'rĭk), *a.*

kin'e-sim'e-ter (kĭn'ē-sĭm'ē-tẽr; kī'nē-), *n.* [*kinesi-* + *-meter*.] *Physiol.* **a** An instrument for testing the sensitiveness of the skin to heat and cold. **b** An instrument for measuring movements.

ki-ne'si-om'e-ter (kĭ-nē'sĭ-ŏm'ē-tẽr; kī-), *n.* [See KINESIMETER.] A kinesimeter (in sense **b**).

ki-ne'si-o-neu-ro'sis (-ō-nū-rō'sĭs), *n.* [NL.; *kinesi-* + *neurosis*.] *Med.* Nervous affection by disorder of movement.

kin'e-sod'ic (kĭn'ē-sŏd'ĭk; kī'nē-), *a.* [*kinesi-* + Gr. *ὁδός* way.] *Physiol.* Conveying motion; as, *kinesodic* substance; — applied esp. to the spinal cord, because capable of conveying both voluntary and reflex motor impulses, without itself being affected by motor impulses applied to it directly.

ki-net'ic (kĭ-nĕt'ĭk; kī- ; 277), *a.* [Gr. *κινητικός*, fr. *κινεῖν* to move.] *Physics.* Of, pert. to, or due to, motion; — often contr. with *potential*; as, *kinetic* energy (see ENERGY, *n.*, 5).

kinetic symmetry. *Math.* **a** A kind of symmetry which a rigid body has about its center of inertia when its moments of inertia about three principal axes through that point are equal. **b** A kind of symmetry which a rigid body has about an axis when this axis is one of the three principal axes through the center of inertia and the moments of inertia about the other two (and therefore about any line in their plane) are equal. — **k. theory,** *Biol.*, a theory of evolution in which the innate tendency of organisms to variation (responding to external conditions) is regarded as sufficient in itself to account for evolution. — **k. theory of gases,** *Physics*, a theory that gases consist of minute particles which move in straight lines with high average velocity, constantly encountering one another, and hence continually changing their individual velocities and directions. Many phenomena of gases are consistently explained by it.

ki-net'i-cal (-ĭ-kăl), *a.* Of or pertaining to kinetics.

ki-net'ics (-ĭks), *n.* *Physics & Mech.* That branch of dynamics which treats of the changes of motion produced by forces. See DYNAMICS.

ki-ne'to- (kĭ-nē'tō-; kī-). A combining form from Greek *κινητός, movable.*

ki-ne'to-cam'er-a (-kăm'ẽr-a), *n.* [*kineto-* + *camera*.] A camera to take photographs of the movements of persons or objects, as for reproduction with the kinetoscope.

ki-ne'to-scope (kĭ-nē'tō-skōp; kī-), *n.* [*kineto-* + *-scope*.] **1.** An instrument for producing curves by the combination of circular movements, — called also *kinescope*.

2. A machine for producing animated pictures (on the principle of the cinematograph) in which a film carrying successive instantaneous views of a changing scene travels across the field of a magnifying glass. The observer sees each picture, momentarily, through a slit in a revolving disk.

ki-ne'to-scop'ic (-skŏp'ĭk), *a.* Of or pert. to a kinetoscope.

king (kĭng), *n.* An ancient Chinese musical instrument, consisting of resonant stones or metal plates, hung according to pitch in a wooden frame, and struck with a hammer.

king (kĭng), *n.* [AS. *cyng, cyning*; akin to OS. *kuning*, D. *koning*, OHG. *kunung*, G. *König*, Icel. *konungr*, Sw. *konung*, Dan. *konge*; formed with a patronymic ending, and fr. the root of E. *kin*; cf. Icel. *konr* a man of noble birth, and AS. *cyne-* king (in comp.). See KIN.] **1.** A male sovereign; a man invested with supreme authority over a nation, country, or tribe, usually for life and by hereditary succession, the monarch of a state distinctively called a kingdom, and usually independent, though sometimes subordinate to an empire. "Ay, every inch a *king*." *Shak.*

The *king*, according to the maxim . . ., can do no [legal] wrong. No action can be brought against him, nor indeed against a foreign sovereign, as such, or his ambassador. *T. E. Holland.*

☞ The title *king* is often applied to God or to Christ, esp. in various phrases, as *King of heaven, King of glory*, etc.

2. *pl.* [*cap.*] Two historical books in the Old Testament; — so entitled because they record the reigns of Jewish kings. Their titles, *First* and *Second Book of the Kings*, occur also for 1 and 2 Samuel, in which case the Books of the Kings are reckoned as four, the two first mentioned being the third and fourth. See OLD TESTAMENT.

3. A person occupying a position like that of a sovereign or playing the part of one; — usually part of a real or mock title; as, *King* of Heralds; *King* of Misrule.

4. One that holds a supreme or preëminent position or rank; a chief among competitors; as, a railroad *king*; a money *king*; the *king* of the lobby; the *king* of beasts.

The best *king* of good fellows. *Shak.*

Myth.* Zeus, or Jupiter. **c** Odin. — **k. of metals,** gold. — **K. of Rome,** a title given, at his birth, to the son of Napoleon I. and Maria Louisa, Napoleon (II.) François Charles Joseph (1811-32), Duke of Reichstadt. — **k. of terrors,** death. *Job* xviii. 14. — **k. of the anteaters,** a South American ant bird (*Grallaria varia*, syn. *G. rex*). — **K. of the French,** the title of Louis Philippe as king (1830-48), not by divine right, but by the will of the people. — **k. of the herrings.** **a** The chimæra (*Chimæra monstrosa*). **b** The opah *Lampris guttatus*. **c** An oarfish (*Regalecus glesne*). — **k. of the mackerels,** either of two large pelagic fishes, *Ranzania truncata* of the Atlantic and *R. makua* of the Pacific Ocean, closely related to and similar in form to the sunfish (*Mola*). — **K. of the Markets** [a translation of F. *Le Roi des Halles*], François de Vendôme, Duc de Beaufort (1616-69), grandson of Henry IV., and one of the leaders of the Frondeurs; — so called on account of his popularity with the Parisians. — **k. of the mullets.** **a** The common European bass (*Dicentrarchus labrax*). **b** A cardinal fish. — **k. of the salmon,** an oarfish (*Trachypterus rex-salmonorum*) of the Pacific coast. — **k. of the sea breams,** the braise. — **K. of Waters,** the Amazon River. — **K. of Yve'tot'** (ēv'tō'), in Béranger's humorous song (1813) of this name (*F. Le Roi d'Yvetot*), of which there is a well-known English translation by Thackeray, a model of potentates, a good little king without glory, who has taken pleasure for his code. He has become the type of the peaceable pleasure-loving king such as France, tired of military glory, wished for at the date of the song. Yvetot was in the Middle Ages a petty kingdom, a direct fief of the French crown, whence the name. — **K. Philip's War,** *Amer. Hist.*, a war (1675-76) between the New England colonists and the Indians under King Philip, sachem of the Wampanoags. — **Kings, Era of.** See ERA, *Table.* — **Kings of Brentford, the Two,** two characters in George Villiers's farce "The Rehearsal," who have become proverbial as walking hand in hand, dancing, singing, and otherwise acting every part together. — **Kings, the Do-nothing.** See ROIS FAINÉANTS, LES. — **King William's War,** *Amer. Hist.*, a contest waged by Great Britain and her colonies against the French and their Indian allies, beginning in the winter of 1689-90 and lasting until the Peace of Ryswick in 1697. It is the American part of the war between the Grand Alliance of European powers and Louis XIV. — **Three Kings of Cologne,** in medieval legend, the three magi who came to Bethlehem to present gifts to the infant Jesus, and whose bodies are said to have been brought by the Empress Helena to Constantinople, and thence transferred to Milan, and afterwards to Cologne. Their names were Gaspar, Melchior, and Balthazar.

king (kĭng), *v. t.*; KINGED (kĭngd); KING'ING. To supply with a king; to rule as a king over; to make a king of. *Rare.*

Those traitorous captains of Israel who *kinged* themselves by slaying their masters and reigning in their stead. *South.*

king, *v. i.* To act the king; to rule; — usually with *it*.

King Arthur. A legendary king of Britain of the 6th century, who became the central figure of a great cycle of romance. He was said to have lived in state with his wife, Guinevere, at Caerleon on the Usk, whence knights set out on chivalrous exploits in various lands. He is supposed to have received mortal wounds from the invading Saxons on the battlefield of Camlan, although it was a tradition among the Britons that he was taken to be healed in Fairyland, and would reappear to reinstate his countrymen over Britain. Probably, in the mythical Arthur, a semihistorical personage was confounded with an ancient British god, thus forming a semidivine hero who may at one time have replaced the older G-wydion. See KNIGHTS OF THE ROUND TABLE, EXCALIBUR, GWYDION, MODRED, GUINEVERE.

king ball. *Bagatelle.* A red or black ball, placed on the white spot in front of the holes, which must be struck by one of the other balls before a score can be made.

king'bird' (kĭng'bûrd'), *n.* Any of several American tyrant flycatchers. The common kingbird (*Tyrannus tyrannus*) of the eastern United States, which is noted for its pugnacious defense of its nest, is chiefly blackish slate-color above and white below with a white-tipped tail and an erectile crest. The gray kingbird (*T. dominicensis*) is ashy gray above and lacks the white tail band. It inhabits the southeastern United States and parts of the West Indies. *T. verticalis* and *T. vociferans*, of the western United States, have the head and breast ashy gray, the wings reddish brown, and the belly yellow.

Kingbird (*Tyrannus tyrannus*). (½)

King Cam-by'ses (kăm-bī'sēz). The leading character of "A Lamentable Tragedy. . . . Containing the Life of Cambyses, King of Persia," by Thomas Preston (1537-98). An allusion to the play in Falstaff's speech in Shakespeare's 1 Henry IV., II. iv. 425, has made "*King Cambyses' vein*" synonymous with *rant*, but the language of the play is not especially extravagant.

king card. In whist, the best unplayed card of each suit.

king cobra. A large and very venomous snake (*Ophiophagus elaps*) closely allied to the true cobra, found from India to southern China and the Philippines. It attains a length of 12 feet, and is believed to feed entirely on snakes.

King Cole (kōl). A legendary king of Britain who reigned, as the old chronicles inform us, in the 3d century. He is the subject of a familiar nursery rime.

King Cotton. A popular personification of the great staple production of the southern United States. The expression "Cotton is King" seems to have been first used by James H. Hammond of South Carolina, in a speech in the United States Senate, March 4, 1858.

king crab. **1.** Any of several closely related species of large marine arthropods which are the only surviving members of the order Xiphosura and subclass Merostomata (which see); a horseshoe crab. They have a broad crescentic cephalothorax with a pair of large compound eyes and two simple eyes on the upper surface, and six pairs of legs arising from the lower surface about the centrally placed mouth. The small abdomen is articulated to the cephalothorax, its segments fused into a single piece. It bears swimming appendages to which the flat leaf-like gills are attached, and a long, stiff, movably articulated caudal spine. The best-known species is *Xiphosurus sowerbyi*, syn. *Limulus polyphemus*, found on sandy and muddy bottoms on the coasts of North America from Maine to Mexico and the West Indies. It becomes nearly two feet long. Four other living species (either included in *Xyphosurus*, syn. *Limulus*, or placed in the related genera *Tachypleus* and *Carcinoscorpius*) are known from eastern Asia, as well as a number of more or less closely allied fossil forms.

King Crab (*Xiphosurus sowerbyi*. (⅛)

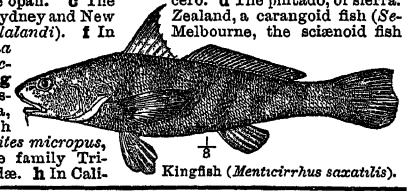
king eider. A circumpolar species of eider duck (*Somateria spectabilis*) having very large lateral gibbous processes at the base of the bill. See EIDER.

king'fish' (kĭng'fĭsh'), *n.* **a** Any American marine sciænoid food fish of the genus *Menticirrhus*, esp. *M. saxatilis* of the Atlantic coast; — called also *whiting*, *surf whiting*, *barb*. **b** The opah. **c** The cero. **d** The pintado, or sierra. **e** In Sydney and New Zealand, a carangoid fish (*Seriola lalandi*). **f** In Melbourne, the sciænoid fish *Sciæna antarctica*. **g** In Tasmania, the fish *Thyrsites micropus*, of the family Trichiuridæ. **h** In California, a sciænoid fish (*Genyonemus lineatus*). **i** In India, a threadfin (*Polynemus indica*).



Kingfish (*Menticirrhus saxatilis*).

king'fish'er (kĭng'fĭsh'ẽr), *n.* **1.** Any of numerous nonpasserine birds constituting the family Alcedinidæ. Most of them are crested and bright-colored, and have a rather short tail, long stout sharp bill, and weak syndactyl feet. Some 20 genera and about 150 species are known, most numerous in the East Indies, though represented in most parts of the world. They are divided into two subfamilies, the water kingfishers (Alcedininæ), which are largely piscivorous, and the wood kingfishers (Halcyoninæ, syn. Daceloninæ), which feed chiefly on insects, small reptiles, etc. Their habit is to sit quietly and dart out or plunge into the water after their prey. The belted kingfisher (*Ceryle alcyon*) of the United States is about a foot long and slate-blue above and white below with a chestnut band on the breast. The common European species (*Alcedo ispida*) is smaller and more brightly colored. Cf. LAUGHING JACKASS. Among the various beliefs formerly associated with this bird or the halycon in folklore was the notion that the beak of a dried specimen suspended freely would take the direction of the wind.

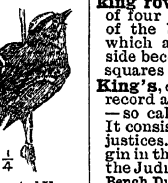
Belted Kingfisher (*Ceryle alcyon*).

2. The water ouzel. *Local, Eng. & Scot.*

King Horn. The hero and title of various old metrical romances in both English and French. He is a Christian prince driven from his realm to a foreign country, where the king's daughter and he fall in love. After some years, during which Horn performs wonderful exploits and the faithful lovers undergo many trials, they are finally united.

king'let (kĭng'lĕt), *n.* **1.** A little king; a weak or insignificant king; a kingling.

2. Any of several very small birds of the genus *Regulus*. They resemble the warblers, but have some of the habits of titmice. The European golden-crested kinglet, or goldcrest (*R. cristatus*), and the similar American golden-crested or golden-crowned kinglet (*R. satrapa*), are olive-green in color, with the crown yellowish orange or yellow bordered by black. The American ruby-crowned kinglet (*R. calendula*) has a bright red crown patch in the male and is noted for its superior song.



Golden-crested Kinglet (*Regulus satrapa*).

king'like' (-līk'), *a.* Kingly. — **king'li'e'**, *adv.*

king'ling (-lĭng), *n* A little or petty king.

King Log *and* **King Stork.** Characters in a celebrated fable of Æsop, which relates that the frogs, grown weary of living without government, petitioned Jupiter for a king. Jupiter accordingly threw down a log among them, which made a satisfactory ruler till the frogs recovered from their fright and discovered his real nature. They therefore entreated Jupiter for another king, whereupon he sent them a stork, who devoured them.

king'ly (kĭng'lĭ), *a.*; -LI-ER (-lĭ-ẽr); -LI-EST. Belonging to, suitable to, or becoming, a king; characteristic of, or resembling, a king; directed or administered by a king, monarchical; royal; sovereign; regal; kinglike; august, noble; grand. "*Kingly* magnificence." *Sir P. Sidney.*

The *kingliest* kings are crowned with thorn. *G. Massey.*

Syn. — Imperial, monarchical, sovereign, majestic, august. — KINGLY, REGAL, ROYAL, PRINCELY. *Kingly* (the Saxon word) and *regal* (the Latin word) are often interchanged. But KINGLY more frequently refers to the character of a king, or to dispositions, feelings, or purposes, which are kinglike; REGAL relates rather to the office of a king, or (esp.) to its external state or pomp; as, *kingly* courtesy, *kingly* condescension; *regal* state, cf. the *regalia*. *Regal* and ROYAL are frequently interchanged; but *royal* commonly applies to that which is in any way associated with the crown, and may or may not imply magnificence or display; as, the *royal* family, the *royal* residence, the *royal* domains, the *Royal* Society (under the patronage of royalty). Fig., *royal* applies to that which is of superlative excellence, esp. of its kind; as, a *royal* welcome, a *royal* feast, a *royal* time. PRINCELY (cf. *lordly*, under MASTERFUL) in its fig. use commonly connotes magnanimity, splendor, or munificence; as, a *princely* fortune.

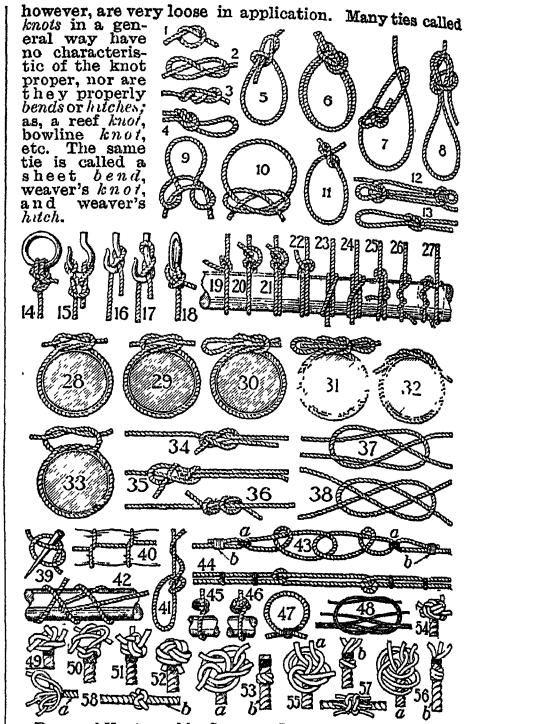
knot (nŏt), *n.* [Of unknown origin.] A sandpiper (*Tringa canutus*) which breeds in Arctic regions and migrates south in flocks along the coasts of both the Old and the New World. It is rapidly becoming rare in the United States. The knot is about ten inches long, and in summer has the under parts chiefly rich chestnut, whence it is called also **robin snipe.**
knot (nŏt), *n.* [ME. *knot, knotte,* AS. *cnotta;* akin to D. *knot,* OHG. *chnodo, chnoto,* G. *knoten,* Icel. *knūtr,* Sw. *knut,* Dan. *knude,* and perh. to L. *nodus.* Cf. KNOUT, KNIT.]
1. An interlacement of the parts of one or more slender and flexible bodies, as cordage, forming a lump or knob; any tie or fastening formed with a flexible cord, rope, or the like, including bends, hitches, splices, etc. Specif., esp. among seamen, a knot proper is a knob formed in a piece of cordage by interweaving its strands, serving as a stopper, button, etc.; as, a wall *knot,* Matthew Walker *knot.* A bend is a method of fastening one rope to another or to a ring, loop, etc., by passing the rope through a loop and fastening it back around itself; as, a sheet *bend.* A hitch is a temporary knot or noose by which one rope is fastened around another rope, spar, or post so as to be readily undone; as, a Blackwall *hitch.* These distinctions, however, are very loose in application. Many ties called *knots* in a general way have no characteristic of the knot proper, nor are they properly *bends* or *hitches;* as, a reef *knot,* bowline *knot,* etc. The same tie is called a sheet *bend,* weaver's *knot,* and weaver's *hitch.*



Principal Knots used by Seamen, Mechanics, and the like. See Table below. Several knots are shown loose and tightened, as 53 *a, b.* In 59, the *a, b, c,* etc., mark the same strands in each cut *A* and *B.*

Syn. — KNOWLEDGE, WISDOM, SCIENCE, INFORMATION. KNOWLEDGE denotes acquaintance with, or clear perception of, facts; WISDOM is the capacity of judging soundly and dealing broadly with facts, esp. in their practical relations to life and conduct; it often implies depth of insight or ripeness of experience; as, "*Knowledge* and intelligence . . . alone do not constitute *wisdom*; the word implies the application of . . . fittest means to the best . . . end" (*T. Gray*); "*Wisdom* consisteth not in knowing many things, nor even in knowing them thoroughly; but in choosing and in following what conduces the most certainly to our lasting happiness and true glory" (*Landor*); "*Knowledge* dwells in heads replete with thoughts of other men, *wisdom* in minds attentive to their own" (*Cowper*); "She [*knowledge*] is earthly of the mind, but *wisdom* heavenly of the soul" (*Tennyson*). SCIENCE, as here compared (see SCIENCE), in modern usage, is exact, organized, and classified knowledge, esp. in relation to

It is nearly the size of a chestnut, and contains a large proportion of caffeine and some theobromine. The nut is chewed as a condiment and stimulant, and the extract is used as a tonic drink. See COLA.

Ko-la'ri-an (kō-lā'rĭ-ăn; 115), *n.* A member of the race whose native speech is of the Munda subfamily; also, the Munda languages — *a.* Of or pert. to the Kolarians, or pert. to or designating Kolarian. See DRAVIDO-MUNDA.

Of late years the Munda subfamily has been called the *Kolarian*, the name being used both for the languages and for the tribes which speak them. Mr. Risley has proved the nonexistence of any such distinct race of men, the so-called "*Kolarians*" being simply members of the great Dravidian family. . . . The name *Kolarian* itself is objectionable. It was suggested first in the year 1866, although another name was already in the field, under the impression that the Kols, one of the principal of these tribes, were somehow connected with Colar in Southern India, a thing which has yet to be proved. *Census of India*, 1901.

Ko'li (kō'lē), *n.* A member of a low-caste tribe numerous in Hyderabad, the Bombay Presidency, Rajputana, and the Punjab. They are engaged in agriculture, as fishermen, laborers, and in similar occupations. Formerly many of them were engaged in gang robberies.

Ko-re'an (kō-rē'ăn), *a.* Of or pertaining to Korea or the Koreans, or their language.

Ko-re'an, *n.* **1.** A member of the native race of Korea, a mixed race of Mongoloid type and of an adeptly imitative rather than profound intelligence. Their civilization is borrowed from that of China.

The *Koreans*, who take an intermediate position between the continental and insular Mongoloid peoples, are somewhat taller and more robust, with much lighter complexion and far more regular features, than the average Mongol. *A. H. Keane.*

2. The language of the Koreans, an agglutinative tongue related to Japanese and possibly ultimately derived from the Ural-Altaic family. Its alphabet is probably a primitive form of the Indian derived from an ancient Pali or Tibetan type. It contains eleven vowels and fourteen consonants, collectively called *Gnaun*, that is, "vulgar characters." The differences between the book form and the spoken form of the language are such that the latter cannot be exactly recorded. Korean literature has been mostly written in Chinese.

Krupp gun (krōōp). A breech-loading steel cannon manufactured at the Krupp works, founded by Friedrich Krupp, at Essen in Prussia. The early model was a solid casting, but experience proved the necessity of building up all guns with exception of the lighter field pieces. For a period, the central tube comprised the greater mass of the gun, received the fermeture, and was depended upon to supply all the strength requisite for the chase. Later, for the heavier calibers a jacket was used to receive the breechblock, and the chase was hooped to the muzzle. The metal is crucible cast steel, and the system has a cylinder-prismatic fermeture which works in a transverse slot.

L

L (ĕl). **1.** The twelfth letter of the English alphabet. It is a voiced, or sonant, "liquid" consonant. Its form and value are from the Greek, through the Latin, the form of the Greek letter (*lambda*) being from the Phœnician, and the ultimate origin perhaps Egyptian. See ALPHABET, *Illust.* Etymologically, *l* is most closely related to *r* and *u*; as in pilgrim, peregrine, couch (fr. *collocare*), auburn (fr. LL. *alburnus*). At the end of monosyllables containing a single vowel, *l* is often doubled, as in *fall, full, tell, bell*; but not after diphthongs and digraphs, as in *foul, fool, prowl, growl, joal*. In English words the final syllable *le* is unaccented, the *e* is silent, and *l* is syllabic, as in *able, eagle*, pronounced *ā′b′l, ē′g′l*. See *Guide to Pron.*, §§ 193-4. **2.** As a *symbol*, used to denote or indicate: **a** The eleventh or (cf. Lab′y-rin′tho-don (-rĭn′thō-dŏn), *n.* [NL.; Gr. λαβύρινθος labyrinth + ὀδούς, ὀδόντος, tooth.] *Paleon.* The typical genus of the Labyrinthodonta (which see), known from fragmentary remains in the Upper Triassic of England.

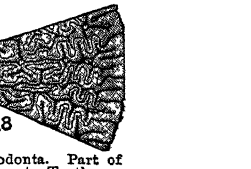
lab′y-rin′tho-dont (-dŏnt), *a. Paleon.* a Of or pertaining to the Labyrinthodonta. **b** Having teeth in which there is a labyrinthine arrangement of the dentine. —*n.* One of the Labyrinthodonta.



Labyrinthodonta. Part of a section of a Tooth.

Lab′y-rin′tho-don′ta (-dŏn′tȧ), *n. pl.* [NL.] *Paleon.* A division of extinct amphibians of the order or subclass Stegocephali, distinguished by the infolding of the dentine of the teeth, so as to form, in typical genera, a more or less complex pattern in cross sections of the teeth. They occurred in the Carboniferous and Permian, but attained their largest size and greatest specialization in the Trias. The labyrinthodonts were large (sometimes almost gigantic), flat-headed, heavy-bodied, salamander-like animals of predatory and more or less terrestrial habits. Their remains are generally fragmentary. *Mastodonsaurus* (which see) is the largest and best-known genus.

Lab′y-rin′thu-la (-rĭn′thŭ-lȧ), *n.* [NL., dim. of L. *labyrinthus* labyrinth.] *Zoöl.* A genus of rhizopods consisting of a mass of small nucleated cells or corpuscles connected by a homogeneous substance. In the active state the connecting substance forms a network of fine threads in which the cells travel to and fro. With the related genus *Chlamydomyxa*, in which the corpuscles are not nucleated, it forms an order **Lab′y-rin′thu-lid′e-a** (-lĭd′ē-ȧ) of some classifications.

lac, lakh (lăk), *n.* [Hind. *lak*, *lākh*, *lāksh*, Skr. *laksha* mark, sign, lac.] One hundred thousand; also, a vaguely great number; specif., 100,000 rupees. See COIN. *Anglo-Ind.*

lac (lăk), *n.* [Per. *lak*, or perh. fr. a dialect in India; akin to Skr. *lākshā*: cf. F. *laque*, It. & LL. *lacca*. Cf. LAKE a color, LACQUER, LITMUS.] **1.** A resinous substance secreted by a scale insect (*Carteria lacca*) which lives on the twigs of various trees, esp. certain species of the genus *Ficus*. The insects are extensively cultivated, esp. in northern India. Stick-lac is the substance in its natural state, incrusting the insects and small twigs. When broken off, and the coloring matter, lac dye, partly removed, the granular residuum is called seed-lac. When melted, and reduced to a thin crust, it is called shellac or shell-lac. Lac is an important ingredient in sealing wax, dyes, varnishes, and lacquers.
2. Lacquer. *Rare.*
3. The color of lac; crimson; also, lac dye. *Obs.*

lac′case (lăk′ās), *n.* [See 2d LAC; -ASE.] *Chem.* An enzyme occurring in many plants, as the beet, turnip, apple, pear, clover, etc., and having the property of inducing the oxidation of certain polyatomic phenols. It was first found in the crude sap of the lac, or lacquer, tree, and it is by its action that the lacquer is produced from the sap. The activity of laccase seems to be associated in some way with the presence of manganese.

lac′col (-ōl; -ŏl), *n.* [See 2d LAC; 1st -OL.] *Chem.* A substance occurring in the sap of the lac, or lacquer, tree and yielding on oxidation natural lacquer. It is apparently a polyatomic phenol.

lac′co-lith (lăk′ō-lĭth), **lac′co-lite** (-līt), *n.* [Gr. λάκκος a cistern + *-lith*, *-lite*.] *Geol.* A mass of igneous rock intruded between sedimentary beds and resulting in a mammiform bulging of the overlying strata. — **lac′co-lith′ic** (-lĭth′ĭk), **lac′co-lit′ic** (-lĭt′ĭk), *a.*

lace (lās), *n.* [ME. *las* a cord, tie, snare, OF. *laz*, F. *lacs*, dim. *lacet*, fr. L. *laqueus* noose, snare; prob. akin to *lacere* to entice. Cf. DELIGHT, ELICIT, LASSO, LATCHET.] **1.** A noose, snare, or gin; a net. *Obs.*
2. A cord, band, or line, esp. one that holds by being tied or interwoven. *Obs. or R.*, except specif.: A string, cord, or band, passing through eyelet or other holes, and used in drawing and holding together parts of a garment, of a shoe, of a machine belt, etc.

Lac′can-don′ (lă′kăn-dŏn′), *n.*; *pl.* -DONES (-dŏ′nēz). One of a tribe of Mayan Indians still forming an independent community on the borderland between Guatemala and Yucatan.

‖ **la′ca-tan′** (lä′kȧ-tän′), *n.* [Tag.] A superior kind of banana. *Phil. I.*

lac-ca′ic (lă-kā′ĭk), *a.* Also **lac′ca-in′ic** (lă-kȧ-ĭn′ĭk). *Chem.* Designating a brownish red crystalline acid from lac dye, resembling carminic acid.

lac′cate (lăk′āt), *a.* [See 2d LAC.] *Bot.* Appearing as if varnished; as, *laccate* leaves.

lacche, lacchet. † LATCH, LATCHET.

lac′cic (lăk′sĭk). [Cf. F. *laccique*.] Laccaic.

lac′cin (lăk′sĭn), *n.* [Cf. F. *laccine*.] *Chem.* A yellow amorphous substance got from lac.

lac dye. A scarlet coloring matter, resembling cochineal, obtained from lac. See LAC. It has been largely superseded in dyeing by artificial dyestuffs.

3. In *Obs.* senses: **a** A brooch or fibula. **b** A baldric or belt. **c** In building, a tie beam; a brace; also, a paneled ceiling. *Oxf. E. D.*

lac'er-at'ed (-āt'ĕd) } torn; mangled; hence, harrowed; distracted; as, a *lacerated* wound.
By each other's fury *lacerate*. *Southey*
2. *Bot. & Zoöl.* Having the margin or apex deeply and irregularly cut or incised.
lacerated foramen. *Anat.* = FORAMEN LACERUM.

lac'er-a'tion (-ā'shŭn), *n.* [L. *laceratio*: cf. F. *lacération.*] **1.** Act of lacerating.
2. A breach or wound made by lacerating.

lac'er-a-tive (lăs'ĕr-ȧ-tĭv), *a.* Lacerating, or tending to lacerate; as, *lacerative* humors. *Harvey.*

La-cer'ta (lȧ-sûr'tȧ), *n.* [L., a lizard. See LIZARD.] **1.** *Zoöl.* A genus of lizards. Formerly it included nearly all the known lizards, but it is now restricted to certain typical Old World species, like the green lizard (*Lacerta viridis*) and the sand lizard (*L. agilis*) of Europe. It is the type of a family, **La-cer'ti-dæ** (-tĭ-dē), which with related families composes a suborder, **La-cer'tæ** (-tē). The latter contains all the Lacertilia with the exception of the geckos and chameleons. See LIZARD, *Illust.*
2. *gen.* -TÆ. *Astron.* A galactic constellation north of Pegasus. It has no stars brighter than the fourth magnitude.

la-cer'ti-an (-shĭ-ăn; -tĭ-ăn), *a. Zoöl.* Like, or of or pert. to, the Lacertilia. — *n.* One of the Lacertilia; a lizard.

la-cer'ti-form (-tĭ-fôrm), *a.* [*Lacerta* + *-form.*] *Zoöl.* Lizardlike; having the form of a typical lizard.

Lac'er-til'i-a (las'ĕr-tĭl'ĭ-ȧ), *n. pl.* [NL., fr. L. *lacertus* a lizard.] *Zoöl.* An order or suborder of reptiles comprising the ordinary lizards, chameleons, geckos, and various allied limbless forms. Structurally they are nearly allied to the snakes, and like them are a group of modern origin, no fossil forms earlier than the Cretaceous being known. The typical members of the order (see LIZARD) have an only moderately elongated body, a tapering tail, well-developed pentadactyl limbs, a scaly or tuberculated skin, movable eyelids, an auditory tympanum, and a nondilatable mouth, the halves of the mandible being always united by a sutural symphysis, not by an elastic ligament as in the snakes. Many of the Lacertilia (see BLINDWORM, GLASS SNAKE) approach the snakes in the elongation of the body, and reduction or complete loss of the limbs, while others (see AMPHISBÆNA) are blind, wormlike, burrowing animals with a nearly scaleless skin. The Lacertilia inhabit the tropical, and less abundantly the warm temperate, parts of the world, and are mostly terrestrial or arboreal in habits, feeding on insects, snails, fruits, etc. They are all harmless with the exception of one genus (see GILA MONSTER).

lac'er-til'i-an (lăs'ĕr-tĭl'ĭ-ăn), *a.* Of or belonging to the Lacertilia. — *n.* One of the Lacertilia; a lizard.

lac-et' (lăs-ĕt'), *a.* [Dim. of *lace.*] Designating, or pertaining to, a kind of braid of various widths and patterns, used with crochet work to make trimming, or with lace stitches to form a design.

lace'wing' (lās'wĭng'), *n.* Any of certain neuropterous insects of *Chrysopa*, *Hemerobius*, and allied genera (see these terms). They have delicate, lacelike wings and brilliant eyes. Their larvæ are useful in destroying aphids.

Lacewing (*Chrysopa oculata*). *a* Mature Fly; *b* Eggs; *c* Larva. Somewhat enlarged.

Lach'e-na'li-a (lăk'-ē-nā'lĭ-ȧ), *n.* [NL., after W. de *Lachenal*, Swiss botanist.] *Bot.* A large genus of South African bulbous liliaceous plants, having several ligulate basal leaves and scapes of pendulous, tubular, red and yellow flowers. They are sometimes known as *Cape cowslips*. Also [*l. c.*], a plant, bulb, or flower of this genus.

lach'es (lăch'ĕz), *n.* [OF. *laschesse*, fr. *lasche* lax, indolent, F *lâche*, fr. *laschier* to loose, F. *lâcher*, ult. fr. L. *laxus* loose, lax. See LAX.] **1.** Laxness; remissness; negligence; neglect. *Obs.*
2. *Law.* Neglect to do a thing at the proper time; undue delay in asserting a right, or in claiming or asking for a privilege.
3. Loosely, culpable negligence; carelessness. *Rare.*

Lach'e-sis (lăk'ē-sĭs), *n.* [L., fr. Gr. Λάχεσις, lit., lot, fr. λαγχάνειν, λαχεῖν, to obtain by lot.] **1.** One of the Fates. See FATE, 4.
2. *Zoöl.* A genus of American and Asiatic snakes allied to the rattlesnakes, but with no rattle and with the head covered with very small shields or scales. See BUSH MASTER, FER-DE-LANCE.

Lach'no-ster'na (lăk'nŏ-stûr'nȧ), *n.* [NL.; Gr. λάχνη, or λάχνος, soft hair, down + στέρνον breast.] *Zoöl.* A genus of beetles including the common June bugs of the northern United States. See JUNE BEETLE.

lach'ry-mal (lăk'rĭ-măl), *a.* The better, but unusual, spelling is **lac'ri-mal.** [Cf. F *lacrymal.* See LACHRYMOSE.] **1.** Of or pert. to tears; as, *lachrymal* effusions.
2. Characterized by tears; indicative of weeping. *Rare.*
3. *Anat.* Designating, pertaining to, or situated near, the organs producing tears. — **lachrymal bone,** *Anat. & Zoöl.*, a bone of the face situated, in man, within the orbit at the inner side of the eye. In fishes the name has been applied to the prefrontal and preorbital. — **l. canals,** two short ducts leading from minute orifices on small papillæ, the **lachrymal papillæ,** on each eyelid near the inner angle of the eye and opening (after uniting) into the nasal duct. — **l. caruncle,** a small, reddish follicular elevation at the inner canthus of the eye. — **l. duct,** the nasal duct. — **l. gland,** an oval gland, about the size and shape of an almond, and situated at the outer and upper part of each orbit, which secretes the tears. — **l. papillæ.** See LACHRYMAL CANALS. — **l. sac,** the dilated upper extremity of the nasal duct. — **l. sinus,** a suborbital sac or tear bag developed by certain ruminants. — **l. vase,** a lachrymatory.

lach'ry-mal, *n.* Better, but unusual, spelling, **lac'ri-mal.** **1.** *pl.* Lachrymal organs; also, fits of weeping.
People go to the theaters to have . . . their risibles and *lachrymals* set agoing. *The Lutheran.*
2. *Anat.* The lachrymal bone.
3. = LACHRYMATORY, 1.

lach'ry-mate (-māt), *v. i.* To weep. *Rare.*

lach'ry-ma'tion (-mā'shŭn), *n.* [L. *lacrimatio.*] A weeping. *Rare.*

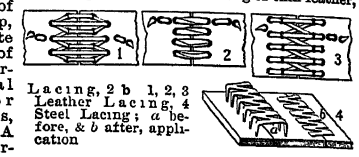
lach'ry-ma-to-ry (lăk'rĭ-mȧ-tō-rĭ), *n.*; *pl.* -RIES (-rĭz). [Cf. F. *lacrymatoire.*] **1.** A vase designed to contain tears; esp., *Archæol.*, a "tear bottle;" one of a class of narrow-necked vessels found in sepulchers of the ancient Romans and so called from a former notion that the tears of the deceased person's friends were collected in them.
2. A handkerchief. *Humorous.*

lach'ry-ma-to-ry, *a.* Of or pertaining to tears; tending to make tears flow; designed to contain tears; lachrymal.

lach'ry-mose (lăk'rĭ-mōs), *a.* [L. *lacrymosus*, better *lacrimosus*, fr. *lacrima*, *lacruma* (also badly spelt *lachryma*) a tear, for older *dacrima*, akin to E. *tear.* See TEAR the secretion.] **1.** Generating or shedding tears; given to shedding tears; suffused with tears; tearful.
You should have seen his *lachrymose* visnomy *Lamb.*
2. *Bot.* Bearing tear-shaped appendages, as the gills of certain fungi.
— **lach'ry-mose-ly,** *adv.* — **lach'ry-mos'i-ty** (-mŏs'ĭ-tĭ), *n.*

Lac'i-na'ri-a (lăs'ĭ-nā'rĭ-ȧ; 115), *n.* [NL. See LACINIA. So named in allusion to the fringed appearance of the heads.] *Bot.* A large genus of American asteraceous herbs having spicate showy red or purple heads of tubular flowers, narrow leaves, and thick, often tuberous, roots. The bracts of the involucre are in several series, often squarrose, and the achenes are ribbed. The numerous species are commonly called *blazing-star*, or *button snakeroot*, several are cultivated.

lac'ing (lās'ĭng), *p. pr. & vb. n.* of LACE. Specif.: *vb. n.* **1.** Action of one that laces, in securing, fastening, or tightening, compressing, beating, etc.
2. Any of various things that lace or fasten or that are of the nature of a lace or of lace; specif.: **a** A lace or fastening, as a shoestring. **b** *Mach.* A thong of thin leather, or a kind of metal clip, used to unite the ends of belts. **c** Ornamental braid for uniforms, etc. **d** A dash of spirits in a beverage; a lace. **e** A colored border or margin of a flower, esp. when fimbriate, as in the carnation, or of a feather. **f** See LATTICING, 2. **g** A rope or line passing through eyelet holes or the like along the edge of a sail or an awning to attach it to a yard, gaff, etc. **h** *Math.* An inseparable complex of three or more endless cords (of infinitesimal cross section), no two of which are interlocked.



Lacing, 2 b 1, 2, 3 Leather Lacing, 4 Steel Lacing; *a* before, & *b* after, application

la-cin'i-a (lȧ-sĭn'ĭ-ȧ), *n.*; *pl.* L. -LÆ (-lē), E. -LAS (-lăz). [NL.] **a** *Bot. & Zoöl.* A small lacinia. **b** *Bot.* The inflexed mucronate point of the petal in many apiaceous plants.

la-cin'u-late (-lāt) } *a.* [See LACINIA.]
la-cin'u-lose (-lōs) }

la-cin'u-lat'ed (-āt'ĕd) } *a.* Finely laciniate; having laciniulæ.

Lac'i-ste'ma (lăs'ĭ-stē'mȧ), *n.* [NL., fr. Gr. λακίς a rent + στῆμα stamen.] *Bot.* A genus of tropical American shrubs constituting the family **Lac'i-ste-ma'ce-æ** (-stē-mā'sē-ē) of the order Piperales (hence **lac'i-ste-ma'ceous** (-shŭs), *a.*). They have flowers in aments; the fruit is a small 3-valved capsule.

lack (lăk), *n.* [ME. *lac*; cf. D. *lak* slander, *laken* to blame, Icel. *lakr* lacking, defective.] **1.** Defect, blame; cause of blame; fault; crime; offense. *Obs.*
2. A fault entailing disgrace; disgrace. *Obs. Scot.*
3. Fact or state of being deficient or wanting; deficiency; want; need; as, *lack* of reason; a *lack* of food.
She swooneth now and now for *lack* of blood. *Chaucer*
Let his *lack* of years be no impediment *Shak.*
4. Fact or state of being in want or straitened circumstances; need; famine; starvation.
5. That which is lacking; thing needed; as, green forage is a *lack* of desert regions.
Syn. — LACK, WANT (which are often interchangeable) agree in the idea of deficiency. But LACK often merely states the fact of absence or defect; WANT commonly heightens the implication that what is lacking is desirable or necessary; as, "Good counselors *lack* no clients" (*Shak.*); "like an angry hive of bees that *want* their leader" (*id.*); "tinged with wan from *lack* of sleep" (*Tennyson*); "I must die for *want* of one bold word" (*id.*). lac'o-nism (lăk'ə-nĭz'm), *n.* [Gr. Λακωνισμός, fr. Λακωνίζειν to imitate Lacedæmonian manners, to speak laconically: cf. F. *laconisme.*] **1.** Disposition to favor, or practice of favoring, the Laconians, or Spartans. *Rare.*

2. A vigorous, brief manner of expression; laconic style.

3. An instance of laconic style or expression.

lac'o-nize (-nīz), *v. t. & i.;* LAC'O-NIZED (-nīzd); LAC'O-NIZ'ING (-nīz'ĭng). [Gr. Λακωνίζειν. See LACONIC.] To imitate the manner of the Laconians, esp. in brief, pithy speech, or in frugality and austerity; [*cap.*] to favor the Laconians; to render Laconian, as in government.

lac'quer (lăk'ẽr), *n.* Also *lacker.* [F. *lacre* a sort of sealing wax, Pg. *lacre,* fr. *lacca* lac. See LAC the resin.]

1. = LAC, the resin. *Obs.*

2. a A varnish consisting of a solution of shellac in alcohol, often colored with gamboge, saffron, or the like. It is used for varnishing metals, esp. brass, papier-maché, wood, etc. **b** Any of various varnishes with a resin as the base; specif., the natural varnish obtained in Japan by tapping the *Rhus vernicifera,* or varnish tree, and drying the sap in the air. Various varnish preparations are made by adding pigments or other substances to the natural varnish. These varnishes form a remarkably tough and durable coat. In ordinary lacquer work at least 15 coats are applied, each coat being thoroughly polished. Lacquer work is also produced in China, India, and Persia, but is greatly inferior to the best Japanese work.

3. A decorative article made of wood coated with Japanese or other Oriental lacquer and often inlaid with ivory, metal, etc.; collectively, such work or articles; lac.

lac'quer, *v. t.;* -QUERED (lăk'ẽrd); -QUER-ING. To cover or coat with lacquer; to varnish. — **lac'quer-er** (-ẽr), *n.*

lac'quer-ing, *n.* Act or business of putting on lacquer; varnishing, also, the lacquer put on.

lac'ri-mo'so (lăk'rĭ-mō'sō), *a.* [It. See LACHRYMOSE.] *Music.* Plaintive; — a term applied to a mournful or pathetic movement or style.

la-crosse' (lə-krŏs'; 205), *n.* [F. *la crosse,* lit., the crosier, hooked stick. Cf. CROSIER.] A game of ball, originating among the North American Indians, now the popular field sport of Canada, and played also in England and the United States. Each player carries a long-handled racket, called a *crosse.* The ball is not handled, but caught, carried, and thrown with the crosse, the object being to throw it through the opponent's goal. There are twelve players on each side.

Lacrosse Racket, or Crosse

lac'tal-bu'min (lăk'tăl-bū'mĭn), *n.* [*lacto-* + *albumin.*] An albumin present in milk, similar to serum albumin.

lac'tam (lăk'tăm), *n.* [*lactone* + *amino.*] *Org. Chem.* An inner anhydride of an amino acid, formed by the loss of a molecule of water from the amino and carboxyl groups, and of the general formula $R'/\begin{matrix}CO\\NH\end{matrix}>$. Lactams correspond to lactones of hydroxy acids. See LACTONE, LACTIM.

lac'ta-rene (lăk'tə-rēn) } *n.* [L. *lac, lactis,* milk.] A prep-
lac'ta-rine (-rĭn; -rēn) } aration of casein from milk, used as a fixing agent in calico printing.

Lac-ta'ri-us (lăk-tā'rĭ-ŭs; 115), *n.* [NL., fr. L. *lactarius* milky.] *Bot.* A large genus of agaricaceous fungi exuding abundant white milky juice when cut or broken. Some, as *L. deliciosus,* are edible; others have a hot, peppery taste, and are poisonous. Also [*l. c.*], a plant of this genus.

lac'ta-ry (lăk'tə-rĭ), *a.* [L. *lactarius,* fr. *lac, lactis,* milk.] **a** Of, pertaining to, or connected with, milk. **b** Milky; full of white juice like milk. *Obs.*

lac'tase (-tās), *n.* [See LACTOSE; -ASE.] *Chem.* An enzyme, found in certain yeasts and in the animal body, which decomposes lactose into glucose and galactose.

lac'tate (-tāt), *v. i.;* -TAT-ED (-tāt-ĕd); -TAT-ING (-tāt-ĭng). [L. *lactare, lactatum,* fr. *lac, lactis,* milk.] To secrete milk; also, to suckle young.

lac'tate, *v. t.* To make milky. *Rare.*

lac'tate, *n.* [L. *lac, lactis,* milk.] *Chem.* A salt or ester of lactic acid.

lac-ta'tion (lăk-tā'shŭn), *n.* The secretion and yielding of milk by the mammary gland; act of giving suck.

lac'te-al (lăk'tē-ăl), *a.* [L. *lacteus* milky, fr. *lac, lactis,* milk. Cf. GALAXY, LETTUCE.] **1.** Pertaining to, consisting of, or resembling, milk; milky; as, the *lacteal* fluid.

2. *Anat.* Conveying or containing chyle; as, the *lacteal* vessels. See LACTEAL, *n.*

lacteal fever, *Med.,* milk fever. — **1. gland,** *Anat.,* a lymphatic gland situated upon a lacteal vessel.

lac'te-al, *n.* **1.** *Anat.* One of the lymphatic vessels of the small intestine which convey the chyle from the intestine through the mesenteric glands to the thoracic duct. They begin in the central lymphatic radicles of the villi.

Lacteals and Adjacent Parts. *a* Aorta; *b* Thoracic Duct; *c* Lymphatic Glands in the Mesentery, connected with each other and with the Thoracic Duct by the Lacteals *f; d* Radicles of the Lacteals in the wall of the Intestine *e; g* Large Lacteals separated from the Mesentery.

2. *Bot.* A laticiferous duct. *Obs.*

lac-tesce' (lăk-tĕs'), *v. i.* [L. *lactescere.*] To become milky. *Rare.* *Oxf. E. D.*

lac-tes'cence (-tĕs'ĕns), *n.* **1.** A becoming milky; milklike appearance or state; milkiness.

2. *Bot.* An abundant flow of sap, esp. white. *Rare.*

lac-tes'cent (-ĕnt), *a.* [L. *lactescens,* p. pr. of *lactescere* to turn to milk, incho. fr. *lactere* to be milky, fr. *lac, lactis,* milk.] **1.** Having a milky look; becoming milky.

2 a Secreting, or concerned in the secretion of, milk. **b** *Bot.* Yielding a milky juice, or latex.

lac'ti- (lăk'tĭ-). Combining form from Latin *lac, lactis,* meaning *milk.* See LACTO-.

lac'tic (lăk'tĭk), *a.* [L. *lac, lactis,* milk: cf. F. *lactique.* See LACTEAL; cf. GALACTIC.] Of or pertaining to milk; procured from sour milk or whey; as, *lactic* fermentation.

lactic acid, *Chem.,* a colorless sirupy acid, $CH_3CH(OH)CO_2H$, called also *α*-hydroxy-propionic acid. There are three optically different modifications: (1) **dextrolactic acid** (called also **sarcolactic,** or **paralactic, acid**), found chiefly in dead muscular tissue; (2) **levolactic acid,** produced in the decomposition of cane sugar by a certain ferment; (3) **inactive lactic acid,** which is ordinary lactic acid, or **lactic acid of fermentation,** formed in the souring of milk, etc. Lactic acid is isomeric with hydracrylic acid, and the two are sometimes distinguished respectively as *ethylidene* (or *ethidene*) *lactic acid* and *ethylene lactic acid.* — **1. bacteria,** bacteria (as *Bacterium acidi-lactici*) which produce lactic fermentation. — **1. fermentation,** transformation of any of various organic substances, as milk sugar, or lactose, glucose, or mannite, into lactic acid. It is the cause of the souring of milk. It is produced by many organisms, oftenest by *Bacterium acidi-lactici.*

lac'ti-cin'i-a (lăk'tĭ-sĭn'ĭ-*a*), *n. pl.* [L.] *R. C. Ch.* Food consisting of, or prepared from, milk. By papal dispensation, the use of lacticinia on most fasting days has been made lawful for the faithful.

lac'tide (lăk'tīd; -tĭd; 184), *n.* Also **-tid.** [*lactic* + anhydride.] *Org. Chem.* A white crystalline substance, obtained by heating lactic acid, and regarded as an anhydride formed by union of two molecules of acid, with the loss of two molecules of water; by extension, any analogous substance. Lactides are formed from *α*-hydroxy acids, that is, acids having hydroxyl and carboxyl groups attached to the same carbon atom. Cf. LACTONE.

lac-tif'er-ous (lăk-tĭf'ẽr-ŭs), *a.* [L. *lac, lactis,* milk + *-ferous.*] **1.** Secreting or conveying milk.

2. *Bot.* Laticiferous.

lac'ti-fi-ca'tion (lăk'tĭ-fĭ-kā'shŭn), *n.* **1.** Production or secretion of milk. *Obs.*

2. Act or process of lactifying.

lac'ti-fy (lăk'tĭ-fī), *v. t.;* -FIED (-fīd); -FY'ING (-fī'ĭng). [*lacti-* + *-fy.*] To transform by lactic fermentation; as, *lactifying* bacteria.

lac'tim (lăk'tĭm), *n.* [*lactone* + *imido.*] *Org. Chem.* Any of a series of anhydrides isomeric with the lactams, but of an imido type, having the general formula $R'/\begin{matrix}C{\cdot}OH\\ \|\\N\end{matrix}>$.

lac-tim'ide (lăk-tĭm'īd; -ĭd; 184), *n.* Also **-id.** [*lactic* + *imide.*] *Chem.* A white crystalline substance, $C_6H_{10}O_2$, obtained as an anhydride of alanine, and regarded as an imido derivative of lactic acid.

lac'to- (lăk'tō-), **lac'ti-** (lăk'tĭ-), **lact-.** Combining forms from Latin *lac, lactis,* meaning *milk.*

lac'to-bu'ty-rom'e-ter (-bū'tĭ-rŏm'ĕ-tẽr), *n.* [*lacto-* + *butyrometer.*] An instrument for determining the amount of butter fat in a sample of milk.

lac'to-den-sim'e-ter (-dĕn-sĭm'ĕ-tẽr), *n.* [*lacto-* + *densimeter.*] A special hydrometer for finding the density of milk to discover whether it has been mixed with water or some of the cream has been removed.

lac'to-glob'u-lin (-glŏb'ū-lĭn), *n.* [*lacto-* + *globulin.*] *Physiol. Chem.* The specific globulin contained in small amount in milk, perhaps the same as serum globulin.

lac-tom'e-ter (lăk-tŏm'ĕ-tẽr), *n.* [*lacto-* + *-meter.* Cf. GALACTOMETER.] An instrument for estimating richness of milk, as a measuring glass, a specific-gravity bulb, etc.

lac'tone (lăk'tōn), *n.* *Org. Chem.* **a** A colorless liquid formerly stated to accompany lactide as a product of the action of heat on lactic acid. **b** Any of a series of anhydrides of certain hydroxy acids, formed by the elimination of water from the hydroxyl and carboxyl groups of the same molecule. The lactones may hence be regarded as intramolecular esters. In general, they are colorless liquids, having a weak aromatic odor. Lactones are formed most easily from *γ*-hydroxy acids, that is, those in which the hydroxyl is attached to the third carbon atom of the chain, counting that one as first which is in union with the carboxyl group. Such lactones are called *γ*-lactones. *δ*-lactones and *ε*-lactones are also known. — **lac-ton'ic** (lăk-tŏn'ĭk), *a.*

lac'to-phe'nin (lăk'tō-fē'nĭn), *n.* *Pharm* A white crystalline powder, $C_{11}H_{15}O_3N$, a lactyl (see LACTYL **b**) derivative of *p*-phenetidine. It is antipyretic, analgesic, and hypnotic.

lac'to-pro'te-id (-prō'tē-ĭd), *n.* [*lacto-* + *proteid.*] *Chem.* Any of the proteids in milk, as lactoalbumin.

Lac'to-ris (lăk'tō-rĭs), *n.* [L., a kind of milky plant, fr. *lac, lactis,* milk.] *Bot.* A genus of plants constituting the family **Lac'to-ri-da'ce-æ** (-rĭ-dā'sē-ē) (hence, **lac'to-ri-da'ceous** (-shŭs), *a.*) of the order Ranunculales, and consisting of the single species *L. fernandeziana,* a low shrub with jointed branches, fleshy leaves, and small axillary inflorescence, native of the island of Juan Fernandez.

lac'to-scope (lăk'tō-skōp), *n.* [*lacto-* + *-scope.*] An instrument for estimating the amount of cream contained in milk by its relative opacity.

lac'tose (-tōs), *n.* [L. *lac, lactis,* milk + *-ose.*] *Chem.* **a** A hard, crystalline sugar, $C_{12}H_{22}O_{11}{\cdot}H_2O$, present in milk, and separable from the whey by evaporation and crystallization. It is slightly sweet, dextrorotatory, and much less soluble in water than cane sugar or glucose. Called also *milk sugar, sugar of milk,* and, formerly, *lactin.* Lactose is used as a vehicle for medicines, and as an article of diet. Chemically, it is a disaccharide, yielding on hydration *d*-galactose and *d*-glucose. **b** = GALACTOSE.

lac'to-su'ri-a (lăk'tō-sū'rĭ-*ă*), *n.* [NL.; *lactose* + *-uria.*] *Med.* The presence of lactose in the urine.

lac tree (lăk). **a** = LACQUER TREE. **b** An Asiatic euphorbiaceous tree (*Croton aromaticus*). It yields an aromatic resin, and is also one of the sources of shellac.

Lac-tu'ca (lăk-tū'kă), *n.* [L., lettuce. See LETTUCE.]

lac sumac *or* **sumach.** = LAC-

lact-. See LACTO-.

lac-ta'ceous (lăk-tā'shŭs), *a.* [L. *lac, lactis,* milk.] Milky. *Obs.* *Oxf. E. D.*

lac'tage (lăk'tăj), *n.* [L. *lac, lactis,* milk. See LACTEAL.] Produce of milk. *Obs.*

lac'ta-gogue (lăk'tə-gŏg), *a. & n.* [*lacto-* + *-agogue.*] *Med.* = GALACTAGOGUE.

lac-tam'ic (lăk-tăm'ĭk), *a.* *Chem.* Designating alanine, an amino acid related to lactic acid.

lac-tam'ide (lăk-tăm'īd; -ĭd; lăk'tə-mīd; -mĭd). Also -id. [*lactic* + *amide.*] *Chem.* A neutral white crystalline substance, $CH_3CH(OH)CONH_2$, the amide of lactic acid.

lac-tam'ine (lăk-tăm'ĭn; lăk'tə-mēn'), *n.* Also -in. [*lacto-* + *amine.*] *Chem.* = ALANINE. Cf. LACTAMIC.

lac'tant (lăk'tănt), *a.* [L. *lactans,* p. pr. of *lactare* to suck, fr. *lac, lactis,* milk.] Suckling; giving suck. *Rare.*

lac-ta'ri-ous (lăk-tā'rĭ-ŭs; 115), *a.* Of *Bot.* Yielding a milky juice like that of species of *Lactarius;* — applied to fungi. *Rare.*

lac-ta'ri-um (lăk-tā'rĭ-ŭm), *n.* [L., neut. of *lactarius* of milk.] A place for selling milk; dairy.

lac'ta-ry (lăk'tə-rĭ), *n.* A dairy-house. *Rare.*

lac'te-an (-tē-ăn), *a* [See LACTEAL.] Milky; lacteal. *Rare.*

lac'te-in (-ĭn), *n.* [L. *lacteus* milky.] Solidified or condensed milk.

lac'te-ous (-ŭs), *a.* [See LACTEAL.] a Milky; resembling milk. b *Anat.* Lacteal. *Rare.* — **lacteous circle,** the Milky Way, or Galaxy. *Obs.* — **1 star,** a star of the Milky Way. *Obs.*

lac'ta-tase (lăk'tə-tās), *n.* = LACTASE.

lac-tif'er-ous (lăk-tĭf'ẽr-ŭs), *a.* [L. *lac, lactis,* milk + *-ferous.*] **1.** Secreting or conveying milk.

2. *Bot.* Laticiferous.

lac'ti-fi-ca'tion (lăk'tĭ-fĭ-kā'shŭn), *n.* **1.** Production or secretion of milk. *Obs.*

2. Act or process of lactifying.

lac'ti-fy (lăk'tĭ-fī), *v. t.;* -FIED (-fīd); -FY'ING (-fī'ĭng). [*lacti-* + *-fy.*] To transform by lactic fermentation; as, *lactifying* bacteria.

lac'tim (lăk'tĭm), *n.* [*lactone* + *imido.*] *Org. Chem.* Any of a series of anhydrides isomeric with the lactams, but of an imido type, having the general formula $R'/\begin{matrix}C{\cdot}OH\\ \|\\N\end{matrix}>$.

lac-tim'ide (lăk-tĭm'īd; -ĭd; 184), *n.* Also **-id.** [*lactic* + *imide.*] *Chem.* A white crystalline substance, $C_6H_{10}O_2$, obtained as an anhydride of alanine, and regarded as an imido derivative of lactic acid.

lac'to- (lăk'tō-), **lac'ti-** (lăk'tĭ-), **lact-.** Combining forms from Latin *lac, lactis,* meaning *milk.*

lac'to-bu'ty-rom'e-ter (-bū'tĭ-rŏm'ĕ-tẽr), *n.* [*lacto-* + *butyrometer.*] An instrument for determining the amount of butter fat in a sample of milk.

lac'to-den-sim'e-ter (-dĕn-sĭm'ĕ-tẽr), *n.* [*lacto-* + *densimeter.*] A special hydrometer for finding the density of milk to discover whether it has been mixed with water or some of the cream has been removed.

lac'to-glob'u-lin (-glŏb'ū-lĭn), *n.* [*lacto-* + *globulin.*] *Physiol. Chem.* The specific globulin contained in small amount in milk, perhaps the same as serum globulin.

lac-tom'e-ter (lăk-tŏm'ĕ-tẽr), *n.* [*lacto-* + *-meter.* Cf. GALACTOMETER.] An instrument for estimating richness of milk, as a measuring glass, a specific-gravity bulb, etc.

lac'tone (lăk'tōn), *n.* *Org. Chem.* **a** A colorless liquid formerly stated to accompany lactide as a product of the action of heat on lactic acid. **b** Any of a series of anhydrides of certain hydroxy acids, formed by the elimination of water from the hydroxyl and carboxyl groups of the same molecule. The lactones may hence be regarded as intramolecular esters. In general, they are colorless liquids, having a weak aromatic odor. Lactones are formed most easily from *γ*-hydroxy acids, that is, those in which the hydroxyl is attached to the third carbon atom of the chain, counting that one as first which is in union with the carboxyl group. Such lactones are called *γ*-lactones. *δ*-lactones and *ε*-lactones are also known. — **lac-ton'ic** (lăk-tŏn'ĭk), *a.*

lac'to-phe'nin (lăk'tō-fē'nĭn), *n.* *Pharm* A white crystalline powder, $C_{11}H_{15}O_3N$, a lactyl (see LACTYL **b**) derivative of *p*-phenetidine. It is antipyretic, analgesic, and hypnotic.

lac'to-pro'te-id (-prō'tē-ĭd), *n.* [*lacto-* + *proteid.*] *Chem.* Any of the proteids in milk, as lactoalbumin.

Lac'to-ris (lăk'tō-rĭs), *n.* [L., a kind of milky plant, fr. *lac, lactis,* milk.] *Bot.* A genus of plants constituting the family **Lac'to-ri-da'ce-æ** (-rĭ-dā'sē-ē) (hence, **lac'to-ri-da'ceous** (-shŭs), *a.*) of the order Ranunculales, and consisting of the single species *L. fernandeziana,* a low shrub with jointed branches, fleshy leaves, and small axillary inflorescence, native of the island of Juan Fernandez.

lac'to-scope (lăk'tō-skōp), *n.* [*lacto-* + *-scope.*] An instrument for estimating the amount of cream contained in milk by its relative opacity.

lac'tose (-tōs), *n.* [L. *lac, lactis,* milk + *-ose.*] *Chem.* **a** A hard, crystalline sugar, $C_{12}H_{22}O_{11}{\cdot}H_2O$, present in milk, and separable from the whey by evaporation and crystallization. It is slightly sweet, dextrorotatory, and much less soluble in water than cane sugar or glucose. Called also *milk sugar, sugar of milk,* and, formerly, *lactin.* Lactose is used as a vehicle for medicines, and as an article of diet. Chemically, it is a disaccharide, yielding on hydration *d*-galactose and *d*-glucose. **b** = GALACTOSE.

lac'to-su'ri-a (lăk'tō-sū'rĭ-*ă*), *n.* [NL.; *lactose* + *-uria.*] *Med.* The presence of lactose in the urine.

lac tree (lăk). **a** = LACQUER TREE. **b** An Asiatic euphorbiaceous tree (*Croton aromaticus*). It yields an aromatic resin, and is also one of the sources of shellac.

Lac-tu'ca (lăk-tū'kă), *n.* [L., lettuce. See LETTUCE.] Causing or promoting production of milk.

lac'tin, *n.* [L. *lac, lactis,* milk.] Chem. Lactose. *Obs.*

lac-tiv'o-rous (lăk-tĭv'ō-rŭs), *a.* [*lacti-* + *-vorous.*] Feeding upon milk. [TALBUMIN.

lac'to-al-bu'min. Var. of LAC-

lac'to-bi-on'ic (lăk'tō-bī-ŏn'ĭk), *a. Chem.* Designating an acid, $C_{12}H_{22}O_{12}$, obtained by action of bromide on lactose.

lac'to-bi'ose, *n.* [*lacto-* + *biose.*] = LACTOSE. [A galactocele

lac'to-cele, *n.* [*lacto-* + *-cele.*]

lac'to-chrome, *n.* [*lacto-* + *-chrome.*] A nitrogenous coloring matter said to be in milk.

lac'to-crit (lăk'tō-krĭt), *n.* Also **lac'to-crite** (-krīt). [*lacto-* + Gr. κριτής judge.] *Med.* A kind of lactometer for testing the amount of fat in milk.

lac-ton'ic (lăk-tŏn'ĭk), *a.* [From LACTOSE.] *Chem.* Designating an acid better called *galactonic* acid. See GALACTONIC.

lac'to-phos'phate, *n.* A combination of a phosphate and a lactate.

lac'to-pro'te-in, *n.* [*lacto-* + *protein.*] *Chem.* a A substance formerly thought to exist in milk, now known to be a mixture produced by artificial chemical action. **b** = LACTOPROTEID.

lac-tos'a-zone (lăk-tŏs'ă-zōn).

Bot. A large genus of cichoriaceous plants, the lettuces, distinguished by the beaked achene and the soft white multiseriate pappus. They are widely distributed in temperate regions, several, as the prickly lettuce (*L. scariola*), being troublesome weeds. The garden lettuce is *L. sativa*.

lac'tu-ca'ri-um (lăk'tŭ-kā'rĭ-ŭm; 115), *n.* [NL., fr. L. *lactuca* lettuce.] The inspissated juice of the common lettuce. It is a mild hypnotic and antispasmodic, sometimes used in place of opium. Various unimportant substances, of more or less doubtful composition, have been described as obtained from lactucarium; as, **lac-tu'cer-in** (lăk-tū'sĕr-ĭn) or **lac-tu'cone** (-kōn), **lac-tu'cer-ol** (*a* and *β*) (lăk-tū'sĕr-ōl; -ŏl), **lac-tu'cic acid** (-sĭk), **lac-tu'cin** (-sĭn), and **lac-tu'co-pi'crin** (-kō-pĭ'krĭn).

lac'tyl (lăk'tĭl), *n.* [*lactic* + *-yl.*] *Org. Chem.* **a** A bivalent radical, $CH_3CH'CO'$, of which lactic acid is the hydroxide. **b** A univalent radical, $CH_3CH(OH)CO'$, of which lactic acid is the hydroxide.

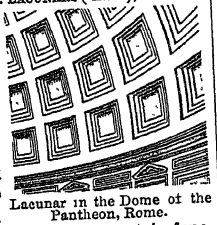
la-cu'na (lȧ-kū'nȧ), *n.; pl.* L. **-næ** (-nē), E. **-nas** (-nȧz). [L., ditch, pit, lake, orig., anything hollow. See LAGOON.] **1.** A blank space, as in a manuscript; a hiatus; a small opening; a small pit or depression; a gap; break.

The scientific treatment of existing *lacunæ* in our empirical knowledge. *James Ward.*

2. Specif.: **a** *Biol.* An intercellular space. **b** *Zoöl.* One of the spaces, among the tissues of lower animals, which serve in place of vessels for the circulation of the body fluids. **c** *Anat.* (1) One of the follicles in the mucous membrane of the urethra. (2) One of the minute cavities in bone occupied by the bone cells. **d** *Bot.* One of the small pits on the surface of the thallus in lichens.

la-cu'nal (lȧ-kū'nȧl), **la-cu'nar** (-nȧr), *a.* Lacunary.

la-cu'nar (lȧ-kū'nȧr), *n.; pl.* E. **LACUNARS** (-nȧrz), L. **LACUNARIA** (lăk'ū-nā'rĭ-ȧ; 115). [L.] *Arch.* **a** = CAISSON, 3. **b** A ceiling, esp. one of the ancient Roman type made up of caissons or sunk panels.



Lacunar in the Dome of the Pantheon, Rome.

lac'u-na-ry (lăk'ū-nā-rĭ; *lȧ-kū'nȧ-*), *a.* Of or pertaining to a lacuna; having lacunæ. — **lacunary function**, *Math.*, a function that has an essential singularity at every point of an assigned space (called lacunary space) of the plane, and hence loses all definition and ceases to exist in that space. — **l. region**, *Math.*, a region over no part of which a certain function can be continued analytically.

la-cu'nose (lȧ-kū'nōs; 277), *a.* [L. *lacunosus* full of holes or hollows. See LACUNA.] Having, or full of, lacunæ. — **lac'u-nos'i-ty** (lăk'ū-nŏs'ĭ-tĭ), *n.*

la-cus'trine (lȧ-kŭs'trĭn), *a.* [L. *lacus* lake: cf. F. *lacustral*, *lacustre.*] Of or pertaining to lakes; formed in, growing in, or inhabiting, lakes; as, *lacustrine* flowers; *lacustrine* deposits.

Lahn'da (lăn'dȧ), *n.* An important language of northwestern Hindustan. See INDO-EUROPEAN.

Lahnda is a language the existence of which has long been recognized, but under many names. In the last Census Report it was called Jatki, but this, like Multani, Western Panjabi, and other titles given to it, has the disadvantage of not being sufficiently comprehensive. It is not spoken only by Jats; it is not peculiar to Multan; and it is not a western dialect of the Panjabi of the Manjh. I therefore think it best to give it the name which is indicated by the natives of the Punjab themselves, i. e., *Lahnda* or the Language of the West (Panjabi, *Lahnde-di Boli*).

Census of India, 1901.

la'ic (lā'ĭk), *a.* [L. *laicus:* cf. F. *laïque.* See LAY laic.] Of or pert. to a layman or the laity; lay; secular.

‖ **lais'sez' faire'** (lĕ'sā' fâr'). [F.] Lit., let (people) do, or make (what they choose); hence, noninterference; — a phrase used in economics, esp. by the Physiocrats, deprecating governmental interference intended to foster or regulate labor, commerce, manufactures, etc., whether by bounties, restrictions, or other provisions. The expression in its full form, **Laissez faire, laissez passer,** or **aller** (lit., let do, or make, let pass, or go), is generally credited to Gournay. The same principle is sometimes expressed by the parallel phrase (not attributed to Gournay) **Le monde va de lui-même,** or in its Italian form, **Il mondo va da se,** lit., "The world goes of itself."

Their [the physiocrats'] favorite phrase *Laissez faire, laissez aller*, is commonly misapplied now. *Laissez faire* means that any one should be allowed to make what things he likes, and as he likes; that all trades should be open to everybody. . . . *Laissez aller* (or *passer*) means that persons and goods should be allowed to travel freely from one place to another, and especially from one district of France to another, without being subject to tolls and taxes and vexatious regulations. *Alfred Marshall.*

As a maxim for guidance in public affairs, *laissez faire* was genuinely relevant at the end of the 18th and the beginning of the 19th century, when the statute book was cumbered with vexatious and obsolete laws. As an explanation of what has taken place during the last sixty years, or of the actual economic life of the present day, it is ludicrously inadequate. *Encyc. Brit.*

la'i-ty (lā'ĭ-tĭ), *n.* [See LAY, *a.*] **1.** State of a layman; nonclerical condition. *Ayliffe.*

2. The people, as distinguished from the clergy; the body of the people not in orders; laymen collectively.

3. Those who are not of a certain profession, as law or medicine, in distinction from those belonging to it.

the order Hyperoartia, syn. *Petromyzonies*, of the class Cyclostomata (which see). The mouth is large, circular, suctorial, and jawless, with numerous small conical teeth in its cuplike cavity, and one to three larger ones on the palate. The single nostril is a blind sac. The gill pouches, seven on each side, open internally into a canal situated below the esophagus and communicating with it near the mouth. The eggs are small and hatch into a toothless, eyeless larval form, known as *ammocœtes*. Lampreys are widely distributed in temperate regions both in fresh and salt water, but the marine species run up rivers to spawn. Some are esteemed as food. The larger species feed by attaching themselves to fishes, rasping off the flesh by means of their horny teeth. They are usually regarded as constituting a single family, Petromyzonidæ.

LINGUAL.] **1.** The body of words and methods of combining words used and understood by a considerable community, esp. when fixed and elaborated by long usage; a tongue; as, the Latin *language.*
Wherever a *language* is alive, it grows. *Lowell.*
2. Any means of expressing or communicating feeling or thought. In the usual sense, *language* means a system of conventionalized signs; that is, words or gestures having fixed meanings. But not all intelligible expressions are fixed, nor are all used exclusively for communication, since language plays a large rôle in our thinking processes. Hence *language* may mean (1) expression that conveys ideas, (2) expression that symbolizes ideas. Bodily expression, whether gesture or articulation, and inscription, as printing, writing, etc., are its chief forms, but any systematic symbolism, in a more or less transferred sense, is called *language;* as, the *language* of art.
Identical reference or rational convention is thus the root and essence of the system of signs which we call *language*
B. Bosanquet.
Language is the depository of the accumulated body of experience to which all former ages have contributed their part, and which is the inheritance of all yet to come. *J. S. Mill.*

2. *Zoöl.* The immature, wingless, and often wormlike form in which metabolous insects hatch from the egg, and in which they remain with increase in size and other minor changes until they assume the pupa or chrysalis stage. Various kinds are known as *caterpillars, grubs, maggots*, etc. In many lower groups of insects the larvæ differ but little from the adult in form, but they are wingless.
3. *Zoöl.* Hence, the early form of any animal which, while immature, is unlike its parent and must pass through more or less of a metamorphosis before assuming the adult characters. The term is applied to later stages than *embryo*, designating those in which organs for the performance of many or most of the bodily functions (usually excepting reproduction) are already formed. The tadpole of a frog or toad is a familiar example. In animals which are permanently attached in the adult stage the larvæ are commonly capable of locomotion, thus providing for widely scattering the individuals.
Lar-va'ce-a (lar-vā'shē-ă), *n. pl.* [NL.; *larva* + *-acea.*] *Zoöl.* An order of small, free-swimming, pelagic tunicates, including *Appendicularia* and allied genera; — equivalent to Larvalia and Copelata of some authors. They have a permanent caudal appendage, supported by a skeletal axis or notochord, and the test of other tunicates is represented by a relatively large, transparent, temporary envelope, the "house," which is rapidly formed as a secretion from the ectoderm and frequently thrown off and renewed. They are usually hermaphroditic, reproduce by means of eggs, and do not pass through a metamorphosis.

lar'ynx (lăr'ĭnks; 277), *n.*; *pl.* LARYNGES (lă-rĭn'jēz). [NL., fr. Gr. *λάρυγξ*, *-υγγος.*] *Anat. & Zoöl.* The modified upper part of the trachea. In man and other mammals, and in amphibians, it is the organ of voice, but in birds the vocal organ is the syrinx (or *lower larynx*), at the lower end of the trachea. The larynx contains folds of membrane, the *vocal cords* (which see), and is connected with the pharynx by an opening, the *glottis*, which in mammals is protected by a lidlike organ, the *epiglottis*. The framework of the human larynx consists of nine cartilages, controlled by numerous muscles. The largest cartilage, the *thyroid*, is V-shaped in horizontal section, its point making the protuberance on the front of the neck known as Adam's apple, and its posterior ends being produced into upwardly and downwardly directed cornua. It is articulated below to the ringlike *cricoid* cartilage. This is narrow in front and high behind, where, extending up within the thyroid, it is surmounted by the two *arytenoid* cartilages, from which the vocal cords pass forward to be attached together to the inner surface of the front of the thyroid cartilage.

last (lăst), *n.* [AS. *hlæst*, fr. *hladan* to lade; akin to OHG. *hlast*, G., D., Dan., & Sw. *last.* See LADE.] **1.** A load; a cargo. *Obs.*

2. A certain weight or measure, often estimated at 4,000 lbs., but varying for different articles and in different countries. It was formerly much used in commerce. The *last* seems to have been originally the quantity carried at one time. In England, a *last* of codfish, white herrings, meal, or ashes, is 12 barrels; a *last* of corn, 10 quarters, or 80 bushels, in some parts of England 10½ quarters or 84 bu.; of gunpowder, 24 bbls., each containing 100 lbs.; of herrings, 10,000, 13,200, or even 20,000; of hides, 12 dozen; of leather, 20 dickers; of pitch and tar, 14 bbls.; of wool, 12 sacks; of flax or feathers, 1,700 lbs., etc. In the Netherlands a *last* of grain is 30 hectoliters (35.24 U. S. bu.).

3. A unit of ship capacity, either one or two tons.

last (lăst), *n.* [AS. *læst* trace, track, footstep; akin to D. *leest* a last, G. *leisten*, Sw. *last*, Dan. *læst*, Icel. *leistr* the foot below the ankle, Goth. *laists* track, way; from a root signifying, to go. Cf. LAST, *v.* 2., LEARN, DELIRIUM.] A wooden block shaped like the human foot, on which boots or shoes are formed.

The cobbler is not to go beyond his *last. L'Estrange.*

last, *v. t.;* LAST'ED; LAST'ING. To shape with a last; to fasten or fit to a last; as, to *last* a boot.

last (last), *a.* [ME. *last, latst*, contr. of *latest*, superl. of *late;* akin to OS. *lezt, lazt, last*, D. *laatst*, G. *letzt.* See LATE; cf. LATEST.] **1.** Being or remaining after all the others, similarly classed or considered, in time, place, or order of succession; following all the rest; final; only remaining; hindmost; remotest; farthest; as, the *last* year of a century; the *last* man in a line of soldiers; the *last* page in a book; his *last* chance.

2. Next before the present; most recent; as, *last* week.

Your worship was the *last* man in our mouths. *Shak.*

3. Lowest in rank or degree; as, the *last* prize. *Pope.*

Many that are first shall be *last. Matt.* XIX. 30.

4. Furthest of all from a given quality, character, or condition; most unlikely; having least fitness; as, he is the *last* person to be accused of theft.

5. Conclusive, final; authoritative. "The *last* word of experience." *M. Arnold.*

6. Supreme; highest in degree; utmost.

Contending for principles of the *last* importance. *R. Hall.*

Syn. — LAST, LATEST, FINAL, ULTIMATE, EVENTUAL, EXTREME. That is LAST which follows all others, esp. of the same sort or class; that is LATEST which is furthest advanced toward a given or set time, or which is nearest to the present time; as, the *last* page of a book, the *last* letter of the alphabet, the *last* rose of summer; the *latest* train (which is also the *last* train on a given day), the *latest* novel (i. e., the *last* up to the present time), have you heard his *latest* adventure? That is FINAL which definitely closes a series or process; that is ULTIMATE which comes, or is attained, at last, whether because of what precedes or in spite of it; as, the *final* chapter (which is the *last* chapter, regarded as bringing the book to a close), his *final* injunction; "I think he settles many questions . . . on which a *final* verdict is what we now want" (*E. FitzGerald*); whatever conduces to his *ultimate* success; the obstacles which he met with did not prevent his *ultimate* success; "Daniel . . . declared that he felt no fear of the *ultimate* issue" (*Eden Phillpotts*); "The merit of great books is to be estimated . . . by their . . . *ultimate* result" (*Johnson*). But *ultimate* is also used of that beyond which one cannot go in tracing a process or series backwards; as, the *ultimate* cause (that beyond which one can find no other; cf. the *final* cause — i. e., the end for which the thing exists or is done), the *ultimate* constituents. That is EVENTUAL which ultimately falls out or results; as, "Thou . . . didst ne'er engage in work for mere work's sake — hadst ever in thy heart the luring hope of some *eventual* rest atop of it" (*R. Browning*), "baskets in which they collected the materials for some *eventual* patchwork quilt" (*H. James*). EXTREME is now synonymous with *last* only in the phrase "*extreme* unction." See CONCLUSIVE, CLOSE.

at last, *or* **at the last,** at the end of a certain period; after delay; finally, as, the time has *at last* arrived. "Gad, a troop shall overcome him; but he shall overcome *at the last.*" *Gen.* xlix. 19. — **in the l.,** at the end; at the last. *Obs. Shak.* — **L. Assize,** the Last Judgment. — **l. cast,** the (usually with *at*). **a** The last throw of the dice or last effort, on which everything is ventured; the last chance. **b** The last extremity; the last gasp. *Obs. or R.* — **l. day** [*often cap.*], the, judgment day. — **l. days** *or* **times,** the, the period just before death or before the judgment day. — **l. enemy,** death. — **l. hand,** the finishing touches; the final polish or finish. *Obs.* — **l. heir,** the person to whom lands escheat for want of an heir. *Eng.* — **l. honors** *or* **honours,** funeral or memorial observances before or at a burial. — **L. Inquest,** the Last Judgment. — **L. Judgment,** *Theol.,* God's or Christ's final judgment or trial of mankind; also, the time of it. — **l. multiplier,** the integrating factor or multiplication by which renders possible the integration of the differential equation (of first order between two variables) to which a system of differential equations of motion may sometimes be reduced. — **L. of the Fathers,** St. Bernard (1091–1153). — **L. of the Goths,** Roderic (d. 711), the last of the Visigothic kings in Spain. — **L. of the Greeks,** Philopœmen (d. 183 B. C.), who tried to preserve the independence of the Achæan League against Roman encroachments. — **L. of the Knights,** Maximilian I. (1459–1519), Emperor of Germany; — so called because of his gallant exploits in tournament and battle. — **L. of the Mo-hi'cans** (mō-hē'kănz), in Cooper's novel of this name, the Indian chief Uncas. — **L. of the Romans,** the Roman general Aëtius, who defeated Attila in a battle at Chalons in 451, and with whose death, which occurred in 454, the last support of the Western Empire fell; — so called by the historian Procopius. Also applied to Marcus Junius Brutus, Caius Cassius Longinus (so called by his friend Brutus), Cola di Rienzi (by Byron), and others, and allusively to various men of modern times. — **L. of the Tribunes,** Cola di Rienzi (d. 1354), who endeavored to revive the tribunician power in the city of Rome. — **L. Sigh of the Moor,** a spot in the Alpujarras, Spain, from which, according to legend, Boabdil, the last Moorish king of Granada, looked back on the kingdom that he had lost, bursting into tears. — **L. Supper,** the supper which was partaken of by Christ and his disciples on the night of his betrayal. — **on one's l. legs,** at, or near, the end of one's resources; hence,

2. Disguised; being (something) in reality without having the appearance (of it). *Rare.*

I had been a *latent* emigrant, now I was to be branded once more, and put apart with my fellows. *Stevenson.*

Syn. — LATENT, DORMANT, QUIESCENT, POTENTIAL, SUSPENDED, IN ABEYANCE. LATENT (see etym.) applies to that which is present without showing itself; DORMANT (see etym.), to that which is present without manifesting activity; as, "Dante often has a *latent* meaning by the side of an evident one" (*Landor*); "A religious pretext had brought into sudden evidence all the *latent* ferocities of a corrupt though dainty civilization" (*W. Pater*); "if that can be said to revive, which at the most has only been *dormant* for want of employment" (*Cowper*); "the dramatic artist, that lies *dormant* or only half awake in most human beings" (*Stevenson*). QUIESCENT emphasizes rather the cessation of action than the presence of energy; as, "In historical composition all the grandest powers of the human mind are *quiescent*" (*Johnson*). That is POTENTIAL which, though not actually existing now, may come into existence at some future time (which exists, not *in esse*, but *in posse*); as, a *potential* artist, *potential* energy; "The apple already lies *potentially* in the blossom" (*Lowell*). SUSPENDED and IN ABEYANCE imply temporary inactivity or nonexistence; as, *suspended* animation; "In Mr. Brooke the hereditary strain of Puritan energy was clearly *in abeyance*" (*G. Eliot*). See SECRET, CONSTRUCTIVE; cf. LURE.

latent ambiguity, *Law*, an uncertainty which does not appear upon the face of an instrument, but arises from evidence aliunde, that is, one which is not involved in the words themselves, but arises from outside matters; thus, a conveyance to "John Smith, living on Fifth Avenue," when it appears that there are two or more John Smiths so living, contains a *latent ambiguity;* — opposed to *patent ambiguity.* — **1. bud,** *Bot.,* a concealed bud which may remain dormant indefinitely, but which under certain conditions develops into a shoot. — **1. heat,** *Physics*, the thermal equivalent of the energy expended in melting unit mass of a solid or vaporizing unit mass of a liquid; or, conversely, the thermal equivalent of the energy set free in the process of solidification or of liquefaction; — called respectively the **latent heat of fusion** and **latent heat of vaporization,** or, by nearly all modern writers, simply **heat of fusion** and **heat of vaporization.** — **1. period. a** *Med.* The regular time in which a disease is supposed to be existent without manifesting itself. **b** *Physiol.* One of the phases in a simple muscular contraction, in which invisible preparatory changes are taking place in the nerve and muscle.

-later. [Cf. Gr. *λάτρης* (as in *εἰδωλολάτρης* idolater), fr *λατρύειν* to serve.] A suffix, denoting *worshiper*, forming agent nouns; as in bibliolater. Cf. -LATRY.

lat'er-al (lăt'ẽr-ăl), *a.* [L. *lateralis*, fr. *latus, lateris*, side. cf. F. *latéral.*] **1.** Of or pertaining to the side; situated at, directed towards, or coming from, the side; as, the *lateral* branches of a tree; a *lateral* view.

2. Being, moving, or acting, side by side; of winds, blowing from the same general direction. *Obs.* *Oxf. E. D.*

3. a *Anat. & Zoöl.* Lying at, or extending toward, the right or left side; away from the mesial plane; — opposed to *mesial* or *median.* **b** *Zoöl.* (1) In bivalve shells, situated before or behind the middle of the hinge; as, the *lateral* teeth; — contrasted with *cardinal.* (2) In gastropod mollusks, designating one of the teeth, or rows of teeth, on the radula between the central and marginal rows.

4. *Bot.* Pert. to, characteristic of, or borne upon, the side of any organ or of the axis; — opposed to *terminal* (as buds), to *median* (as the veins of a leaf), or to *basilar* (as a style).

5. *Phon.* Articulated with emission of the breath at the sides, or on one side, of the oral passage when it is partly closed by contact of the tip of the tongue with the gums or palate; as, *l* is a *lateral* letter; — called also *side*, and *divided.*

lateral cleavage, *Min.*, cleavage parallel to the lateral planes. — **1. column,** *Anat.*, the column of the spinal cord between the dorsal and ventral roots of the spinal nerves. The latter boundary is poorly defined, and the lateral and anterior columns are often regarded as a single column, the *anterolateral column.* — **1. ethmoid.** *Zoöl.* = ECTETHMOID. See ETHMOID. — **1. fin,** *Zoöl.*, in fishes, one of the paired fins; a pectoral or ventral fin. — **1. fissure,** *Anat.*, the fissure of Sylvius. — **1. line,** in most fishes, a longitudinal line along each side of the body, usually distinguished by modified and often differently colored scales. It marks the position and orifices of an organ (the lateral line organ) presumably of a sensory nature, consisting in typical cases of a mucus-secreting epithelium-lined tube or system of tubes buried in the skin or scales, but in primitive fishes of an open groove. It is continued on the head by branching grooves or canals, and receives branches from the pneumogastric nerve (on the head also from other cranial nerves). Two or more lateral lines may occur on each side. Organs of a similar nature occur in cyclostomes and some amphibians. — **1. moraine.** *Geol.* See MORAINE. — **1. nerve,** *Zoöl.*, the nervus lateralis. — **1. operation,** *Surg.*, a method of lithotomy in which the incision is made in the left side of the perineum, extending through the prostate gland to the neck of the bladder. — **1. plane,** *Bot.*, a vertical plane passing through a leaf, flower, or other organ at right angles to the median or anteroposterior plane. — **1. plate,** *Embryol.*, in embryos of craniate vertebrates, the lateral part of the mesoblast. It divides by a conspicuous horizontal cleft into an upper and a lower portion, the former uniting with the epiblast to form the somatopleure, and the latter uniting with the hypoblast to form the splanchnopleure. — **1. sinus,** *Anat.*, either of a pair of large venous channels in the dura mater situated partly in the attached margin of the tentorium cerebelli. They turn abruptly downward to reach the jugular foramen and terminate in the internal jugular vein. — **1. system,** *Bridge Building*, the system of horizontal braces (as between two vertical trusses) by which lateral stiffness is secured. — **1. temporal fossa.** *Zoöl.* See TEMPORAL FOSSA. — **1. veins,** *Zoöl.*, in some of the lower vertebrates, as elas-

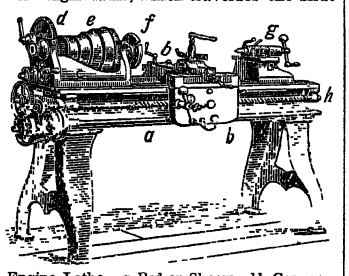
lath (lăth), *v. t.*; LATHED (lăthd); LATH'ING. To cover or line with laths.

lathe (lāth), *n.* [AS. *līðe*; orig. uncert.] One of the administrative divisions (formerly 6, now 5) into which Kent, England, is divided, each containing several hundreds.

lathe, *n.* [Prob. of Scand. origin; cf. Dan. drejelad (*Oxf. E. D.*); perh. orig., a frame to hold something, and akin to E. *lade* to load.] **1.** *Mach.* A machine by which a piece of wood, metal, or other hard material is held and rotated while a cutting tool is being presented to it. The work is held between centers contained in a headstock and tailstock, or is secured to a faceplate chuck or to a mandrel attached to the live spindle. The tool is fulcrumed against a rest, in a hand-turning lathe, or is held in a slide rest which can be moved either by hand or automatically, as in the engine lathe, which traverses the slide rest by means of the lead screw as when set for screw cutting. In the capstan, monitor, or turret lathe, employed esp. for repetition work, a number of tools are fixed in a capstan head, monitor, or turret, a tool holder pivoted so as to revolve and present any of various tools to the work. In many automatic lathes and screw-cutting machines the motions of the work and turret are directed by a cam wheel, and the finished pieces of work are dropped out continuously at one end, while a bar from which the pieces are formed is fed in at the other. Cams and guides are employed in other special lathes, as in the backing-off or relieving lathe, a machine used esp. to give clearance to taps, having for this purpose a device to give the cutting tool such a transverse motion as to cause it to gradually deepen its cut. (See BLANCHARD LATHE, POLE LATHE, etc.) Lathes are used in turning, screw cutting, drilling, boring, chasing, engraving, polishing, slotting, etc.



Engine Lathe *a* Bed or Shears; *bb* Carriage, with Cutting Tool; *c* Headstock; *d* Back Gear; *e* Cone; *f* Face Plate; *g* Tailstock; *h* Feed Screw, or Lead Screw

2. A form of potter's wheel.

lathe, *v. t.*; LATHED (lāthd); LATH'ING (lāth'ĭng). To cut, or shape, with a lathe.

lathe, *n.* [Prob. of Scand. origin; cf. Sw. *lad*, G *lade*.] The movable swing frame of a loom, carrying the reed for separating the warp threads and beating up the weft; — called also *lay* and *batten*.

lath'er (lăth'ĕr), *n.* [AS. *léaðor* washing soda; akin to Icel. *lauðr*, L. *lavare* to wash, Gr. λούειν, and prob. to E. *lye*. Cf. LAVE, LYE.] **1.** Foam or froth made by soap agitated with water.

2. Foam from profuse sweating, as of a horse.

3. Act or process of lathering.

lath'er, *v. t.*; LATH'ERED (-ĕrd); LATH'ER-ING. [Cf. AS. *lēðrian* to lather, anoint. See LATHER, *n.*] **1.** To spread over with lather; as, to *lather* the face. *Smollett.*

2. To beat severely, as with a strap; to flog. *Colloq.*

lath'er, *v. i.* **1.** To form lather, or a froth like lather; to accumulate foam from profuse sweating, as a horse.

2. To beat; thrash; strike. *Colloq.*

lath'ing (lāth'ĭng), *p. pr. & vb. n.* of LATH, to cover with laths; specif.: *vb. n.* Act or process of placing laths so as to form a foundation for plaster, tiling, etc.; laths, collectively; lath work. See LATH, *n.*, 1.

lathing hammer *or* **hatchet.** A hammer having a hatchet blade, used to trim and nail laths. See HATCHET, *Illust.*

lath nail. A form of slender nail for fastening laths.

lath'y (lāth'ĭ), *a.* Like a lath; long and slender; thin.

A *lathy* horse, all legs and length. *R. Browning*

lath'y-rism (lăth'ĭ-rĭz'm), *n.* [From LATHYRUS.] *Med.* A morbid condition produced by the use as food of the seeds of certain species of *Lathyrus*, and characterized by paraplegia with tremor. — **la-thyr'ic** (lă-thĭr'ĭk), *a.*

Lath'y-rus (lăth'ĭ-rŭs), *n.* [NL., fr. Gr. λάθυρος a kind of pulse.] *Bot.* A large, widely distributed genus of fabaceous plants, including many varieties of pea, but differing from *Pisum*, the garden pea, in having the style not sulcate. They have paripinnate leaves terminated by tendrils, and axillary, often large and showy, flowers. The sweet pea is *L. odoratus*; the everlasting pea is *L. latifolius*. Also [*l. c.*], a plant of this genus. See PEA, SWEET PEA, BEACH PEA.

La'ti-an (lā'shĭ-ăn; -shăn; 7), *a.* Belonging, or relating, to Latium, a country of ancient Italy; Latin. See LATIN.

lat'i-cif'er-ous (lăt'ĭ-sĭf'ĕr-ŭs), *a.* [L. *latex, laticis*, a liquid + *-ferous*.] *Bot.* Containing latex. — **laticiferous cell, tube,** *or* **vessel,** one of the peculiar thin-walled cells containing latex in certain families of seed plants. They are remarkable for the great length and branching development which they attain.

lat'i-clave (lăt'ĭ-klāv), *n.* [L. *laticlavus, laticlavum*; *latus* broad + *clavus* nail, a purple stripe on the tunica: cf. F. *laticlave*.] *Rom. Antiq.* One of two broad stripes of purple on the fore part of the tunic, or both together considered as a badge, worn by senators and others of high rank as an emblem of office. Cf. ANGUSTICLAVE

lat'i-fun'di-um (-fŭn'dĭ-ŭm), *n.; pl.* -DIA (-*a*). [L., fr. *latus* broad + *fundus* estate.] A large landed estate; as, the *latifundia* of ancient Romans. — **lat'i-fun'di-an**(-ăn), *a.*

Lat'in (lăt'ĭn), *a.* [L. *Latinus* belonging to Latium, Latin, fr. *Latium* a country of Italy, in which Rome was situated: cf. F. *latin*. Cf. LADIN, LATEEN.] **1.** Of or pert. to Latium or the Latins, a people of Latium; as, the *Latin* language.

2. Of, pertaining to, or composed in, the language used by the Romans or Latins; as, a *Latin* grammar; a *Latin* composition or idiom.

3. Designating, or belonging to, the Roman Catholic Church, its rites, priests, members, etc., esp. as opposed to the Greek Church; as, the *Latin* fathers.

4. Designating the peoples, nationalities, or countries, such as the French, Italian, Spanish, etc., whose languages are descended from the Latin and whose culture is most directly derived from that of ancient Rome; of or pertaining to such peoples; as, *Latin* civilization; *Latin* sentiment; the *Latin* races of South America.

Monetary Union,** *or* **L. Union,** a union formed in 1865 by France, Italy, Belgium, and Switzerland (Greece joined in 1868) for the uniform regulation of their coinage. Nominally on a double standard, the agreement having provided for the unlimited coinage of gold and five-franc silver pieces of full legal-tender value at the ratio of 15½ to 1, the Union really had a limping standard (*étalon boiteux*) after 1873, when it so limited silver coinage as virtually to adopt the single gold standard. France ceased silver coinage in 1876, Belgium and Switzerland having already done so; and the Union now has the gold standard. — **L. right,** *Rom. Law*, the jus Latii — **L. square,** *Math.*, the problem of filling all the n^2 compartments of a lattice of n columns and n rows with n different elements, no element occurring twice in the same column or same row. It is solved by the method of differential operators. — **L. versions** (of the Bible). See VERSION.

Lat'in (lăt'ĭn), *n.* **1.** The language of ancient Latium and of Rome, and until the 17th century practically the universal language of learning and diplomacy throughout western Europe. Latin, with the Romance languages developed from it, is the chief member of the Italic subfamily, intermediate between the Hellenic and Celtic subfamilies, of the Indo-European languages (which see). Its history comprises an archaic period, previous to the middle of the 3d century B. C., represented by a few inscriptions; and a literary period, often dividedinto developmental stages as follows: the *ante-classical*, from 240 to 80 B. C., which includes the writings of Plautus and Terence; the *classical*, comprising, (1) the *golden age*, from 80 B. C. to 14 A. D., during which Cicero, Cæsar, Virgil, Ovid, Horace, Sallust, Catullus, Livy, and others, brought the language to its finest and most characteristic expression, (2) the *silver age*, from 14 to 180 A. D., in which Tacitus, Martial, Juvenal, the two Plinys, and others wrote; and the *post-classical*, marked by the spread of Latin throughout the world as the language of learning and statecraft and by decay of its classical purity and style, the language once occasionally, as in the Italian Renaissance, again approaching Ciceronian elegance. In its inflections Latin is less complex than Greek, and it also lacks the euphony, variety, grace, and subtle suggestion of Greek. The classical Latins themselves, however, deemed it of greater stateliness and power, and centuries of usage in legal, philosophical, and scientific terminologies have shown its admirable precision and compactness. The Latin, or **Roman, alphabet,** originally of 21 letters, was developed from that of the Chalcidian Greek colonies in Italy. About 50 B. C. two letters (Y, Z) were added, but used only in foreign (chiefly Greek) words. I served both as vowel (i) and consonant (j), as did V (u, v); otherwise, excepting W, which the Romans lacked, the alphabet was the same as the English, which is descended from it. The Romans regularly used only capitals, which were gradually replaced, except in headings, titles, etc., by uncials, and these again by minuscules, the small letters familiar to us not coming into general use until about the close of the 8th century A. D. Cf. ROMANCE LANGUAGES.

2. a One of the people of ancient Latium, who formed a part of the Itali. See ITALIAN, *n.*, 1. **b** *Rom. Hist.* One of those having the jus Latii (which see); also, one of the

laugh'a-ble (lăf'a-b'l), *a.* Fitted to excite laughter; as, a *laughable* story; a *laughable* scene.

Syn. — Amusing, diverting, humorous, witty, merry, facetious, waggish, sportive, burlesque; queer, odd, strange. — LAUGHABLE, LUDICROUS, RIDICULOUS, COMICAL, COMIC, DROLL, FUNNY. LAUGHABLE is the general term for whatever is fit to provoke laughter; LUDICROUS commonly suggests laughable absurdity or incongruity; RIDICULOUS frequently adds the implication of contempt or derision; as, "[Mrs. Kemble] would have contributed magnificent *laughable* touches, in the wonderful tone in which she used to read her Falstaff, . . . to any picture of her peculiarities" (*H. James*); "As to originality, all pretensions are *ludicrous*" (*Byron*); "a sense of the *ludicrous* contrast between what men might be . . . and what they are" (*Lowell*); "Good manners at the court are as *ridiculous* in the country as the behavior of the country is most mockable at the court" (*Shak.*); "alive, *ridiculous*, — and dead, for-

got!" (*Pope*). COMICAL and COMIC apply to that which is mirth-provoking, *comic* (as here compared) being chiefly used of literary compositions whose object is to excite laughter; as, his look of utter astonishment was *comical*; a *comic* paper, a *comic* song. DROLL implies laughable oddity; as, "Thackeray's names, though often *ludicrous*, are always happy, and often inimitably *droll*" (*Athenæum*); cf. "a *drollery* and lurking waggery of expression that was irresistible" (*Irving*). FUNNY applies in general to that which is amusing, and it is frequently used colloq. in the sense of "queer, strange, odd;" as, an irresistibly *funny* story, a *funny* mistake; "His wife is the *funniest* thwarting little animal!" (*Lamb*). See WITTY, JOCULAR, WIT, JEST, FOOLISH.

la'va (lä'vȧ), *n.* [It. *lava* lava, orig. in Naples, a torrent of rain overflowing the streets, fr. It. & L. *lavare* to wash. See LAVE.] Fluid rock such as that which issues from a volcano or a fissure in the earth's surface; also, the same material solidified by cooling. Lava is commonly regarded as molten rock, but more exactly it is mineral matter dissolved in mineral matter, the solution taking place at high temperatures only. The fluidity of lava depends to some extent on its composition, and on the presence of water vapor and other gases dissolved in it, but more on its temperature. Basic lavas are commonly more fluid than acid ones. Lava flows out in streams, sometimes miles in length, or it may overflow large areas in sheets, forming beds such as the great lava field of Washington and Idaho. The texture of solid lava is influenced by the manner of cooling. Rapid cooling produces a glass, as obsidian; very slow cooling results in a crystalline rock. The solidification of lava when full of expanded gases produces a cellular texture, as in pumice. According to its constituent material, lava is classed as basaltic, trachytic, etc.

law (lô), *n.* [ME. *lawe*, *laghe*, AS. *lagu*, fr Scand.; cf. Icel. *lög* (pl. of *lag* layer, due place) law, Sw. *lag*, Dan. *lov*, akin to OS. *lag*; all fr. the root of E. *lay*, v., *lie*. A *law* is that which is *laid*, set, or fixed; like *statute*, fr. L. *statuere* to make to stand. See LIE to be prostrate.]

1. The binding custom or practice of a community; rules or mode of conduct made obligatory by some sanction which is imposed and enforced for their violation by a controlling authority; also, any single rule of conduct so imposed and enforced. In primitive legal systems, as that of the ancient Hebrews, the sanction is usually one imposed by, and enforced in accordance with, tribal custom, or is one conceived as imposed by divine power, or by a king, or other person or persons, ruling as a supreme head. In more highly developed societies the law becomes chiefly of special enactment or of statutory origin, and the authority imposing the sanction is the sovereign state.

2. Hence: *Law & Polit. Science.* **a** Specif.: A rule of (external) conduct or action which is prescribed, or is formally recognized as binding, by the supreme governing

authority and is enforced by a sanction. In this sense the term *law* includes any edict, decree, rescript, order, ordinance, statute, resolution, rule, judicial decision, usage, etc., which is made, or recognized, and enforced, by the controlling authority. **b** The whole body of such rules constituting the organic rule prescribing the nature and conditions of existence of a state or other organized community; also, the control or regulation, or state of society, effected or brought about by the existence and enforcement of such rules.

Reason is the life of the *law;* nay, the common *law* itself is nothing else but reason. *Coke.*

c Laws considered as a human institution or department of knowledge; legal science; jurisprudence.

Law is beneficence acting by rule. *Burke*

d The action of these rules considered as a means of redressing wrongs; specif., trial or remedial justice under or by the laws of the land; judicial remedy; litigation; as, to go to *law*.

He found *law* dear and left it cheap. *Brougham*

e In England and many of her colonies, the system of rules expounded and remedies administered by the common-law courts, as distinct from courts of *equity* (which see). **f** The legal profession as a whole; — usually with *the;* as, the *law* and the clergy supported the measure. Also, legal learning or knowledge; as, he has little Latin and less *law*.

3. The Jewish or Mosaic law, contained in the Hexateuch (Pentateuch and Joshua) and in Ezekiel xl.–xlviii.; also, this part of the Scriptures; — often distinguished from the *prophets*, and *gospel* (cf. TORAH **c**, MISHNA, HEXATEUCH). Hence, the Old Testament. One school of Biblical critics finds in the Jewish law three main systems, shaped at different periods and successively combined, namely: The **Covenant Code** (designated *J E*), the primitive Hebrew law representing the customary law, as notably in Exodus xx.–xxiv., so called as being based on the covenant with God; the **Deuteronomic Code** (designated *D*), marking a transition between the Covenant Code and the Priestly Code; the **Priestly Code** (designated *P*), including the Law of Holiness (see below), characterized by ceremonialism, statistical details, and a formal style, esp. in Leviticus and Numbers, and by being suited to the period of Babylonian exile or later.

4. A divine commandment or a revelation of the will of God; collectively, the whole body of God's commandments or revelations; the will of God, whether expressed in Scripture, implanted in instinct, or deduced by reason; specif., *Obs.*, a religion or religious faith or dispensation.

5. Collectively, the whole body of rules relating to one subject, or emanating from one source; — including usually the writings pertaining to them, and judicial proceedings under them; as, divine *law;* English *law;* Roman *law;* the *law* of real property; insurance *law*.

6. Customary habit; practice; way or usual manner of action. *Obs.*

7. Right custom or practice; specif.: **a** *Morals.* In an obsolete sense, right or just conduct; in modern usage, a specific or general rule of right living; esp., such a rule when conceived as having the sanction of God's will, of conscience or the moral nature, or of natural justice as revealed to reason. **b** In arts, works, games, etc.: The rules of construction, or of procedure, conforming to the conditions of success; a principle, maxim, or usage; as, the *laws* of poetry, of architecture, of courtesy, or of whist.

Anything from the harmony of nature to the strains of a song was for the Greek *law*. *Karl Pearson.*

8. *Philos. & Science.* A statement of an order or relation of phenomena which, so far as known, is invariable under the given conditions. See LAW OF NATURE, below.

A *law* is simply a rule or ascertained order of succession among phenomena, whereby one becomes the premonitory sign of another. *J. Martineau*

Complex uniformities which . . . are mere cases of simpler ones, and have, therefore, been virtually affirmed in affirming those, may with propriety be called *laws*. *J. S. Mill.*

9. *Math.* The rule or formula according to which anything, as the change in value of a variable or the terms of a series, proceeds or comes into being; thus, the equation of a curve is a *law* of form, both algebraic and geometric.

10. In certain sports, an allowance of time or distance given to a weaker competitor, an animal in the chase, or the like; as, a *law* of eighty yards given to a hare before the hounds are slipped; hence, in a transferred sense, mercy or indulgence.

Syn. — Justice, equity.

law of absorption. *Logic*, the proposition that if two aggregants one contains the other as a component, the aggregate is identical with the latter. *Dict. of Philos.* — **l. of acceleration.** *Embryol.*, the principle that the development of an organ is accelerated in proportion to its importance. — **l. of action and reaction.** Newton's third law of motion. See LAWS OF MOTION. — **l. of areas.** Kepler's second law. See KEPLER'S LAWS. — **l. of Avogadro.** *Chem.* See AVOGADRO'S HYPOTHESIS. — **l. of Ba'bo** (bä'bō) [after L. von *Babo*, German chemist], *Phys. Chem.*, the law that the diminution of vapor pressure of a liquid due to dissolving in it a non-volatile solid is nearly proportional to the amount dissolved. — **l. of causation** *or* **causality,** the law or principle that every change in nature is produced by some cause; the principle of universal causation. — **l. of Charles.** = CHARLES'S LAW. — **l. of constant angles.** *Crystallog.*, the law, discovered by Romé de l'Isle, that the angles between the various faces of a crystal remain unchanged throughout its growth. — **l. of constant proportion.** = LAW OF DEFINITE PROPORTIONS. — **l. of continuity,** the principle, formulated by Leibnitz, that there is no break in nature, and that nothing passes from one state to another without passing through all the intermediate states. — **l. of contradiction.** *Logic.* See LAWS OF THOUGHT. — **l. of cosines,** *Math.*, in plane trigonometry, $a^2 = b^2 + c^2 - 2bc \cos A$, and in spherical trigonometry, $\cos a = \cos b \cos c + \sin b \sin c \cos A$, where a, b, c are the sides and A, B, C the opposite angles of a triangle. — **l. of definite proportions,** *Chem.*, the essential law of chemical combination that every definite compound always contains the same elements in the same proportions by weight; and, if two or more elements form more than one compound with each other, the relative proportions of each are fixed. Compare LAW OF MULTIPLE PROPORTIONS. — **law of diminishing return,** *Econ.*, the observed fact or law that in any given stage of the arts an increase of labor or capital applied beyond a certain point in the cultivation of land causes a less than proportionate increase in the produce raised from a given area. — **l. of Du'long' and Pe-tit'** (dü'lôN', pē-tē') [after P. L. *Dulong* (1785–1838), French physicist and chemist, and A. T. *Petit* (1791–1820), French physicist], *Chem.*, the principle that the elements in the solid state have nearly the same atomic heat, that is, that the specific heat multiplied by the atomic weight is nearly a constant (about 6.4). It has been valuable for determining atomic weight. — **l. of error.** See ERROR, *n.*, 6; also, NORMAL LAW OF ERROR. — **l. of excluded middle.** *Logic.* See LAWS OF THOUGHT. — **l. of gravitation.** See GRAVITATION, 2. — **l. of great numbers,** *Math.*, the principle that the sum of elements, each varying in frequency according to its own law, tends to vary according to the normal law of error (see under NORMAL) as the number of elements increases indefinitely. — **l. of Guld'berg and Waa'ge** (gōōlt'bĕrK, vä'gĕ). = LAW OF MASS ACTION. — **l. of gyration,** *Meteor.*, a law, formulated by Heinrich Dove, a German physicist, that the wind generally shifts in its direction with the sun. — **L. of Holiness,** a substantially older body of laws (*Lev.* xiii.–xxv.), hortatory in character, and having "as its dominant note holiness," incorporated at a later day with the Priestly Code. It has been restricted by some to Lev. xvii.–xxvi., with portions of Lev. xi., and is designated as *H* or *P*^{1}. — **l. of homogeneity,** *Math.*, the dogma asserted by Vieta, but denied by moderns, that only magnitudes of the same kind can be added. — **l. of honor** *or* **honour.** = CODE OF HONOR — **l. of identity.** *Logic.* See LAWS OF THOUGHT. — **l. of intensity.** = FECHNER'S LAW. — **l. of kind.** = LAW OF NATURE **a**. — **l. of mass action,** *Chem.*, the law (established by Guldberg and Waage of Christiania) that the chemical action of a reacting substance is proportional at any moment to its active mass. The "active mass" is usually considered as measured by the molecular concentration, but sometimes, for dissolved substances, by the osmotic pressure. — **L. of Moses.** = PENTATEUCH. — **l. of multiple proportions,** *Chem.*, the generalization that when the same elements unite in more than one proportion, forming two or more different compounds, the higher proportions of the elements in such compounds are simple multiples of the lowest proportion, or the proportions are connected by some simple common factor; thus, iron and oxygen unite in the proportions FeO, Fe_2O_3, Fe_3O_4, in which compounds, considering the oxygen, 3 and 4 are simple multiples of 1. — **l. of nations.** **a** See JUS GENTIUM. *Shak.* **b** = INTERNATIONAL LAW. — **l. of nature. a** A natural instinct or a natural relation of human beings or other animals due to native character or condition; also, in a general sense, with *the*.

It the young dace be a bait for the old pike, I see no reason in the *law of nature* but I may snap at him. *Shak.*

b A generalized statement of natural processes; in the *pl.*, the chief generalizations attained or hoped for by science. J. S. Mill interpreted *the laws of nature* as "the fewest and simplest assumptions, which being granted, the whole existing order of nature would result." The invariability of natural processes was originally interpreted as imposed by the creator or ruler of the universe. Natural law was thus conceived as having an extrinsic necessity, or a causality underlying the phenomena themselves. Eventually appeared the idea of natural necessary causes, which in the generalization "like causes produce like effects" foreshadowed Mill's doctrine of the uniformity of nature, which he held to be the fundamental assumption underlying the statement of all natural law. But in fact not all the so-called "natural laws" are in actual experience invariable; some of them are generalizations which hold good only as a general rule or within indeterminate limits. Such exceptions, however, are considered as due either to inaccurate statement of the law or to ignorance of some of the conditions involved. Many philosophers consider all natural laws as subject to some uncertainty, and hence affirm that such law is necessarily hypothetical and must be stated in the form, If A is or is valid, B is or is valid. This statement applies equally well to laws concerned with the order of phenomena in time, that is, to laws concerned with natural causes and to those which express internal relationships or purely formal sequences, as mathematical laws. See CAUSE, UNIFORMITY OF NATURE

We find *laws of nature* used in very different senses by scientific writers. Sometimes such laws are spoken of as self-existent and as independent of the phenomena which they are said to govern and which of necessity conform to them. . . . Nevertheless, the thoroughgoing naturalist, as we well know, will not defend this usage of law; . . . he claims to use law in quite another sense *Laws of nature* are for him only uniformities of coexistence and succession Orderly relation of the parts of a whole is here the outcome. But if we pitch upon any concrete thing or fact as possibly one of these parts, it is straightway itself resolved into coexistence and successions: indeed, so long as we can single out a definite "this" or "that" the analytic process continues *James Ward.*

The expression *laws of nature* means nothing but the uniformities which exist among natural phenomena (or, in other words, the results of induction) when reduced to their simplest expression. *J. S. Mill.*

— **l. of octaves,** the generalization, announced by Newlands, that when a number of the elements are arranged in order of their atomic weights, each one resembles the eighth one before or after it. See PERIODIC LAW. — **l. of parsimony** *or* **parcimony,** *Logic*, a principle of explanation which may be stated as follows: Do not assume more than is necessary to account for the facts. — **l. of partial pressures,** the law that in a mixture of gases each gas exerts the same pressure that it would exert if it alone occupied the space; — called also *Dalton's law*. — **l. of recapitulation.** *Embryol.* = THEORY OF RECAPITULATION. — **l. of relativity,** *Psychol.*, the law that every phase of an experience is influenced by all other phases of it and by all the past consciousness of the individual. — **l. of sines,** in plane trigonometry, $\frac{a}{\sin A} = \frac{b}{\sin B} = \frac{c}{\sin C} = 2r$, and in spherical trigonometry, $\frac{\sin a}{\sin A} = \frac{\sin b}{\sin B} = \frac{\sin c}{\sin C} = k$, where a, b, c are the sides and A, B, C the opposite angles of a triangle. — **l. of sufficient reason.** = PRINCIPLE OF SUFFICIENT REASON; — sometimes classed as a law of thought. — **l. of tangents,** in plane trigonometry, $a + b : a - b = \tan \frac{1}{2}(A + B) : \tan \frac{1}{2}(A - B)$, to which correspond Napier's Analogies in spherical trigonometry. (For a, A; b, B, see LAW OF SINES, above.) — **l. of the apex.** *U. S. Mining Law*, a law passed in 1872, the principle of which has been adopted in later Federal legislation, by which title to a given tract of mineral land with certain defined mining rights was granted to the locator of the surface covering the outcrop or apex. (See APEX, *n.*, 2.) — **law of the land,** the general law of the land; the law as duly administered by the machinery provided therefor. — **l. of the Medes and Persians,** frequently used in phrases as a type of the unalterable and irrevocable.

Know, O king, that the *law of the Medes and Persians* is, That no decree nor statute which the king establisheth may be changed *Daniel* vi 15. — **l. of thermoneutrality,** *Phys. Chem.*, the law that when dilute solutions of neutral salts are mixed and no precipitate is formed, no thermal effect is produced. — **l. of the staple.** See STAPLE. — **l. of Ti'ti-us** (tēt'sē-ōōs, tĭsh'ĭ-ŭs). = BODE'S LAW. — **l. of uses.** *Law.* See USE, *n.* — **l. of volumes.** = GAY-LUSSAC'S LAW **a**. — **l. of von Baer.** = VON BAER'S LAW. — **laws of association.** See ASSOCIATION OF IDEAS. — **laws of Faraday.** = FARADAY'S LAWS. — **Laws of Manu.** See MANU, LAWS OF. — **laws of motion,** *Physics*, three laws defined by Sir Isaac Newton. (1) Every body perseveres in its state of rest or of moving uniformly in a straight line, except so far as it is made to change that state by external forces. (2) Change of motion is proportional to the impressed force, and takes place in the direction in which the force is impressed. (3) Reaction is always equal and opposite to action, that is to say, the actions of two bodies upon each other are always equal and in opposite directions. — **Laws of O'lĕ'ron'** (ō'lĕ'rŏN'), an important medieval (12th century) code of maritime laws consisting of a compilation of the customary laws of the sea in force in the island of Oléron and the judicial decisions of the maritime court of the island. They were published by Eleanor, Duchess of Guienne (Aquitaine), and were one of the sources of the similar code called the **Laws of Wis'by** (wĭz'bĭ), after the town of Wisby, or Visby, on the island of Gotland, Sweden, which was made the basis of the ordinances of the Hanseatic League. — **laws of planetary motion.** See KEPLER'S LAWS. — **laws of thermodynamics.** *First Law:* In any thermodynamic change, a definite amount of heat is expended or goes out of existence for every unit of mechanical work done, and vice versa. *Second Law:* It is impossible for a self-acting machine, working entirely independently of any external agency, to convey heat from one body to another at a higher temperature. — **laws of thought,** *Logic*, the three laws of identity, contradiction, and excluded middle. The *law of identity* is stated by the formula "A is A," variously interpreted to mean that any judgment in which the subject and predicate terms are the same is a true judgment, that the copula affirms some existence or reality of which the judgment is true, or that the judgment expresses an abstract identity, symbolized by *A*, which is the basis of the predication of one meaning of another. The *law of contradiction* is stated "it is not-A," or, "No A is not-A," and it means that a contradiction cannot represent any real existence or conceivable thought. See CONTRADICTION. The *law of excluded middle* is stated, "Everything is either A or not-A," or, "A either is or is not B," meaning that between two contradictory statements there is no middle ground, both cannot be false, if one is denied the other must be affirmed. Bosanquet holds that it "ultimately affirms that reality is not merely one and self-consistent, but is a system of reciprocally determinate parts." The *law of sufficient reason* is sometimes included as one of the laws of thought. Many logicians prefer *principle* to *law* in designating the *laws of thought* separately; as, *principle* of identity, etc. — **laws of war,** *International Law*, the rules governing the rights and duties of belligerents. They affect chiefly prisoners, spies, traitors, private property, blockades, rights of capture, etc. — **to take,** *or* **have, the law of,** *or* **on,** to take or institute legal proceedings against; as, *to take the law of* one's neighbor. *Now Rare or Unculti n* ed

lawn tennis. A variety of the game of tennis, played in the open air upon a court of turf or some even surface. There are no side walls, and the ball is struck before touching the ground or upon the first bound. See TENNIS. The scoring is as follows : The first point is scored as **fifteen**, the second point won by the same side makes its score **thirty**, the third makes its score forty, the fourth, unless the score has been at deuce, wins the game. Nothing, or no point, is termed **love**. If each side has scored 15 the score is **fifteen all**, and for 30, **thirty all**. If each side has scored 40 the score is **deuce** (rarely, **forty all**). The first point won after the score is at deuce is called **vantage**, or **advantage**, for the side making it, but the score becomes deuce thereafter as often as a tie in the number of strokes won occurs, until one side wins two successive strokes following a tie or deuce, which decides the game. A side which first wins six games wins the **set**, except that if each side has won five games the score becomes **deuce set** (sometimes called **five all**, or **games all**) and reverts to deuce set, or games all, whenever a tie in the number of games won occurs, until one side wins two successive games following such a tie, which decides the set. The scoring is the same in tennis (specifically called **court tennis**).

-le. [ME. *-len*, AS. *-lian.*] A suffix forming verbs, orig. frequentative and diminutive; as, *joggle, nestle, sprinkle*, etc. In many words the frequentative or diminutive force is no longer felt.

-le. The modern representative in a number of nouns and adjectives of different old suffixes. The most important of these in NOUNS are: (1) a dim. suffix, in AS. *-el* (cf. KERNEL), as in *icicle, knuckle, hurdle;* (2) a suffix expressing the agent, as in AS. *bydel* (cf. BEADLE); hence (3) a suffix, in AS. *-el*, expressing the instrument, as in *girdle, ladle, beetle*, a mallet. Nouns with this ending may come from verbs in *-le*, as *gabble.* In ADJECTIVES the most important source is, in AS. form, *-ol*, indicating a tendency to the action expressed by the verb from which the adjective is formed, as in *brickle, brittle, fickle.*

In words from French which are thoroughly naturalized in English this ending may come from various French endings or suffixes of Latin origin; as in: *couple*, n.; *mantle; pestle, trestle; bottle; cattle; battle; able, humble; gentle.* Cf. also -EL, -AL.

The ending *-le* occurs also as part of other suffixes; cf. for example -ABLE, and the words NEEDLE, RIDDLE, a puzzle.

lea (lē), *n.* [ME. *ley, lay*, AS. *lēah, lēa;* cf. G. dial. *loh* bog, grove, and L. *lucus* grove.] Pasture or grassland, as arable land laid down with grass; a pasture, or meadow. "Plow-torn *leas*" *Shak.*

The lowing herd winds slowly o'er the *lea.* *T. Gray*

lea (lē), *a.* [Cf. LEA pasture, LEA RIG.] Fallow; unplowed. *Eng.*

lea (lē), *n.* [Perh. for *leas*, taken as pl., fr. OF. *laissier* to leave, F. *laisser*, or a derived noun *laisse.* Cf. LEASE.] *Textile Manuf.* **a** A varying measure of yarn; for linen, usually 300 yards; for cotton and silk, 120 yards; a lay. **b** A set of warp threads carried by a loop of the heddle.

leach (lēch), *v. t.*; LEACHED (lēcht); LEACH'ING. [Cf. AS. *leccan* to moisten, wet, E. LETCH.] **1.** To wet; moisten.

2. To percolate (a liquid) through something, as ashes.

3. To subject to the action of percolating water or other liquid in order to remove the soluble parts; to lixiviate; as, to *leach* ashes or coffee.

4. To dissolve out by the action of a percolating liquid; — often used with *out;* as, to *leach* out alkali from ashes.

leach, *v. i.* **1.** To become fluid or melt. *Obs. Oxf. E. D.*

2. To part with soluble constituents under the effect of a percolating liquid.

leach, *n.* Also *letch.* [See LEACH, *v. t.*] **1.** A perforated vessel to hold wood ashes through which water is to be passed to extract the lye.

2. *Tanning.* A pit or tub in which ooze or tan liquor, subsequently transferred to the tan pits, is made by steeping tan bark in water.

3. *Salt Making.* The saturated brine that is drained from the salt, or left in the pan when the salt is drawn out.

leach'y (-ĭ), *a.* Permitting liquids to pass by percolation; not capable of retaining water; porous; pervious; — said of gravelly or sandy soils, and the like.

lead (lĕd), *n.* [ME. *led, leed, lead*, AS. *lēad;* akin to D. *lood*, MHG. *lōt*, G. *loth* plummet, sounding lead, small weight, Sw. & Dan. *lod*, Ir. *luaidhe* lead.] **1.** A metallic element, heavy, pliable, and inelastic, having a bright, bluish color, but easily tarnishing to dull gray; symbol, *Pb* (L. *plumbum*); at. wt., 207.10; sp. gr., 11.4; weight of a cubic foot about 710 lbs. It rarely occurs native, being usually found in the form of the sulphide, galena, its chief ore. Other lead minerals are cerussite and anglesite (also used as ores), bournonite, pyromorphite, crocoite, wulfenite, etc. Lead is reduced usually by heating with coke or iron in a blast furnace, but also by partial roasting and self-reduction in a reverberatory. The crude product is often treated for the silver and gold which it contains. See PARKES PROCESS, PATTINSON PROCESS. Refined lead is malleable and ductile, though with little tenacity, and is rolled into sheets and drawn into tubes and pipes. It is easily fusible, melting at about 330° C. (626° F.), and hence is easily cast into bullets. Lead is a valuable constituent of alloys, as solder, type metal, Babbitt metal, and pewter, and is very extensively used in making white lead, litharge, minium, etc. Chemically, lead is bivalent (as in litharge and the series of lead salts) and quadrivalent (as in the dioxide). Its salts are poisonous.

2. An article made of lead or an alloy of lead; as: **a** A pot, kettle, caldron, or pan of lead, or, later, of any material. *Obs. or Dial.* **b** A plummet or mass of lead, as one used in sounding at sea. See SOUNDING LINE. **c** *Print.* A thin strip of type metal, used to separate lines of type in printing; hence, a similar strip of brass. Leads vary in thickness from one point ($\frac{1}{72}$ of an inch) to three points ($\frac{1}{24}$) (from twelve to four to pica). The commonest in use is the 2-point; thinner ones are called *thin leads* and thicker ones *thick leads.* **d** *pl.* In England, a familiar term for a flat roof which may be treated as a floor. Not in use in U. S., where lead is sometimes used for church roofs, but tin plate for flat roofs, almost universally. (Cf. PLUMBER, who in England is a roofer; in U. S. not so.) **e** *pl.* Lead framing for panes, as in windows of latticework or stained glass. **f** A lead or tin socket to hold one or more needles in a knitting machine by their shanks. **g** *pl. Salt Making.* A very shallow lead pan used for evaporating brine.

3. **a** Short for BLACK LEAD. **b** A thin cylinder of black lead, or plumbago, used in pencils.

lead (lĕd), *v. t.*; LEAD'ED; LEAD'ING. **1** To cover, or line the inside of, with lead; to clog with lead, as the grooves of a rifle with continuous firing; also, to weight with a piece of lead; to attach lead to.

2. To fix (window glass) in position with leads. Also with *in, up.* See LEAD, *n.* (the metal), 2 **e**.

3. To secure with melted lead, as a bolt or railing into stonework; — often with *in.*

4. To glaze (pottery) with a glaze of which lead or one of its compounds is the chief constituent.

5. *Print.* To place leads between the lines of; — often with *out;* as, to *lead* a page; *leaded* matter.

6. *Mech.* To smooth with a lead lap, as the bore of a gun.

lead (lĕd), *v. i.* **1.** *Naut.* To take soundings with the lead. *R.*

2. To become coated or clogged with lead, as a gun barrel.

lead (lēd), *v. t.*; LED (lĕd); LEAD'ING. [ME. *leden*, AS. *lǣdan* (akin to OS. *lēdian*, D. *leiden*, G. *leiten*, Icel. *leiða*, Sw. *leda*, Dan. *lede*), properly a causative fr. AS. *līdan* to go; akin to OHG. *līdan*, Icel. *līða*, Goth. *leipan* (in comp.). Cf. LOAD, LODE.] **1.** To cause to go with one's self; to bring or take; as, to be *led* up to heaven. *Obs.*

2. To carry or convey, as in a vehicle; to cart; as, to *lead* teinds. *Obs. or Scot. & Dial. Eng.*

3. To bring forward; to introduce, as testimony; to bring. *Obs., except in Scots Law.*

4. To guide or conduct with the hand or by means of some physical contact or connection, as, a father *leads* a child; a jockey *leads* a horse with a halter; a dog *leads* a blind man.

5. To guide or conduct in a certain course, or to a certain place or end, by making the way known; to show the way, esp. by going with or going in advance of; to mark out or show the way to; to serve as a way for. Hence, fig.: To direct in action, thought, opinion, etc.; counsel; instruct; as, this road will *lead* a traveler to Rome; to *lead* a pupil

The Lord went before them by day in a pillar of a cloud, to *lead* them the way. *Ex* XIII. 21.

6. To conduct or direct in motion or action with authority; to have direction or charge of; to take the directing part, or have the initiative, in; as, to *lead* an army or a search; to *lead* a political party; to *lead* an orchestra.

7. To go or to be in advance of; to precede and direct in movement; hence, to be foremost or chief among; to have precedence of; as, the big sloop *led* the fleet; the Guards *led* the attack; Demosthenes *leads* all orators.

And lo! Ben Adhem's name *led* all the rest. *Leigh Hunt*

8. To draw or direct by influence, good or bad; to prevail on; to induce; entice; allure; as, to *lead* one to espouse a righteous cause; to *lead* one astray.

9. To direct, or serve as a way or channel for, the course of (an inanimate thing); to guide or constrain in its passage or course; as, the gutter *leads* the water from the roof; the rope is *led* round the curve by two pulleys.

10. To conduct or carry on; to manage or govern. *Obs.*

11. To guide or conduct one's self in, through, or along (a certain course); hence, to proceed in the way of; to follow the path or course of; to pass; spend. Also, to cause (one) to proceed or follow in (a certain course).

That we may *lead* a quiet and peaceable life. 1 *Tim.* II. 2.

The life he used to *lead* his wife and daughter *Dickens.*

12. To engage in carrying on or performing (dances, songs, etc.); to take part in. *Obs.*

13. *Cards, Dominoes, etc.* To begin a game, round, or trick, with; as, to *lead* trumps; the double five was *led.*

to lead (one) **a chase**, to elude (a pursuer) so as to cause him to chase with effort. — **to lead** (one) **a dance**, to cause one to go through a series of movements or experiences as if guided by a partner in a dance not understood. — **to l apes in**, *or* **into**, hell, to die unmarried, — old maids being playfully asserted to be so occupied in the future life. *Obs. Shak.* — **to l by the nose**, to lead at pleasure, or to cause to follow servilely; to lead blindly, as a person leads a beast. *Shak.* — **to l. captive**, to carry or bring into captivity. — **to l. off**, to begin or take the lead in; to open; as, he *led off* the dance. — **to l. out**, to lead off (a dance, or the like); also, to take as a partner for a dance. — **to l. the way**, to show the way by going in front; to guide. — **to l. to the altar**, to marry (a woman). — **to l. up**, to lead off (a dance). *Obs.*

lead (lēd), *v. i.* **1.** To guide or conduct, as by accompanying, going before, showing, directing with authority, etc.; to have precedence or preeminence, to be first; — used in most of the analogous senses of *lead*, v. t.

2. To be led; to suffer leading; to admit of being led; as, this horse *leads* hard.

3. To tend or reach in a certain direction, or to a certain place; to take its course; as, all roads *lead* to Rome; gambling *leads* to other vices.

to lead off *or* **out**, to go first; to begin.

lead (lēd), *n.* **1.** Action of one that leads or conducts; guidance; direction; as, to take the *lead;* to be under the *lead* of another.

At the time I speak of, and having a momentary *lead*, . . . I am sure I did my country important service *Burke*

2. Precedence; advance position; also, the measure of precedence; as, the white horse had the *lead;* a *lead* of a boat's length, or of half a second.

3. *Cards, Dominoes, etc.* Act or right of playing first in a game, round, or trick; the card, suit, or piece so played; as, your partner has the *lead;* his *lead* was the ace, also, *Curling*, the first player.

4. That which leads or acts as a guide; as: **a** An artificial waterway, as to a mill. **b** A path or alley. *Rare.* **c** An open way or channel in an ice field. **d** A leading string, or leash. **e** *Railroads.* A piece of track leading from a switch to a frog. **f** *Logging.* A snatch block designed to be fastened to a convenient stationary object, used for guiding the hauling cable.

5. It is also (rarely) called the *subtonic.* — **1. question,** a question so framed as to guide the person questioned in making his reply; a leader. Leading questions are not allowed in proceedings at law in the examination of one's own witnesses (unless the witness is hostile). — **1. rein,** a rein used for leading an animal. — **1. screw.** *Mach.* See FEED SCREW. — **1. seventh,** *Music,* the first inversion of the dominant major ninth chord. *E. Prout.* — **1. strings,** strings by which children are sometimes supported when beginning to walk; hence, to be in **l. strings,** to be in a state of infancy or dependence, or under the guidance of others. — **1. wheel,** any of the wheels situated before the driving wheels of a locomotive engine. — **1. wind,** *Naut.,* a free or fair wind. — **1. wire,** *Elec.,* a lead.
— **lead'ing-ly,** *adv.*

lead pencil (lĕd). A pencil of which the marking material is graphite (black lead).

lead plant (lĕd). Any of several American fabaceous shrubs of the genus *Amorpha,* esp. *A. canescens,* found throughout the western United States, where its presence is supposed to indicate lead ore. It has hoary-canescent pinnate leaves and dull-colored racemose flowers.

lead poisoning. *Med.* A diseased condition produced by the absorption of lead into the system, common among workers in this metal or in its compounds, as among painters, typesetters, etc.; plumbism. It is characterized by various symptoms, such as anæmia, disturbed nutrition, severe colicky pains, the blue lead line on the gums, local muscular paralysis (wrist drop), etc.

leads'man (lĕdz'măn), *n.; pl.* **-MEN** (-mĕn). *Naut.* The man who heaves the lead.

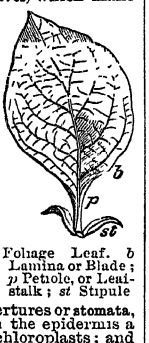
lead tree (lĕd). **1.** *Chem.* Lead crystallized in arborescent forms from a solution of some lead salt, as by suspending a strip of zinc in lead acetate.
2. A tropical American mimosaceous tree (*Leucæna glauca*); — prob. so called from the glaucous leaves.

lead wash *or* **water** A dilute solution of basic acetate of lead, used in medicine as an external application, esp. in inflammatory conditions arising from sprains, bruises, burns, blisters, etc.

lead'wort' (lĕd'wûrt'), *n.* Any plant of the genus *Plumbago,* esp. *P. europæa;* — so called from the lead-blue flowers; also, any plant of the family Plumbaginaceæ.

lead'y (-Y), *a.* Containing, or resembling, lead.

leaf (lēf), *n.; pl.* **LEAVES** (lēvz). [ME. *leef, lef, leaf,* AS. *léaf;* akin to OS. *lâf,* OFries. *laf,* D. *loof* foliage, G. *laub,* OHG. *loub* leaf, foliage, Icel. *lauf,* Sw. *löf,* Dan. *lov,* Goth. *laufs.* Cf. LODGE.] **1. a** One of the lateral outgrowths of a stem, produced in definite succession from the growing point of the latter; esp., in popular usage, one of the ordinary green expanded organs (**foliage leaves**) which make up most of the external covering of a plant, and serve for the elaboration of sap into food materials, as distinguished from floral leaves, scales, and bracts, which perform other than vegetative functions. The relation of foliage leaves to light (see PHOTOSYNTHESIS) results in great diversity of form. Generally, but not always, they consist of three parts: a flat expansion, or **blade,** a stalk, or **petiole,** and a pair of appendages, or **stipules,** at the base. The blade may be simple, or compound, when it is divided into many segments often resembling separate leaves. True foliage leaves are confined to the ferns and seed plants; among the latter they often exhibit special modifications, as insect traps, climbing organs (tendrils), etc. Most ordinary foliage leaves are dorsiventral, though sometimes centric or isobilateral. A section of a typical leaf exhibits on both surfaces a layer of epidermal cells, penetrated by apertures or **stomata,** generally on the under surface; beneath the epidermis a layer of columnar **palisade cells,** rich in chloroplasts; and beneath these a spongy tissue, or **mesophyll,** with numerous intercellular spaces, through which transpiration and gaseous interchange is facilitated. The parenchyma of the leaf is strengthened and supported by a system of **veins,** which are continuations of the vascular bundles in the stem. Technically the term *leaf* includes, besides *foliage leaves,* all foliar structures of the higher plants, as scales and bracts (protective leaves), the perianth of a flower and the sporophylls (floral leaves). Every form of leaf originates from embryonic rudiments and differs from a shoot in that its growth is limited. Arising in definite acropetal or basipetal succession, leaves mark the internodes of a stem and fix the position of the normal branches. See PHYLLOTAXY. **b** A petal; as, a rose *leaf. Colloq.*



Foliage Leaf. *b* Lamina or Blade; *p* Petiole, or Leaf-stalk; *st* Stipule

2. Tobacco leaves collectively; also, the leaf form of tobacco; — generally with attributive, as Connecticut seed *leaf.*
3. Collectively, the leaves of any plant as an article of commerce, as those of the tea plant.
4. Leaf-sickness. *Obs.*
5. Something suggestive of a leaf, as in being wide and thin, or in being attached to a larger body by one edge or end; as: **a** A part of a book or folded sheet containing two pages, one on each side; also, the written or printed matter thereon. **b** A side, division, or part that slides or is hinged, as of window shutters, folding doors, etc. **c** The movable part of a table top, whether hinged, or separate, as in an extension table. **d** Metal in thin layers, usually thinner than foil. **e** A thin sheet or plate of any substance, natural or made artificially; a lamina; as, the *leaves* in a hoof. **f** One of the layers of fat (**leaf fat**) about the kidneys of a hog, from which leaf lard is made; also, a similar layer of fat in other animals. **g** A hat brim. **h** *Weaving.* A loom harness. **i** *Mach.* (1) Any of the teeth of a pinion, esp. when the pinion is small and comparatively thick. (2) Any of the cylindrical pieces serving as the teeth of a lantern or trundle. **j** *Foundry.* A molder's leaf-shaped trowel or tool. **k** *Firearms.* = LEAF SIGHT. **l** *Math.* A loop of a leaf-shaped curve. **m** One of the laminæ of a laminated spring. **n** One of the thin layers formed by the blisters that form on soap when boiled for evaporation.
to take a leaf out of one's book, to follow, or learn from, one's example.

leaf (lēf), *v. i.;* **LEAFED** (lēft); **LEAF'ING.** To shoot out or produce leaves; to leave; as, the trees *leaf* in May.

leaf, *v. t.* To turn or separate the leaves of, as of a book.

leaf'age (lēf'ĕj), *n.* Foliage; leaves collectively.

leaf beetle. Any beetle of the family Chrysomelidæ.

leaf blade. *Bot.* The expanded portion of a leaf; lamina.

leaf blight. A fungous disease of various cultivated plants, causing decay and fall of the leaves; also, any of the numerous parasitic fungi causing it.

leaf bridge. A drawbridge having a platform, or leaf, which swings vertically on hinges.

leaf bug. Any of various bugs, esp. of the heteropterous families Tingitidæ and Capsidæ. See CAPSIDÆ.

leaf butterfly. Any of certain butterflies which mimic leaves, esp. those constituting the nymphalid genus *Kallima,* found in southern Asia and the East Indies; — so called because they are so shaped and colored that when settled on a twig, with wings closed, the appearance is almost exactly that of a dry leaf.

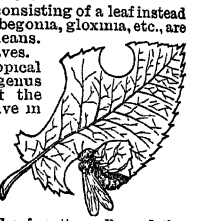
leaf climber. *Bot.* A climbing plant that supports itself by means of its leaves, these either having petioles which twist round the support, as in the clematis, or developing tendrils, as in the pea. — **leaf'-climb'ing,** *a.*

leaf'cup' (lēf'kŭp'), *n.* A coarse American asteraceous weed of the genus *Polymnia* (*P. uvedalia* and *P. canadensis*); — so called from the leafy, cup-shaped involucre.

leaf curl. A very common and destructive disease caused by the parasitic fungus *Exoascus deformans,* affecting the leaves of stone fruits, esp. the peach.

leaf cutting. *Hort.* A cutting consisting of a leaf instead of a shoot. Many plants, as the begonia, gloxinia, etc., are commonly propagated by this means.

leaf'-cut'ting, *a.* That cuts leaves.
leaf-cutting ant, any of several tropical American ants, mostly of the genus *Atta,* which cut and carry off the leaves of certain trees. They live in large colonies, and utilize the material cut from the leaves to cultivate a certain fungus, their chief food. — **1. bee,** any of various wild bees of the genus *Megachile,* which cut rounded pieces from the edges of leaves, or petals, to be used in building their nests, which are made in holes and crevices, or in a rolled-up leaf. Among the common American species are *M. brevis* and *M. centuncularis.*



Leaf-cutting Bee of the Rose (*Megachile centuncularis*). (¾)

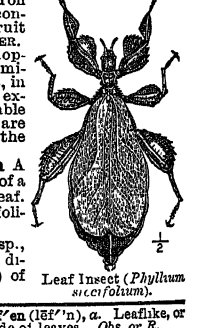
leaf folder. Any of several moths whose larvæ make shelter cases by folding the leaves of plants, as the apple *leaf folder* (*Alcemis minuta*).

leaf'-foot'ed, *a.* Having leaflike expansions on the legs. — **leaf-footed bug,** *also* **leaf-foot bug,** any large sap-sucking bugs of the genus *Leptoglossus,* having leaflike expansions on the legs, esp.: **a** *L. oppositus,* injurious to the cucumber, melon, and squash. **b** *L. phyllopus,* very injurious to the orange, peach, pear, etc.

Leaf-footed Bug (*Leptoglossus phyllopus*) × ½.

leaf hopper. Any of numerous small leaping homopterous insects which constitute the family Jassidæ or superfamily Jassoidea (see JASSIDÆ). They are usually of slender rather elongated form, holding the wings, when at rest, in a sloping position on the back like the sides of a gable roof, and having a row of spines on the hind tibiæ. They suck the juices of plants, and on account of their abundance do considerable damage to grass, fruit trees, etc. See GRAPE-LEAF HOPPER.

leaf insect. Any of certain orthopterous insects of the family Phasmidæ, esp. of the genus *Phyllium,* in which the wings, and sometimes expansions upon the legs, resemble leaves in color and form. They are common in southern Asia and the East Indies.



Leaf Insect (*Phyllium siccifolium*). ½

leaf'let (lēf'lĕt), *n.* **1.** *Bot.* **a** A sepal. *Obs.* **b** One of the divisions of a compound (pinnate or palmate) leaf.
2 Popularly, a small or young foliage leaf.
3. A leaflike organ or part; esp., *Human Anat.,* one of the three divisions (right, middle, and left) of the diaphragm.

explorer.] An Australian cockatoo (*Cacatua leadbeateri*) which is white with a red and yellow crest and a pinkish tinge to the head and under parts.
lead eater (lĕd) India rubber; — an obs. popular name alluding to its use in erasing marks of black lead pencil from paper.
lead'ed (-ĕd), *pret. & p. p.* of LEAD to cover, etc., with lead.
— **leaded glass** *or* **sash,** sash in which the glass is held together by lead bars of I-shaped section
lead'en, *v. t.* To make like lead.
lead'er-ess (lēd'ẽr-), *n.* See -ESS.
lead'er-ette' (-ĕt'), *n.* A short editorial paragraph in a periodical. *Eng.*
lead'er-less, *a.* See -LESS.
lead'er-ship, *n.* See -SHIP.
lead glass (lĕd). Glass containing lead. See FLINT GLASS.
lead glaze. An earthenware glaze containing lead, mostly disused because poisonous.
lead'ish, *a.* Like lead. *Obs.*
lead lap (lĕd). *Mach.* A lap of lead charged with emery and oil.
lead'less, *a.* See -LESS.
lead light (lĕd). A leaded light; a window or part of a window (see LIGHT) of leaded glass.
lead line (lĕd). a *Med.* A dark line along the gums due to deposition of metallic lead, in lead poisoning. b *Naut.* A sounding line.
lead line (lĕd). **1.** *Engin.* The vertical line to the left of an indicator diagram, showing by its distance from the diagram the amount of lead.
2 *Logging.* A wire rope, with an eye at each end, used to anchor the snatch block in setting a lead.
lead'man (lĕd'măn), *n.* A worker or a dealer in lead; also, a lead miner. [for polishing.
lead mill. A lapidary's lead lap
lead monoxide. See LITHARGE.
lead nail (lĕd). A nail to secure sheet lead to a roof.
lead nitrate. *Chem.* A soluble, white, crystalline salt, $Pb(NO_3)_2$, obtained by dissolving lead or lead oxide in dilute nitric acid. It is used in dyeing. [COT.
lead ocher *or* **ochre.** = MASSI-
lead'-off' (lĕd'ôf'), *n.; pl* **-OFFS** (-ôfs'). A beginning or leading action, as in boxing, a hit made in offense.
lead palsy (lĕd). *Med.* Paralysis due to lead poisoning. [oxide.
lead peroxide. *Chem.* Lead di-
lead plaster. *Pharm.* A plaster containing lead salts of the fatty acids; diachylon.
lead rail (lĕd). Either of the rails of a lead. See LEAD, *n.*, 4 e
lead reins (lĕd). The reins of leading horses. [FEED SCREW.
lead screw (lĕd). *Mach.* See
leads'man, *n.* Lodesman. *Obs.*
lead soap (lĕd) A soap consisting of the lead salt of a fatty acid; specif., lead plaster.
lead spar (lĕd). *Min.* = CERUS-SITE. [STONE.
lead'stone' (lĕd'-), *n.* = LOAD-
lead sulphate (lĕd). *Chem.* A compound, $PbSO_4$, occurring native as anglesite, and obtained artificially as a white crystalline powder.
lead sulphide. *Chem.* A compound, PbS, occurring native as galena, and obtained artificially as a black precipitate.
lead track (lĕd). *Railroads.* An extended track connecting either end of a yard with the main line; a drilling track.
lead vinegar (lĕd). A solution of basic acetate of lead.
lead vitriol (lĕd). = ANGLESITE
lead'way' (lĕd'wā'), *n.* A way that leads to a particular place.
lead white. = WHITE LEAD **a.**
lead work. = FILLING e.
lead'work' (lĕd'wûrk'), *n.* Anything made of lead, or work that is done with lead.
lea'e (lē). Scot. var. of LEAVE.
leaf + LIVE, LIVE.
leaf bud. A bud which develops into a leafy shoot and does not produce flowers.
leaf bundle *Bot.* A leaf trace.
leaf chafer. Any of numerous scarabæid beetles which when adult feed on foliage, as the cockchafer and May beetles.
leaf comb *Poultry.* See COMB, 3.
leaf crumpler. Any of several species of small American moths or their caterpillars, which form a nest by crumpling and fastening leaves together in clusters. The best-known species (*Mineola indigenella*) feeds on the apple and related trees.
leaf cutter. A leaf-cutting ant or bee. [-DOM.
leaf'dom (lēf'dŭm), *n.* See
leafed (lēft), *a.* Having (such) a leaf or (so many) leaves; — used in composition.
leaf'en (lēf'n), *a.* Leaflike, or made of leaves. *Obs. or R.*
leaf'er-y (-ẽr-Y), *n.* Leafage. *R.*
leaf fat See LEAF, *n.*, 5f
leaf finch. The bullfinch. *Local, Eng.*
leaf flea. A jumping plant louse of the family Psyllidæ.
leaf'ful, *a.* [AS. *léaffull, geléaffull.* Cf. BELIEF.] Believing; faithful. *Obs.*
leaf gap. *Bot.* A break in the conjunctive tissue of a hollow stele, caused by the separation of the vascular bundle of a leaf.
leaf green. Chlorophyll.
leaf'i-ness, *n.* See -NESS.
leaf'ing, *p. pr. & vb. n.* of LEAF.
leaf'it, *n.* [Dim. of *leaf.*] A leaflet. *Obs.*
leaf lard. See LARD, LEAF, 5f.
leaf'less, *a* See -LESS. — **leaf'-less-ness,** *n.*
leaf lichen. A foliaceous lichen.
leaf louse. An aphid.
leaf manna. = LERP.

4. *Print.* A sheet of small pages which are folded, but not stitched; a folder.

leaf metal. Metal in thin leaves, as gold, silver, or tin.

leaf miner. Any of various small insects, mostly Lepidoptera and Diptera, which, in the larval stages, burrow in and eat the parenchyma of leaves; as, the pear-tree *leaf miner* (*Orniix geminatella*).

leaf mosaic. *Bot.* The closely interwoven pattern or mosaic exhibited by the leaves of many plants through adjustment to the light relations. The tendency to expose as large a leaf surface as possible to sunlight results in the close fitting of one leaf to the space between its neighbors. The common ivy affords an example of a *leaf mosaic.*

leaf'-nosed' (lēf'nōzd'), *a.* Having a leaflike membrane on the nose; — said of certain bats, esp. of the families Phyllostomatidæ, Rhinolophidæ, and Nycteridæ.

leaf notcher. A pale bluish green beetle (*Artipus floridanus*), which, in Florida, eats the edges of the leaves of orange trees; — called also *orange-leaf beetle.*

leaf roller. The larva of any insect (esp. certain tortricid moths) which makes a nest by rolling up plant leaves.

leaf rust. Any disease of leaves due to parasitic fungi of the order Uredinales; also, a fungus causing the disease.

leaf sewer. A tortricid moth, or its caterpillar, which makes a nest by rolling up a leaf and fastening the edges together with silk, as if sewn; esp., *Ancylis nubeculana*, which feeds upon the apple tree.

leaf sheath. **a** = SHEATH, 2 **a.** **b** = OCREA. **c** The sheathing base of a petiole, as that of the grasses.

leaf sickness. A digestive disorder of sheep, esp. young lambs, confined to localized sections and supposed to be caused by the ingestion of certain leaves.

leaf sight. *Firearms.* A hinged sight on a firearm, which can be raised or folded down, usually carrying a sliding bar with the peephole or notch. See SIGHT, *Illust.*

leaf spine. *Bot.* A spine developed from a leaf instead of from a branch, as that of the barberry.

leaf spot. Any disease of plants causing discolored spots upon leaves, due to parasitic fungi of the genera *Phyllosticta, Septoria*, etc.; also, any fungus causing the disease.

leaf'stalk' (lēf'stôk'), *n.* A petiole.

leaf' ti'er (tī'ẽr). A tortricid moth whose larva makes a nest by fastening the edges of a leaf together with silk, esp., *Alceris cinderella*, found on the apple tree.

leaf trace. *Bot.* One of the vascular bundles passing from a leaf into a stem, continuing distinct for some distance before it fuses with the stele.

leaf'work' (lēf'wûrk'), *n.* Any ornamental work resembling leaves.

leaf'y (-i), *a.*; LEAF'I-ER (-i-ẽr); LEAF'I-EST. **1.** Furnished with, or abounding in, leaves; clothed with leaves; as, the *leafy* forest. "The *leafy* month of June." *Coleridge.* **2.** Having broad-bladed leaves; broad-leaved. **3.** Made or consisting of leaves. "A *leafy* bed." *Byron.* **4.** Of the nature of a leaf; laminate; as, a *leafy* layer.

league (lēg), *n.* [Cf. OF. *legue*, commonly *lieue, liue*, a measure of length, F. *lieue*, Pr. *lega, legua;* all fr. LL. *leuga, leuca*, of Celtic origin: cf. Armor. *leo, lev* (perh. from French), Ir. *leige* (perh. from English).] **1.** A measure of distance varying for different times and countries from about 2.4 to 4 6 miles (3.9–7.4 kilometers). In English-speaking countries it is estimated at three miles, either statute (land league, 4 83 km.) or nautical (marine league, 5 56 km.), but is usually employed indefinitely or poetically. In France the league (*lieue*) is now 4 km. (2.49 mi.). The old Spanish land league (*legua*) of 4.23 km. (2.63 mi.) is used in the Philippines, Mexico, Texas, etc. Other values are: Argentina, 5.20 km. (3.23 mi.) or 5 km. (3 11 mi.); Brazil, 6 17 km. (3 84 mi.) or 6.60 km. (4.10 mi.); Bolivia, about 5.60 km. (3 50 mi.); Paraguay, 4.33 km. (2.69 mi.).

2. A measure of area; a square league (5,760 acres for the English land league; about 4,409 acres, or 1,785 hectares, for the old Spanish land league).

3. A stone erected near a public road to mark the distance of a league. *Obs.*

league (lēg), *n.* [F. *ligue*, It. *liga*, var. of *lega*, fr. L. *ligare* to bind; cf. Sp. *liga.* Cf. ALLY a confederate, LIGATURE.] **1.** An agreement or covenant between two or more nations, parties, or persons, for the accomplishment of some purpose by their coöperation, as for mutual defense, or for furtherance of commercial, religious, or political interests, etc.; also, the alliance or combination so formed, or the parties to it taken collectively; a confederacy.

And let there be
'Twixt us and them no *league*, nor amity. *Denham*

Among the more celebrated *leagues* are the following:

NAME.	PARTIES & DATE.	PURPOSE, OUTCOME, ETC.
Achæan L.	Greek towns; 281 B. C.	Overthrown by Rome in 146 B. C.

L. of the Gueux *or* Beggars	Nobles and gentlemen of Netherlands; 1566	Against estab of Inquisition; broken up in 1567; many executed.
Lombard L., *or* L. of Lombardy	Northern Italian cities; 1167	Against Emperor Fredk. I; gained independence (1183); successfully revived in 1226 against Fredk. II.

2. Any agreement, compact, or covenant. *Rare.*

Syn. — Combination, compact, covenant, coalition, confederacy, confederation. See ALLIANCE.

The League, the Holy League of 1576–93. See above.

league (lēg), *v. a. & i.*; LEAGUED (lēgd); LEA'GUING (lē'ging). [Cf. F. *se liguer.* See 2d LEAGUE.] To unite in a league or confederacy; to combine for mutual support; to confederate. *South.*

lea'guer (lē'gẽr), *n.* A member of a league; specif. [*cap.*], *F. Hist.*, a member of the Holy League.

lea'guer, *n.* [D. *leger* camp, bed, couch, lair. See LAIR; cf. BELEAGUER.] **1.** The camp of a besieging army, a camp in general. *Obs. or Hist.*

2. A siege or beleaguering. *Rare.* *Scott.*

leak (lēk), *n.* [Akin to D. *lek* leaky, a leak, G. *leck*, Icel. *lekr* leaky, Dan. *læk* leaky, a leak, Sw. *läck;* cf. AS. *hlec* full of cracks or leaky (perh. not a kindred word). Cf. LEAK, *v.*] **1.** A crack, crevice, fissure, or hole which (contrary to what is intended) admits water or other fluid, or lets it escape; as, a *leak* in a roof; a *leak* in a gas pipe. "One *leak* will sink a ship." *Bunyan.* Also fig.; as, a *leak* in the treasury.

2. Act of leaking; leakage; as, the *leak* gained on the ship's pumps; the *leak* of a secret.

3. *Elec.* A loss of electricity through imperfect insulation; also, the point at which such loss occurs.

leak, *v. i.*; LEAKED (lēkt); LEAK'ING. [Akin to D. *lekken*, G. *lecken, lechen*, Icel. *leka*, Dan. *lække*, Sw *läcka;* cf. AS. *leccan* to wet, moisten. See LEAK, *n.*] **1.** To let water or other fluid in or out (contrary to what is intended) through a hole, crevice, etc.; as, the cask *leaks;* the boat *leaks.*

2. To enter or escape (contrary to what is intended), as a fluid, through a hole, crevice, etc.; to pass gradually into, or out of, something; also, fig., to be divulged gradually or clandestinely; to become public; — usually with *in* or *out;* as, the facts *leaked* out.

3. To urinate. *Obs.*

4. Of dynamite, to sweat.

leak, *v. t.* **1.** To permit to enter or escape through a leak; as, to *leak* water or gas. *Hooke.*

2. To permit or cause to flow or escape little by little, as if by a leak. *Obs. or Dial. Eng.*

leak'age (lēk'ăj), *n.* [Cf D. *lekkage*, for sense 1.] **1.** A leaking; an entering or escaping by a leak.

2. *Com.* An allowance, or tare, of a certain rate per cent for loss by leaking.

3. *Elec.* A leak; leakage flux.

4. That which, or the amount that, leaks in or out.

leakage coefficient. *Elec* A coefficient, variously defined, for indicating the amount of magnetic leakage, as the ratio of leakage flux to useful or total flux, or the ratio of total to useful flux.

leakage conductance. *Elec.* The reciprocal of insulation resistance, measuring the imperfection of insulation.

leakage conductor. *Elec.* A conductor providing a direct path for leakage currents in order to prevent leakage into neighboring lines.

leakage flux. *Elec.* Lines of force which do not follow a useful path, as the lines which pass between the pole pieces of a dynamo without passing through the armature, or the lines which fail to pass through both primary and secondary windings of a transformer or induction motor; — called also *magnetic leak* or *leakage*

leakage reactance. *Elec.* Reactance due to leakage flux.

leak'y (lēk'i), *a.*; LEAK'I-ER (-i-ẽr); LEAK'I-EST. **1.** Permitting water or other fluid to leak in or out; as, a *leaky* roof or cask.

2. Apt to disclose secrets; tattling; not close. *Colloq.*

3. Incontinent of urine; obliged to urinate often.

leal (lēl), *a.* [OF. *leial*, another form of *loial*, F. *loyal.* See LOYAL.] **1.** Faithful; loyal; true. *Now Poetic or Dial.*

All men true and *leal*, all women pure. *Tennyson.*

2. True; genuine; correct; accurate; real; as, *leal* truth; a *leal* shot; *leal* testimony. *Obs.*

3. Legal; lawful; just. *Obs.*

Lear (lēr), *n.* A legendary king of Britain, and the hero of Shakespeare's tragedy "King Lear." In the play, Lear seeks to test his daughters' love for him by the strength of their protestations of it, with a view to relieving himself of the cares of state in his old age. His elder daughters, Goneril and Regan, so outshine their younger sister, Cordelia, that he divides his kingdom between them and disinherits Cordelia, who is none the less taken to wife by the king of France. Once in power, the elder daughters drive the old man to madness by their neglect and abuse of him, and he wanders away to the seacoast, where he is found and cared for by Cordelia, who with her husband has entered England with an army to rescue her father and restore his kingdom. In the battle that ensues, however, the sisters are successful, and Cordelia being captured, they cause her to be hanged in prison. Lear slays the hangman and rescues her body, but dies of grief when unable to restore her to life. (See GONERIL, REGAN.) Geoffrey of Monmouth, in whose "History" the Lear story is given at length, relates that "Leir" (son of Bladud) is restored to his throne by "Cordeilla," who defeats her sisters and succeeds her father. See LLYR.

learn (lûrn), *v. t.;* LEARNED (lûrnd) or LEARNT (lûrnt); LEARN'ING. 2. Knowledge or skill received by instruction or study; acquired knowledge or ideas in any branch of science or literature; erudition; as, a man of great *learning.*

Syn. — LEARNING, LORE, SCHOLARSHIP, ERUDITION, PEDANTRY. LEARNING is knowledge esp. as acquired by study; it is frequently contrasted with knowledge or wisdom gained by experience; as, "*Learning* is the knowledge of that which is not generally known to others, and which we can only derive at second hand from books or other artificial sources. The knowledge of that . . . which appeals to our experience, passions, and pursuits, to the bosoms and businesses of men, is not *learning*" (*Hazlitt*); "He is a man . . . of deep *learning*, but totally ignorant of life and manners" (*Mad. D'Arblay*); cf. "centuries less *learned* than ours, but with more light in them" (*M. Arnold*). LORE (often poet. for *learning*) is esp. the body of knowledge (often traditional) pertaining to a particular subject; as, "the *lore* of bards and sages old" (*Shelley*); folk*lore,* plant *lore.* SCHOLARSHIP (see SCHOLARLY) implies proficiency or adeptness in the learning of the schools; as, "Though his [Browning's] reading was wide and appreciative, it lacked . . . the touch of *scholarship* . . . which distinguished Tennyson" (*Saintsbury*). ERUDITION is esp. profound or recondite learning; as, "I arrived at Oxford with a stock of *erudition,* that might have puzzled a doctor" (*Gibbon*); cf. "a most *erudite* sermon on the rites and ceremonies of Christmas" (*Irving*); "He was too *erudite* and bookish" (*E. L. Godkin*) PEDANTRY is an obtrusive or ostentatious display of learning, or a narrow or finical insistence upon technical rules or conventions; as, "*Pedantry* is the too frequent or unseasonable obtruding our own knowledge in common discourse" (*Swift*); "the lapse of grace into affectation, of *learning* into *pedantry*" (*W. Pater*); cf. "It looks to me to be narrow and *pedantic* to apply the ordinary ideas of criminal justice to this great public contest" (*Burke*). See KNOWLEDGE.

lease (lēs), *v. t.;* LEASED (lēst), LEAS'ING (lēs'ĭng). [F. *laisser,* OF. *laissier, lessier,* to leave, transmit, L. *laxare* to loose, slacken, from *laxus* loose, wide. See LAX; cf. LESSEE, LEASH.] **1.** To grant or convey to another by lease; to let; demise; — sometimes with *out.*

le'gion (lē'jŭn), *n.* [ME. *legioun*, OF. *legion*, F. *légion*, fr. L. *legio*, fr. *legere* to gather, collect. See LEGEND.] **1.** *Rom. Antiq.* A body of soldiers forming the principal unit of the army and varying in number from 3,000 foot soldiers and 300 knights, or cavalrymen, in early times to 5,000–6,000 foot soldiers under the empire. Under the republic until the time of Marius, the normal strength of a legion was 300 knights and 4,200 foot soldiers, 3,000 heavy-armed and 1,200 light-armed. In early times a formation like the Greek phalanx was used; about B. C. 390, the formation by maniples was introduced, which latter prevailed until the time of Marius, who substituted the cohort formation and made other changes, such as the removal of the cavalry and the light-armed infantry. The heavy-armed soldiers were divided into three classes, according to their length of service and familiarity with warfare, which under the manipular formation formed three divisions, the first and second of 1,200 men each and the third of 600, drawn up in ranks in open order, the distance between the ranks corresponding to the breadth of each maniple in front. The maniple was a tenth of each division, and thus consisted of 120 men in the first two divisions and 60 men in the third. The cohort was a tenth of the legion, and in each were three maniples of the three classes of soldiers. The customary battle array under the cohort formation was in three divisions, the first of four cohorts and the second and third of three each.

2. A military force; an army; military bands.

3. A great number; a multitude.

leg'is-late, *v. t.* To cause to be, become, go, pass, or the like, by legislation; as, to *legislate* a nation into ruin.

leg'is-la'tion (-lā'shŭn), *n.* [L. *legis latio* · cf. F. *législation.* See LEGISLATOR.] Act of legislating; preparation and enactment of laws; in a wide sense, *Jurisprudence*, the making of laws by express decree or enactment, either by the supreme lawmaking power, as a king, council, legislature, etc., or by any person or body exercising the lawmaking power by delegation or in subordination, as judges, committees, town or city councils, health boards, various executive officials, etc. (in this wide sense practically including all written law). Also, the laws that are so enacted.

leg'is-la-tive (lĕj'ĭs-lā-tĭv), *a.* [Cf. F. *législatif.*] **1.** Making, or having the power to make, a law or laws; lawmaking; as, a *legislative*, as distinguished from a judicial, act; a *legislative* body; the *legislative* department; — opposed to *executive* or *administrative*, and *judicial.*

> The supreme *legislative* power of England was lodged in the king and great council, or what was afterwards called the Parliament. *Hume.*

2. Of or pert. to the making of laws, or the body which makes the laws; suitable to, or involved in, legislation; legislational; as, *legislative* business; the *legislative* style. **Legislative Assembly,** *Fr. Hist.*, the legislative body of 1791–92, following the National Assembly; also, that of 1849–51, following the Constituent Assembly. — **1. council,** the upper house of a legislature, often called the *senate.* — **L. leg'is-la'ture (lĕj'ĭs-lā'tūr), *n.* [See LEGISLATOR.] **1.** The body of persons in a state, or politically organized body of people, invested with power to make, alter, and repeal laws; a legislative body. The *legislature* of Great Britain consists of the Lords and Commons, with the king or queen, whose sanction is, in theory, necessary to every bill before it becomes a law. The *legislature* of the United States is usually distinctively called *Congress* (which see). In the various States the *legislature* is often specifically called the *General Assembly.* It is a bicameral body, of which the lower house is usually called the *Assembly* or *House of Representatives*, and the upper house the *Senate.* The signature of the executive is required to a bill before it becomes a law, unless it is again passed over his veto usually by more than a bare majority. See GENERAL ASSEMBLY, ASSEMBLY, REPRESENTATIVE, SENATE, VETO, EXECUTIVE, JUDICIARY.

☞ The legislatures of some of the more important states having constitutional government are as follows, the general name of the legislative body collectively being given under the heading *legislature, or parliament:*

*In the self-governing colonies of Great Britain the legislative body usually consists of two chambers, the names of the legislature and its chambers varying. Thus in Australia the FEDERAL PARLIAMENT is composed of the SENATE and the HOUSE OF REPRESENTATIVES, in Canada the PARLIAMENT is composed of the SENATE and the HOUSE OF COMMONS, in New Zealand the GENERAL ASSEMBLY is composed of the LEGISLATIVE COUNCIL and the HOUSE OF REPRESENTATIVES, etc.

†Members of the Storthing are chosen for three years by direct election by manhood suffrage, forty-one being elected from the towns and eighty-two from the rural districts. The Storthing on assembling divides into the Lagthing including one fourth and the Odelsthing including three fourths of the total membership of the Storthing. All new laws are laid first before the Odelsthing. If the two houses do not agree they vote in joint session, a majority of two thirds of those voting being necessary to a decision.
